FOREST CITY.

Messrs. William McLaughlin and William Jones and the Misses Eva and Emma McLoughlin and Martha Grif-3ths were visitors in Jermyn the first

of the week. . Enos Cordner, of Carbondale, was the guest of Joel Haynes, Monday and fuesday.

Miss Mollie Robinson, of Philadelphia, is visiting her brother, Thomas Robinson, of Dundaff street. Mr. Walthan Thornton, of Hazleton,

was a visitor in town Tuesday. Tuesday afternoon about one o'clock ire was discovered in the Lithuanian atholic church. Smoke was first seen ssuing from under the caves and soon the roof was in a blaze in the rear end of the building. An alarm quickly brought the Enterprise Hose company and the Hillside Fire company on the scene, but when they arrived they were prevented from doing effective work oward saving the edifice, because the orce of water was so poor that a stream could not be thrown on the ourning structure. The church is situnted in the western part of the borugh and on one of the highest points in town and hence the poor force. The fremen then brought ladders into use and formed a bucket brigade. The fire by this time had such a start that it was impossible to save the church and attention was turned to preventing the parochial residence from being destroyed. The members of the two comcanies fought hard for several hours and kept the sides and roof of the building wet enough to event the inburch building was entirely destroyed, out most of the furniture and fixtures were safely removed. It is said that the property was insured for \$5,000. which will not more than half cover the loss. How the fire originated is not known, but there had been services in the church that day, and it is supposed o have caught from some of the lightd candles and to have been burning raids for some time before it was discovered. Rev. Father Kuras, the priest in charge, was absent at Ply-mouth when the fire occurred. The church will probably be rebuilt at

Election passed off quietly in Forest Pity, although a very large vote was pelled, there being 268 ballots cast in the First ward and 313 in the Second. The result was a clean sweep for the Democrats, every one of the nominees of that party being elected. For the first time in its history, the Second ward went heavily Democratic, many cho have heretofore been Republicans voting and working against their party openly on account of alleged grievances. Much splitting was also done and the vote was not counted until neart midnight. Following is the vote received by the different candidates by

7; W. T. Griffith, 14, The funeral services over the remains of the late Julia A. Brong of Second street, were held in the M. E. church yesterday afternoon and was one of the largest funerals ever wit-nessed in this community. The pubic schools closed at two o'clock and the pupils and teachers repaired to the church. A short service was held at the home by her pastor, Rev. S. C. Simpkins, and at half past two the procession proceeded to the church. The solemn tones of the tolling bell told the already large congregation within of its approach. At a quarter past three the solemn procession filed in, Rev. S. C. Simpkins leading, followed by six young men and two young ladles bearing flowers. Next the casket, carried by eight young girls, members of the Bible class o which the deceased belonged. The hoir sang "My Jesus as Thou Wilt" Halsey Lathrope, superintendent of the Sunday school, offered a fervent prayer. Rev. Simpkins preached very impressively a sermon from the text 1, Samuel 29-18: "And thou shalt be missed, because thy seat will be empty." At the close the close sang "Some Sweet Day Bye and Bye" and while

Remarkable Success of a New Pile Cure.

People who have suffered for months r years from the pain and inconvenence of that common disorder, piles, will look with akepticism upon the claims of the makers of the new disovery for a cure of all forms of piles, known under the name of Pyramid Pile Cure: nevertheless the extraorlinary cures performed by this remedy are such as to warrant the investigation of any sufferer. As a case in point the following letter speaks for

Mr. Henry Thomas, of sub-station No. 3, Hosack avenue, Columbus, Ohlo, writes as follows:

Pyramid Drug Co.: Gentlemen-I want you to use my name if it will be of any use to you. I was so bad with piles that I lost work on that account. Nothing helped me. I read in Cincinnati of the many cures of piles by the Pyramid Pile Cure and I went to a drug store and asked for it. The drug clerk told me that he had something else that he thought was better, but I told him that I wanted to try the Pyramid first. The first box helped me so much that I tried another, and then to complete the cure used two more boxes, making four in all. I am now completely cured. IN THE PLAY HOUSES.

At the Academy.

The holiday attractions at the Acadmy of Music brought large crowds to that popular play house yesterday afternoon and evening. This after-noon "Special Delivery" will be produced and tonight "A Broker's Daughter" will be seen.

Change of Programme.

A change of programme is announced or the Galety theatre during the balance of the week. A change of programme, however, seems unnecessary in this instance. The Metropolitan Burlesquers present an entertainment that can be enjoyed many times in succession. The inspiring musical efforts of the white and colored vocalists of the troupe never grow tiresome.

Every Night Next Week.

The annual visit of the celebrated Bennett-Moulton Comedy company has become an event in the amusement line in this city. As thousands of our citizens have attended their performancesin the past and know the reputation of the company for keeping up the standard of excellence for which it is noted, they know what to expect next week. Manager Moulton promises the best acting company money can procure, a car load of scenery, their own orchestra, new repertoire, etc. Amusement lovers can anticipate a feast and they will surely get it. The prices, 10, 20 and 30 cents, originated by this company will prevail. Commencing Tuesday, dime matinees daily.

"A Rag Time Festival."

On Monday matinee next, what is termed by the management as a rag time festival will be presented at the Gaiety theatre by the famous darktown swells, a large and capable company of male and female artists who have created a furore in the larger cities. This entertainment, to say the east, is certainly a novelty and might be appropriately called "A rag time opera," as it consists principally of the

it will absorb moisture again. According to experiments mentioned by E. Schulze in the Gummi Zeltung, it does so with a certain rapidity. Rolled rubber plates, which by virtue of their treatment are in a somewhat compressed condition, ansorb from eight to thirty-five per cent. of water in two hours, when the water is heated to about 120 degrees Fahrenheit. At increased pressure the absorption takes place much more readily; a piece of ruber kept in a cylinder under a pressure of 140 pounds absorbed twenty-five per cent, of water in five minutes. Oils, of course, stop the water. Vulcanized rub-her remains dry, but not entirely so, and badly vulcanized goods deteriorate quickly, owing to this reason. Schulze kept a date of the best Para rubber in water at a temperature not exceeding 110 de-grees Fahrenheit. After two months and a half the rubber had become a hopeless mass. We see how badly moisture at temperature such as may occur in our climate, and we understand once dressed the meeting before the usual business was transacted. The Home may indeed have more to do with the condition and quality of the rubber than the origin. The percentage of water should be ascertained, as the quantity of the sulour and other ingredients which we admix to the rubber should be settled according to the percentage of dry rubber. it was reported as a curiosity some years ago that a rubber bottle filled with wa-ter would gradually become empty. We an know that rubber turns whitish when ong in contact with water, but the real

Machine and Hand Work. From the Engineering Magazine.

There are many people now living who can remember when joiner work, including even flooring and ceiling, was nearly all planed by hand- a laborious process that did not in most cases include thick-nessing, and was consequently an info-rior method, except perhaps as to finished surfaces; and even this exception is not to be made in comparison with the fixed kulfe planing machine employed in Europe, and, more notably, with amouthing machines invented in the United States.

Measured by manual energy, which may be taken as 2,500 foot-pounds, or one-thir-

teenth of a horse-power, for a strong man, it would take 130 men to equal the planing machine in favor of the machine the guidance and application of the LaBAR & FULLER ofore named. These comparisons convey an idea of the

extraordinary economic results of ma-chinery attained in the principal proceses of wood conversion. They seem in-redible, but there are no longer means of comparing, because values are now ad usted to the machine product alone, and
