are attracting the attention of all who see them at our store. These splendid pianos contain so many improvements and in style and finish are far ahead of anything of the same wholesale cost that one marries at the low prices we ask for them. WHY CAN WE SELL OUR PIANOS SO LOW? Because we buy at the lowest cash price. Because we can't on pianos out on trial. Because we demand a payment down on the instrument. Because we have no agents. Because we make no unnecessary expense.

NEW SYSTEM OF
RUNNING TRAINS

TO GO INTO EFFECT JUNE 10 ON
D., L. & W. R. R. AD.

It is a Radical Departure from That Now in Vogue—There Will Be No Regular Runs—Rule of "First In, First Out" Will Be Observed—Engineers as Well as Conductors and Brakemen Will Come Under This Rule—Heavy Engines Coming. Other Industrial Matters

Beginning June 10, when the summer time table is issued, the Delaware, Lackawanna and Western company contemplates a radical change in its system of allotting crews to second class trains.

Under the new system there will be no regular runs. The rule of "first in, first out" will supplant the present one of having a fixed time for each crew. A crew will be able to tell about when it is expected to go out and be in readiness to start from the yard one hour after receiving notice by the call boy. This will apply to engineers as well as conductors and brakemen.

With this system in vogue and heavy engines being run, the road can be operated with a far less number of men than at present. How many hands it will effect cannot be even fairly estimated now.

The heavy engines that were constructed for the Philadelphia and Erie trunk will begin arriving next week and as fast as they arrive the "double-heading" of second class trains will occur.

IN AND ABOUT THE SHOPS
The remodeling of Master Car Builder Cantfield's office at the Delaware, Lackawanna and Western car shops is progressing rapidly and is expected that the building will be ready for occupancy early next week. The floor space has been enlarged and a second story built in this giving ample room for the present needs.

Master Car Builder Cantfield has returned from a week's trip over the road and as far west as Chicago. He visited many of the smaller Delaware, Lackawanna and Western shops while absent and is arranging matters with a view of concentrating much of the detail work here as soon as room can be secured. He had many old friends, who congratulated him upon his new success.

Affairs in the machine and locomotive power departments are moving along smoothly and the new arrangements are fast becoming an old story.

D. & H. DOUBLE HEADERS
The tremendous coal traffic on this division of the Delaware and Hudson has resulted in the adoption of a novel method of hauling the trains. Two locomotives are now employed on each train of cars, the second engine being placed just behind the last of the train. Fifty cars are hauled by the two engines, instead of about thirty by one engine as formerly. By this method the railroad company nearly doubles the traffic with little additional expense for train crews.

We are unable to say that this arrangement is a triumph, but for the past several days we have observed that all coal trains are handled as stated. It is easy to remember when coal trains on this road were not more than half a dozen a day, each train with fifteen or twenty cars. Now such train companies as the Erie and the almost incessantly day and night Windsor Standard (N. Y.)

VALLEY'S NEW ENGINES
Six of the ten large compound engines ordered by the Lehigh Valley road have arrived at the Coxton yards and two of them have had a trial on the mountain cut-off from Pottsville junction to Farview. The engines are of the Baldwin make and weigh 115 tons each and are capable of pushing 1,000 tons up the "cut-off."

This is double the work of the engines commonly used. The engines are veritable monsters compared with the passenger or freight engines towering a good four feet above them and weighing nearly double.

YET ANOTHER RESIGNATION
William S. Kressler, foreman of the tin shop, a department in the Delaware, Lackawanna and Western machine shops, resigned yesterday. His resignation to take effect immediately. Mr. Kressler has been an employee of the company over twenty years and has a splendid record as a faithful and competent workman. He resides in Green Ridge, and is well known in fraternal circles.

THIS AND THAT
There are about 2,000 members in the trades unions of this city, and more members are coming in every day.

Under the new management the Mt. Pleasant colliery has turned out more coal than at any time in its history.

This city ranks high in the United States as an organized and efficient city, ninety-five per cent of its skilled mechanics being bonded together.

Work was started yesterday on twenty-four new poultry cars at the Delaware, Lackawanna and Western shops which are to be built from Master Car Builder Cantfield's original designs.

The recently formed association of teamsters and drivers will meet tonight in Economy hall on Wyoming avenue. Every teamster in the city is invited to attend the meeting.

National organizer Edward Fiebig, of the brewers' union, had a long talk with John Knowlton, of the Carpenters' union, and J. A. Price, of the Building Trades council, waited on Charles Robinson, treasurer of the Central Pennsylvania Brewing company Tuesday and advised the company regarding the brewers' union. Mr. Robinson told the delegation that he will bring the matter before the next meeting of the board of directors of the company.

The Delaware, Lackawanna and Western Railroad company has established a cab and carriage stand in front and to their Christopher street station in New York city. The city has been divided into eight districts, with a graded rate list according to distance. Tickets can be purchased of an agent aboard the train. The rates are as follows:

sonable. Either cab or carriage can be secured, the vehicle to be used in the service comprising hansom, coupe or "busses," to seat from one to ten persons.

The first of the new monster cars of eighty thousand pounds capacity (see news on this part of the Jersey Central) came up the line among a trip of dozens of sixty thousand pounds capacity and among the latter looked like a freight car towering above a draft of ordinary coal cars. The huge conveyance will be kept here until the remodeling of the Lehigh and Wilkes-Barre collieries is complete, in the meantime serving as a mode of measurement. Compared to the jimnies, this car is like an elephant to a dog.—Shamokin Dispatch.

AN APPEAL IS TAKEN.
Unless a Settlement Is Reached Argument Will Be Made Today to Justice McCollum for a Superedeas.

As announced in The Tribune, City Solicitor McGlinley was in Philadelphia early yesterday morning. The Supreme court adjourned Tuesday afternoon, but Mr. McGlinley did not learn that until he arrived in the Quaker City. He filed his appeal with the prothonotary and notified his attorney, expecting to appear at 3 o'clock of making an application to him with a view of having the appeal to the supreme court made a superedeas. The arguments will be made at Justice McCollum's home in Montross, and a decision is hoped for in time to guide the members of select council in their actions tonight.

There is a possibility, however, that an amicable arrangement may be reached today by Mr. McGlinley and Mr. Voshburg with reference to the steps preliminary to a quo warranto proceeding.

The proposition of Mr. McGlinley outlined in yesterday's Tribune was submitted to Mr. Voshburg and his attorneys yesterday by ex-Judge Knapp and a long conference was held. Nothing definite was done because several important matters came up that could not be satisfactorily adjusted in the absence of Mr. McGlinley. The latter and Mr. Voshburg will meet today and discuss the matter.

Both realize that quo warranto proceedings must be resorted to, but there are details as to who will hold the office of mayor and the matter of a bond to insure the salary to the man who wins, that must be settled.

If Mr. Voshburg and Mr. McGlinley succeed today in satisfactorily adjusting these matters, the application to make the appeal a superedeas will not be necessary and select council can approve the bond at its meeting tonight.

JAMES MALLA INJURED
His Arm Caught in an Elevator at Dickson Colliery.

James Malla, of Von Storeh avenue, had his arm torn, his shoulder dislocated and his head badly lacerated in the Dickson colliery at Green Ridge yesterday.

Malla was engaged in feeding coal into the elevators when his arm caught in them. The machinery had to be stopped before he could be liberated and then it was found that he had sustained the injuries above noted.

The world's most wonderful aeroplane family, the nine Nelsons, are in the Great Wallace Shows. A billiard of \$10,000 is issued by Mr. Wallace to produce their equis in Europe or America.

Summer Trains on N. Y., O. & W.
Commencing Monday, May 29, the New York, Ontario and Western Railroad company will inaugurate the running of four summer trains on the Scranton Division. Train No. 1, leaving Scranton at 9:55 a. m. and 4:15 p. m., leaving Carlisle at 11:54 a. m. and 5:09 p. m., making through connections with main line trains. Returning, leave Carlisle at 5:14 a. m. and 1:31 p. m., arriving in Scranton at 8:15 a. m. and 4:29 p. m.

Owing to the increase in travel on this company's entire system, which is due to their reduction in fare to two cents per mile it was found necessary to place their summer trains in service much earlier this season than previously. Their Sunday train to Lake Poconette is also being well patronized.

Decorative Day Excursion to Niagara Falls
via Lehigh Valley Railroad.

Rate from Scranton to Niagara Falls and return will be \$6.50. Tickets will be sold good going on train No. 2, May 27, all trains except the Black Diamond Express, May 28, and train No. 3, May 29. Good to return on all trains, except the Black Diamond Express, to and including May 29, 1899. Inquire of Lehigh Valley ticket agents for further particulars.

MAYOR WILL AWAIT
COUNCILS ACTION

GRADE CROSSINGS WERE NOT
TORN UP YESTERDAY.

After Making a Personal Investigation of the Matter, Mayor Moir Decided to Allow Council to Deal with the Matter Before Taking the Extreme Measure He at First Resolved Upon—Company Will Cease Operations Until Council Has Acted.

The tracks of the Ontario and Western company's Keyser Valley branch were not removed from the First ward street crossings yesterday, as was threatened by the city officials.

Mayor Moir and Street Commissioner O'Boyle went up yesterday afternoon to look over the ground, in company with Vice President John B. Kerr, of the Ontario and Western company. They found that the streets in Mr. Moore's ward, which have been crossed by the railroad exist only on the map. The territory is for the most part waste lands with but a few houses on it scattered here and there.

Mr. Kerr explained to the city officials that his company had no intention whatever of disregarding the city's authority in this matter but simply went ahead on the strength of assurances from city officials individually that it would be all right. This and the fact that no objections had been raised to the resolution permitting the company to cross the streets led the mayor to allow the work to go on, after reaching the city limits.

Mr. Kerr promised that no further work would be done until councils have acted on the resolution. The railway committee of select council which has the measure in hand will report on it at tonight's meeting. It is also likely that a resolution will be passed temporarily counteringmanding the order contained in the resolution directing the city officials to stop the laying of grade crossings.

The mayor is not disposed to take any further action at least until after tonight's council meetings.

The railroad is now complete from the Capone colliery in Keyser Valley to Dickson City, excepting a short stretch on each side of West Market street and the trestle across Loggett's creek.
