## DUNMORE DOINGS.

The Graduating Exercises of the High School Held Last Evening Before a Large Gathering of People.

The class of '99 has passed into history. The graduating exercises were conducted in Washington hall last evening and a large assemblage of persons were in attendance. The curtain rose promptly at 8.30 o'clock and disclosed the members of the class upon the stage amid elaborate decorations. In the rear of the stage was the class motto, "Virtute Non Verbis," '99.

Bauer's orchestra opened the evening's programme with a tuneful selection. Miss Margaret Healy, salutatorian, then came forward and extended an invitation of welcome to the public and all interested in the progress of education. Miss Healy took as her subject "Joan of Arc," and dwelt at some length upon the life of the "Maid of She realistically described the burning at the stake and repeated Fressart's last words, "We are all lost;

we have burned a saint." Miss Mary Duffy recited "The Whistling Regiment" and was heartily applauded. Then came a selection, "Song of the Volunteer," by the chorus, followed by an oration by Miss Kitty Horan, who took as her subject "The Dying Century" and said, in part: Every century has its own characteristics, but the nineteenth surpasses all The nineteenth century, which is almost at an end, was one of the brightest and grandest that the world has ever seen

things we like to do are not good for us, but we keep on doing them just the same.

Those who take less advanced ground than the young woman who does not propose to let anyone kiss her may still object to the promiscuous habits of kissing. Just why there is any satisfaction in the touching of the lips is a physiological (and perhaps psychological) mystery which we will not endeavor to solve. Indiscriminate kissing certainly makes this satisfaction less. The kissing of babies, the interchange of kisses among women, the formal kisses of matrimony-these things may well be abolished. It must be remembered that in former times there was an element of solemnity in the kiss. The kiss of peace was an element of every act of Christian worship. A trace of this remains in the familiar benediction, "The peace of God, etc.," and in the eastern church the priests still kiss one another during the recital of the Nicene creed. Kissing the altar is a Catholic practice not entirely unknown in this country. The kissing of the pope's toe is another case in point. High officials at Constanticopie are sometimes permitted to kiss he sultan's toe as a special mark of favor. This, we need hardly add, is a far different kind of kissing than that against which our young reformer is

letermined to take a stand. Perhaps it would be as well she had er way, at least in a measure, and the habit of kissing were to fall into disse except as between lovers or parents and children. A loss of self-respect is involved in kisses lightly given and taken. We do not say that kissing in such circumstances is a grave moral evil; but nice girls will feel that to save their lips for those who have some right to them is the only rule that scrupulous modesty permits. All men are not as particular as Elfride's lover in Mr. Hardy's story, but most of them certainly fail to prize favors lightly won. No law can prevent kissing; but taste and discrimination should govern the practice.
