

Nervous Debility

is often one of the most distressing after-effects of the Grip. It may also be caused by overwork, worry, mental strain or excesses of almost any nature. Whatever the cause, a debilitated nervous system means that the nerves lack nutrition. Feed the nerves and life will renew its joys for you.

The best nerve food, and the most valuable tonic (because it both builds up the blood and strengthens the nerves) is Dr. Williams' Pink Pills for Pale People. Hundreds of worn-out, depressed men and women have been made strong-nerved, ambitious, energetic and healthful by this remedy.

Among the well-known men of the newspaper profession is F. J. Lawrence, of 422 Fourth Avenue, Detroit, Mich., who for the past eleven years has been at his desk every day. He says: "At one time I was in such a condition that my physician said I would have nervous prostration, that I would have to stop newspaper work or I would go to pieces if I persisted in doing it as I was destroying what nerve force I had left. I lost flesh and had a complication of ailments which baffled skillful physicians. An associate recommended Dr. Williams' Pink Pills for Pale People and I gave them a trial. I can't say that I received any benefit from the first box, but derived very good results from the second. They gave me strength and helped my shattered nerves so that I could get a full night's rest."

"A great deal of pain in the small of the back I attributed to a derangement of the kidneys. For this complaint Dr. Williams' Pink Pills for Pale People were recommended. I began taking them regularly, the pain ceased, and I felt like a new man. I am greatly encouraged from the results of using a few boxes and am confident that the pills will work a complete restoration of my former condition."—From *Willoughby News*, Detroit, Mich.
