PROPERTY HOLDERS CAN ES-CAPE PAYMENT.

Owing to the Failure of the City to File Liens Within the Prescribed Period It Stands Responsible for All That the South Side Sewer and Section C. of the Fifth Ward Sewer, Will Cost-Select Council Gives Only Six Votes to the Thomas Nomination.

Under the provision of the city charer regulating municipal improvements, the liens to secure the payment of the assessments must be filed within sixty days from the date of the final ap-proval of the report of viewers, and in ase this is neglected the city is directy liable to the contractor for the whole xpense of the improvement.

At last night's meeting of select ouncil the new city solfcitor, A. A. osburg, disclosed the startling fact that in the case of the \$33,000 South Side sewer, and the \$12,000 Section C, of the Fifth sewer district, no liens have been filed and the sixty day limit has long since expired. Another comnunication was received from City Entineer Phillips, stating that he had stopped work on the Providence sewer. mmediately upon learning of the

rregularity How to deal with the dilemma proved tself a most perplexing question. Colonel Sanderson led in the discussion. His solution of the difficulty was to efer the matter to the city selicitor to ccure from the property holders a waiver of the freegularity. Mr. Schnel-der, of the Eleventh ward, had this same idea embodied in a resolution lealing with the sewer on the South It provided that councils would agree to the change in the specificaions, substituting brick wherever thirty-inch iron pipe was specified, as prayed for the property holders, conlitioned that the original contractors Dunn Bros., would consent, and that the property holders would sign a paper agreeing to pay their assessnents as if the city had not by its neglect mulcted itself for their share as well as its own.

MR. ROSS' RESOLUTION.

Mr. Ross presented a resolution giving Vincent O'Hora, contractor for Section C. of the Fifth Sewer district, authorny to lay the 200 feet of puphe already has on the ground providing that he will agree that this permession will in no way affect the present legal starus of the matter, an I, that in use the property holders will not agree to release the city from the resules of its regicet, the contractor will not come upon the city for the work

Colonel Sanderson's motion, chneider's resolution and Mr. Ross resolution all passed after lengthy and nimated discussions, in which, among other things, reference was made to the power of the city to hold the former city solicitor's bondsmen for the less the city will be put to in case the property holders decline to sign the

TALKING OF FEDERATION.

One of the Questions the Engineers Are Debating.

One of the probable results of the annual sessions of the Lackawanna engineers' general committe, now on in this city, is the amalgamation of all the orders on the system into one body The engineers are the only ones not represented on the federal board. As previously told they are now disposed to join and before the general committee gets through with its presnt sesion it is very likely a resolution will be adopted submitting the question to the subordinate bodies throughout the whole Lackawanna system.

There was a story affont last evenng to the effect that the committee had decided in favor of joining the federated board and that a general conference of the different branches of the service had been called to receive the proposition. The engineers however would not only not confirm this but said that it was impossible because the question of federation would have to be passed upon by the subordinate organizations and submitted to the national officers before the committee ould deal with the other.
