TRADE BALANCE IS ON OUR SIDE

AMBASSADOR CHOATE'S RE-MARKS JUSTIFIED.

The Year 1898 the First in Which the Domestic Exports from the United States Exceeds Those of the United Kingdom-The Rivalry Has Been Friendly.

Washington, March 19.- Ambassagor Choate's recent remark that the United States and the United Kingdom would doubtless continue a friendly rivalry in regard to the world's commerce is quite justified by the latest figures on the commerce of the two countries as supplied by the treasury bureau of statisties. These show that the exports of domestic merchandise from the United States in the eight months ending with Pebruary amount to \$829,335,141 and those from the United Kingdom amount to \$798,160,127. In the calendar year 1898, the domestic exports from United States amounted to \$1,283,564,828 while those of the United Kingdom amounted to \$1,131,944,331. The year 1898 was the first in which the demestic xports from the United States exceeded the domestic exports from the United kingdom. On only two occasions prior to 1898 have the domestic exports of the United States exceeded a billion dollars while these of the United Kingdom have constantly exceeded a bilfion dollars during the past twenty years. The latest year in which her exports of merchandise fell below the billion dollar line was in 1879, when they amounted to \$928,929,026. In 1879 our owr exports of domestic merchandisc amounted to \$754,656,755. Thus in the twenty years since 1879, the figures show an increase of but 22 per cent. ir the domestic exports of the United Kingdom and of 63 per cent, in those of

PROSPECTUS.

It is no longer a matter of doubt that gas will be the universal fuel in town and cities for cooking purposes. Its convenience, comfort and economy has already been extensively demonstrated even with the use of imperfect and make-

even with the use of imperfect and make-shift appliances.

The rapid increase in the sale of these appliances make it clear that the field for effort and success in the sale of a com-plete, easily managed and economical gas cooker is fully ready for the harvesters. To this end the Bunsen-Rumford com-pany, with offices at Coal Exchange, has been organized for the manufacture and sale of "the student Grit." a perfect gas kitchener that has been a three years' subject of careful study.

Though occupying a space of only twen-ty-four inches square it has all the ca-

though occupying a space of one twenty-four inches squared it has all the capacity and more than the convenience of a coal or gas range with five active fireholes and which would require a space at least three by four feet. t least three by four feet.

Moreover, the form of the Grill is such
hat it is ornamental rather than ugly
nd it is thus made desirable whether
he users live in palaces or apartments.

e arills are to be made under con-and their cost will therefore be a or of absolute certainty. The objec-which some livestors have to manfacturing enterprises do not obtain in There will be no necessity for a large

nay be required.

No more promising field for profitable avestment can be found anywhere today. The grill will be attractively set before be public in our magazine advertise-cents and we may reasonably expect beral cash orders from every part of the inted States and beyond.

We may reasonably expect early and iberal dividends on the moderate insestment required and a consequent rapid norcease in the value of our shares.

The Bunson-Rumford Co.

7 Coal Exchange, SCRANTON, PA.

the United States, apparently quite justifying Ambassador Choate's assertion that the United States would continue to be a rival, though a friendly one, of the United Kingdom in its relations with the commercial world.

That the rivalry has been and is a friendly one even to the extent of cordiality is shown by the fact that despite our rapid increase in the supplies which we are offering to the markets of the world, Great Britain continues to take a proportionate share of that increase. Our exports of domestic merchandise to the United Kingdom in 1879 amounted to \$346,485,881, and in 1838 were \$534,398,302, an increase of 54 per cent.; while as already shown, our genera! exports increased 63 per cent. during that period. This is the more striking and worthy of remark in view of the fact that our own imports from the United Kingdom have not increased at the rate her purchases from us have grown indeed, the imports into the Unied States from the United Kingdom in 1898 are no greater than they were 20 years ago, the imports from the United Kingdom in 1897 being \$108,538,813 and in 1808, \$168,945,185.

HEROES OF THE BALLOON.

Thomas Carroll Boone Dies from In-

juries Received at Santiago. Boston, March 19.-Thomas Carroll Boone, the telegraph operator in the war balloon in the operations before Santiago, died today at Massachusetts general hospital from the result of an operation on a wound received in the fall of the balloon after it had been shot to pieces. Boone, with two govofficers, performed heroic ernment work in the great air ship, which was a target for the Spanish gunners until it fell into the trees and threw all three men out. Boone was caught in the drag anchor and was fearfully He never fully recovered, although since last fall up to within two days of his death he continued his work as a telegrapher.

He was born in Annapolis, Md., in 1876, and went to the front as first corporal of Company K, Second Massachusetts volunteers. Soon after the regiment reached Tampa he was detached and made a sergeant in the government signal service. In the first days of the fight at Santiago he went up in the balloon and sent all the messages and continued the work on the second day during the battle of San Juan hill. The body will be sent to Annapolis for interment. Calamity has overtaken all three of the men who were in the unfortunate balloon. One of the officers died as the result of his injuries while another is an inmate of an insane asylum.

MR. ALGER'S OUTING.

Will Visit Localities Where Embalmed Beef Was Discovered.

Washington, March 19 .- Secretary Alger returned to Washington tonight from his brief visit to Boston and Montreal. The secretary said he expected to leave Savannah, Ga., Thursday for a trip to Cuba on the regular trip of the transport Ingalls. He has never been to Cuba and takes the trip both to familiarize himself with the conditions there and to get a brief respite from official duties at Washington. Major Hopkins, his military aide; Victor L. Mason, his private secretary, and several other persons will accompany him. Whether he will go further than Havana the secretary would not say tonight, but indicated that that was dependent merely upon the circumstances.

The secretary added, in answer to a direct question, that he intended to visit Jekyl island, the place the president, vice-president, Senator Hanna and others are booked for a visit during the present week.

and others are booked for a visit dursort. It can be used in a closet of moderate size, or behind an ornamental screen in the corner of any apartment. It is handsome enough to stand by itself as a ureful piece of furniture.

Many other points of interest are set forth in a neat booklet which will be sent to any address when requested.

The grill was exhibited and a practical demonstration of its capacity was made before the Scranton Board of Trade at its February meeting—sufficient food and sauces in clegant variety for fifty people was preparted in the secretary's palatial office while the board meeting was in progress and while the demonstrator had had no previous experience in fine cookety, the expression of satisfaction and positive delight over the results obtained was universal.

The commany bear to refer any who made the present week.

IN THE PLAY HOUSES.

THE MARKETS.

Wall Street Review.

By Associated Press. New York, March 18.—The change in stock prices compared with yesterday was yery narrow. In the early trading prices drifted downward. Interest yery largely drifted downward. Interest very largely centered in Sugar again today and the stock closed within a fraction of the hundred point—1724—yesterday's closing bein 1844. There were declines of from fractions to 3 per cent. In Tobacco and some of the new industrials, including Continental Tobacco, American Tin Plate and American Steel and Wire. The raff-ways left off practically on a parity with yesterday's closing. The market close! strong and active. Total sales were 261.—810 shares. Business in bonds decreased during the week with the market showstrong and active.

Sto shares. Husiness in bonds decreased during the week with the market showing a yielding tendency. United States 3s. old 4s registered and new 4s coupon advanced %, and do, registered, the 5s and old 4s coupon ½ in bid price.

By J. R. L. Carrington & Co.

New York, March 18.—This week has in some respects been a most remarkable one of all the year of remarkable markets in the street. During the early part of the week the market was dull and inclined to weakness, owing to the stringency in money due to heavy payments to the government on account of the Central Pacific notes and to the financing of Alton sale. Up to Thursday the market showed slight evidence of any real movement being likely. On that day, however, the whole list was favorably affected by a remarkable rise in Sugar stocks which carried prices to record figures and incidentally strengthened industrials and railroad securities. Short interest was heavily whipped all along the line, and the last days of the week saw an active and strong market. Aside from the evergions By J. R. L. Carrington & Co. rong market. Aside from the gyrations strong market. Aside from the gyrations of Sugar there was no real news to have affected any change. Money which has been the bugaboo for the last three weeks was again the main feature in the speculation. Several times during the week, call loans were made at 6 per cent, and there was a good deal of discrimination of loans in collateral so that speculation was held in cheek. The banks have made heavy disbursements for government account and there seems a probability there will be a certain amount of closeness for a couple of weeks at least, to come. Aside from this, there is no real change in the situation since the previous weeks ending.

The business situation of the country

vious weeks ending.

The business situation of the country continues to be exceptional. The week's clearings show a gain of 37.6 per cent. over 1882 and 27.1 per cent. ever last year. Without regard to details, however, the volume of business in all branches is the greatest ever known. The railroad earnings show very small material changes, there being a slight increase over last year, due to the good weather of the early weeks of the month. The tonnage movement from Chicago, however, shows year, due to the good weather of the early weeks of the month. The tonnage movement from Chicago, however, shows a decrease over last year with a slight necrease over 1822. One significant feature in the situation is that exports which have been so much of a feature during the ast two years are beginning to show lecrease and imports an increase. Whe changes are small up to present the fact that the current seems to have the fact that the current seems to have in the other way must not be lost sligh of. Our balance of trade which has been he main cause of the wonderful revival in the business situation shows some dedection during the month and a continu-

In the business situation shows some depletion during the month and a continuance of it will reverse our position as regards the nations of the world. While this is but a straw which shows how the wind may blow, yet it is just such a small indication as this that must be taken up and together with others of the like character to enable at moment of any material set-back, and while we think ourselves the centinuance of an upward movement in the value of securities is likely yet in the end a point must be reached where the tide will be at its full. To determine this point the situation at reached where the tide will be at its full. To determine this point the situation at large must be taken into account for that reason we advise the greatest care in both investment and speculative movements.

The present year will undoubtedly see very high prices for specialties and industrial stocks and the speculation in them will undoubtedly be a feature of the market during spring and summer months. We are of the opinion therefore that the stocks to purchase are the low priced common stocks of the industrial corporations and railroads of special geographical position which must apprecorporations and railroads of special geo-graphical position which must appre-ciate in value from the great increase in the volume of business. The day's market was irregular up to the bank statement which being better than ex-pected, closed the market strong. Total sales, 351.842. Bonds, \$2,240,000,
