MORE EVIDENCE ABOUT THE BEEF

Captain Barclay H. Warburton's Sworn Statement—The Beef on the Transport Manitoba the Worst Ever Encountered.

Washington, Jan. 23.—The board of survey appointed by Secretary Alger to pass upon the question of the proper condemnation of a large quantity of beef destined for the troops in Porto Rico, has received from Captain Barclay H. Warburton, of the Pennsylvania volunteer battalion of artillery, a sworn statement of the condition of refrigerated beef on board the transport Manitoba which transport was at Ponce from August 10 to 25.

In the course of this statement Captain Warburton says:

"I ate of the beef which the transport Manitoba brought to Porto Rico. It was served to the officers' mess on the United States transport Mississippi which brought my command back to New York, leaving Ponce, Porto Rico, September 2, and arrived in New York September 9, 1898. When I say I ate the meat I must qualify my statement by saying that I tried to eat the meat. It was so bad that it was impossible to swallow it. In my opinion the meat was not good nor was it fit for issue. I had no idea that this meat had been subjected to any chemical process but believed the beef to have decomposed on account of the lack of proper refrigerating facilities, caused by the closing of the machinery used for that purpose on the Manitoba. I was informed by Captain Gates who was then in command of the Manitoba, that said machinery had been clogged with sand as a result of our having run aground which necessitated the reversing of the screw which threw sand into the water pumps."

"In reply to your request to give the board any other evidence or information in my possession or knowledge, my answer in general is that all beef which was received on the transport was inspected by me and found to be in question. Private Hack, of light battery C, Pennsylvania volunteer artillery, was sent for an issue of beef, which his captain had been notified would be issued on the morning of the issue. The machinery used for that purpose was broken and while it was some hundred and fifty yards from me, I noticed the most terrible odor, which seemed to me to smell something like carrion. I was mounted and when I got alongside the wagon I looked in and saw the meat which had been issued to him for light battery C, Pennsylvania volunteer artillery. It looked white, about the color of the belly of a flounder which had been covered with a green slime. It instructed him to present my complaints to his commanding officer, Lieutenant Bean, with instructions to have the same buried immediately upon his arrival at camp."

"Captain Warburton gives the names of some witnesses whose testimony may be of value."
