BEST ASSURANCE OF GOOD BUSINESS

IT IS FOUND IN THE GENERAL RISE OF WAGES.

An Advance of Ten Per Cent. in Most Cases Throughout the Indusrial Centers-The Volume of Frade Shows no Sign of Decrease at Present-Exports Do Not Fall Below Last Year.

New York, March 10.-R. G. Dun & Co.'s weekly review of trade will say

By far the best assurance of good general rise of wages. The general advance in carnings of cotton mill of iron and steel workers generally 10 per cent, and tin plate and sheet workas much, has set a pace which most establishments will follow which have reduced wages in past years of depreswhat such a change may mean have only to consider that a tenth increase in amount about three-quarters of the entire value of exports to all countries. The volume of business shows week of last year and 60.9 per cent. greater than in 1892.

Most people would not expect the the weather. Yet in the Pittsburg district alone the furnaces running are said to have produced 13,000 tons per week less than their January output, so that the decrease in weekly produc-1, against 237,639 Feb. 1, does not mean anything more than bad weather. The shrinkage of supplies of iron in February, just when increased supplies were expected and needed, has contributed much to the extraordinary advance in prices, \$2.75 in anthracite No. 1, Feb. 1; \$2.50 in Bessemer pig at Pittsburg, and \$2.75 in grey forge. The unsold stocks were also reduced in February 46,431 tons, so that the apparent consumption was 977,979 tons in the short month. Nearly all the work done, of course, is at the comparatively low prices made in the great contracts three to four months ago, but the few for early delivery are charging about O'Neal. what they please, and these quotations appear in the published statements in many cases \$1 to \$5 per ton premium is paid for delivery within sixty days. Plates are in especial demand and higher, but in rails, bars and structural forms the demand and prices are not yet much changed.

Tin Is All Right.

Tin is firm at 21.58 cents, with consumption of 2,500 tons monthly, and copper is scarce for spot at 17.75 cents, with lead weaker at 4.30. The trust refuses quotations for tin plates. The demand for coke exceeds the transporting capacity for the Connellsville re-

ficiency of the crop.

Hesitating because his advisers termed it a 'labor play," timid with the fear that as such it would not be accepted by the better class of theater patrons, he was at that time and has ever since been catering to. But all years quickly vanished the first night of the performance, as both the masses and the classes greeted it with storms of applause and joined in proclaiming it the greatest treatment ever given that vexed question between capital and labor. A splendid revival production of this excellent play will be given at the Academy of Music during the week of March 13 by the Pitman Stock company.

Kellar's "Simla Seance."

Spiritualists throughout the United States have been wondering for several years whether Kellar, the magibusiness in the future is found in the himself has answered this question in a thousand ways and times, but always in the negative. He laughs at operatives, in most cases 10 per cent., the tricks of the mediums and has always stood ready to duplicate any socalled manifestations they claim to be ers from 5 to 10 per cent., and of coal able to produce. He declares that miners, in some large districts, about everything he does is accomplished by trickery alone and not by means of supernatural power. In his entertainment this season Kellar is reproducing sion. Those who fail to comprehend the most intricate and inexplicable spiritualistic phenomena the spiritualists have ever succeeded in getting up. At in the wages of all labor would put Simla, in India, every year the best into the markets a new buying demand and most noted mediums in the world gather to exploit their art. The Simia seance has hitherto been decabed the ne plus ultra of mediumistic no signs of decrease, and for the first | When in India a few years ago Kellar full week of March has been about visited Simia and saw the seance, 51.7 per cent greater than in the same which really was a wonderful network of trickery. He has astounded spiritualists who are posted on such matters by reproducing the scance production of pig iron to be affected by entire upon a fully lighted stage every night, and, best of all, builds his cabinet piece by piece in the middle of the stage, where all parts of it, inside and outside, are visible to everyone all the time. New York, March 10.—The market opened irregular and an advance of 4 points in Metropolitan and strength in Brooklyn Rapid Transit and other specialties. Manhattan Railway scored an advance of 8 points in the first lifteen minutes with free buying by inside interests, Flower stocks were also strong and Coalers after a heavy opening gained strength and recovered the early less. In the halance of the market little was done and prices remained relatively unchanged. The iron and steel stocks, however, showed some strength. London was a trader to a small extent at opening, our prices being near enough to their parity to prevent much arbitration. They sold, however, some Atchison preferred. Union Pacific and Southern Roilway common, The Flower interests have been openly builtsh on Manhattan Railway, Brooklyn Rapid Transit and their own specialties, and have carried them up to prices which in some cases are not warranted by the conditions. The ex-governer's following, however, is very large and it is only necessary for him to advise buying to start the whole speculative element on the long side. The external conditions affecting prices remain nearly as favorable as they have been but it is to be noted that conditions do not legitimately warrant any further uniform rise in prices. On the contrary there is a feeling that in a good many cases prices are sustaned by the extraordinary sangulae temper of the speculation. Certain specialties are undoubtedly selling below their value instances as usually true certain others are selling

The hands of the professionals and can be moved either up or down without much exertion. The bank statement tomorrow if good should have a very favorable effect on prices next week and unless extraordinary banks may not cause much uneasiness. The feeling is pretty general that although rates may work somewhat higher no actual stringency need be feared. For that reason the money situation has less effect on prices than it did some weeks ago. The adjournment of congress has had an undoubtedly good effect and in the absence of adverse legislation and aside from any foreign complication the outlook is undoubtedly for better prices. At the same time the market as yet is in the hands of the street cliques and it is possible the evidences of the past few days may bring in such liquidation as to check any upward movement just at the moment. The market is hard to judge from ordinary standards and we must confess we are ourselves somewhat mixed on it. Manhattan Railway has sold today 5 points higher than the price we fixed nearly sixty days ago for it, and when it was selling below 209. There is no question in our mind but what it will sell, within a fairly short time, above 30. Marted closed very firm with some recessions from best prices.
