What is popularly called kidney

trouble is shown by modern investi-

gation to have several forms. It is

always a dangerous and deceptive con-

dition, sometimes slowly and some-

times rapidly progressive, and liable

to terminate fatally even when the

immediate symtoms seem to be least

alarming. Thousands of casualties

attributed to other causes are really

due to diseased kidneys. The success

for many years of Warner's Safe Cure

in relieving and curing this subtle di-

sease has won for it the world-wide

reputation it now enjoys. When kid-

brought this complaint upon me.

Relief at Hand Had He Only Known Where to Look for It.

Let us, my good friends, always suit our tools to the work to be done. We do not trim our nails with broadswords or carve statues with adges. Now a word is a tool, just as a hoe is, or a razor. The figure of Liberty on a quarter of a dollar is impressed there by a machine made for the purpose. By the same token words were invented to imprint thoughts and ideas on the minds of others. And every word or expression has a currency meaning of its own so long as we refrain from using them in a slack or careless way. Just as the lord mayor's coach, or

one's own best clothes are not intended for every little trumpery occasion, so great words should be reserved till the time comes when nothing else will do. When a man singes his whiskers by the slovenly handling of a lighted match, we do not rouse up the fire department.

Now the word "excruciating" is one of the strongest words in the English language. It tingles with sharp significance as a black cat's back snaps with electricity on a frosty night. Only shallow people will take liberties with this word. In our ordinary talk it does not come properly into play once a year; and rightly so. For it alludes to a kind of mental or physical suffering that we desire to avoid thinking or speaking of. If the root meaning of the word "excruciating" escapes you for a moment look it up in the dictionary. It is a word with a pedigree, and its ancestors have supped with horrors since men began to make

The question then that you and I have to settle is, whether Mr. George B. Simpson employed this dignified and exclusive word justifiably when he said: "I was troubled twelve years with much pain in the small of my back. So continuous was it that I ceased to take pleasure in work. Indeed, I ceased to take pleasure altogether. With me life got to be a thing to endure, not to enjoy. I am speaking within bounds when I say that at times these pains were excruciating.

"With the pains in my back I suffered from terrible periodic headaches and profound mental depression. I was a prey to anxiety and apprehension, the cause of which I was unable to locate or understand. Yet to look at me you would hardly have fancied my true condition. Sometimes when appearing at my best and receiving the congratulations of my friends on what they were pleased to can my obvious improvement, I still felt wretched and miserable. But nobody sympathized with me. I suppose it was because I was not emaciated or run down as persons with dangerous diseases are commonly supposed to be.

"While on this point, I may perhaps be permitted to say that affections of the kidneys, even Bright's disease itself, often co-exist with a generally healthy external appearance on the part of the patient. The poor fellow may be within a few weeks of his death and yet to the uninstructed eye look well enough to pass for a sound
