DOES IT MEAN A TUNNEL?

Rumor That Anthracite Park Will Be Used for Huge Storage Yard.

The rumor that Anthracite park is to be used by the Delaware and Hudson company as a dumping ground for coal is too preposterous for consideration. One of the great leaks in the transportation of coal via of the canal was due to the transfer of coal to this theory and this transferring is just what coal companies desire to avoid. A car once loaded should reach the destination of the coal before being emptied.

This talk, however, has given rise to another rumor which may have some foundation. It is that an immense storage yard will be built in Anthracite park and used for the concentration of coal prior to transportation through the Moosic mountain tunnel, which has been built so many times on paper. Some well informed men who hold to this theory say they would not be surprised to see contractors commence work on that tunnel any day.
