Christian Science Healing as Discussed by Dr. J. C. Bateson Before the Medical Society Last Night.

An Interesting paper on "Christian Science Healing" was read before the Lackawanna County Medical society ast evening by Dr. J. C. Bateson. He treated the subject as a gross

absurdity and characterized the term

# ARE NEGOTIATING WITH MR. FELTZ

D., L. & W. ARE TRYING TO PUT AN END TO THE TROUBLE.

For Years There Has Been a String of Law Suits with That Company Upon One Side and Mr. Feltz Upon the Other-Peculiar Contract Mr. Feltz Has with the Company Ties It Up in Its Operations at the Hol-

It is possible that Isaac Feltz and the Delaware, Lackawanna and Western company will soon come to an amicable understanding over the coal property in Taylor which for many years past has been a bone of contention in the local courts.

Recently the new management of the coal department has been at work try ing to set things right and the pros pect looks favorable. Falling, however, the company in a few months will be compelled to abandon the Holden colliery, located in Feltz patch, North Taylor, and by the terms of a contract the property will go to Fletz.

Feltz some years ago entered into contract with the Delaware, Lackawanna and Western company whereby the latter was enabled to take out all of the coal under a certain piece of land with the exception of that in the Big vein, which is claimed by both the company and Feltz. It was specified that no other coal but that in the tract mentioned should be taken out through the Holden opening, and when that tract was exhausted the breaker should

become his property.

Mr. Feltz has been for years an untiring enemy of W. R. Storrs, who until recently had charge of the Delaware, Lackawanna and Western's coal department, and in consequence it was impossible to do anything with him in the way of a new contract or a modification of the old while Mr. Storrs was at the helm.

ADJOINING COAL LANDS.

The Delaware, Lackawanna and Western company has coal lands ad-joining the Feltz tract that it can mine means of the Holden opening, but the contract with Feltz prohibits this. Feltz also owns some more coal lands that adjoin, the company would like In refuting the doctrine that dis- from the Big vein, which as yet is unto secure and it wants to take the coal touched and is the most profitable vein under the land.

Only a few more months remain be fore the terms of the contract will have been nullified by the working out of the specified veins. Then, if other arrangements in the meantime have not been made the company will have to quit the premises.

Under the old regime there was a constant irritation between Mr. Feltz and the management of the company. The new management has adopted a different policy. Superintendent Loo-Denver only a few years ago cured mis has had a number of conferences recently with Mr. Feltz and there is a strong probability that an arrangement will be arrived at whereby the troubles

Neither can certain coal deposits owned by the company be conveniently reached because Mr. Feltz will not permit them to be reached through his property.

Superintendent Loomis may be able to straighten things out to the satisfaction of Mr. Feltz.

#### EXPERT EXAMINES THE BILLS. From What He Says They Are Just a Trifle High.

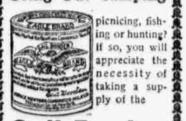

A master painter, who subscribes to the union scale and who is one of the oldest and most reputable business men in Scranton, was called in by City Controller Howell yesterday to pass upon the fence-painting bills sent down from the school board.

The bill for painting No. 14 fence charged up fifty days' labor at \$3 per day and \$48.50 for material, making a total of \$198.50. The controller's expert says that not more than fourteen days should be required in doing the job. and that he would take the contract for \$60 and make money on it. The best wages paid a painter, he says, is

\$2.50 n day. On the bill for painting No. 19 school, charge is made for 280 pounds of paint. The expert says he cannot see how it was possible to put even eighty pounds of paint on the fence in question. How they ever succeeded in getting two hundred and eighty pounds of paint hereon is a marvel to him, he says. Fifty-two days is charged up for painting the fence, forty-four days for the fence at No. 6, and twenty-five days for painting two fire-escapes at No. 14 building.

The expert will also give estimates

#### Catarrh of the Bowels Most Common in Summer

Mrs. George W. Taylor.

George W. Taylor, of Eaton, Co., Tenn., says: "I had had Gibson Co., Tenn., says: "I had had chronic diarrhoea for six years, tried everything I could hear of an had consulted several physicians with-out avail. My husband bought me a bottle of Pe-ru-na and I began to improve at once. I can do anything I ever could, and eat anything without inconvenience; and when I say if it had not been for Pe-ru-na I would now be in my grave, I do not think I exaggerate.

Chronic diarrhoea is nothing else than catarrh of the bowels.
May Belle, a New York stage beauty, says: "Pe-ru-na not only cures catarrhal affections, but if rightly used n time, will protect against them in-fallibly."

The remedy that will cure catarrh in

one location will cure it in all loca-tions, if it be an internal remedy, operating through the system. Pe-ru-na is exactly such a remedy. It is an in-ternal specific for catarrh. Send for free book on catarrh en-titled "Health and Beauty." Sent to women only by Dr. Hartman, Colum-

#### INDUSTRIAL JOTTINGS.

The handsomest remodelled parlor ear turned out of the shop of the Delaware, Lackawanna and Western company, in this city in many years. was sent to Hoboken last night, to be put into service on the main line today. The coach bears the name of 'Morristown," and has been in the repairing shops for two months. ng an old time phrase it has been re modelled from "top to bottom."

The entire outside of the car has been replaced with new material. The interior is a thing of beauty, the decoration work being particularly artistic. The lamps, coat hooks and wall pockets are of oxydized rolled copper. The library of the car will contain one hundred and eighty volumes of the best literature. Car 856, a combination smoker and baggage car, was sent from the shops yesterday and will go into service today on the Cayuga division of the road.

## Rearrangement of Shops.

The rearrangement of three of the shops of the Delaware, Lackawanna and Western company in this city under Master Car Builder Canfield being pushed with all possible speed The former passenger and carpenter shops will be used exclusively as a passenger building shop, and the paint shop will be occupied by the carpen-

The new shop, or "Halligan's," as it is more commonly termed, will be the paint shop of the company, where the major portion of painting will be done. Mr. Canfield after his recent trip to the Utica shops, as was stated in The Tribune, decided to dispense with the painting shops there and have the work done in this city and at

the Dover shops. To the new paint shops an addition is being built, which when completed, will be used for office, storeroom and varnishing purposes. It is expected that the shops referred to will be in shape in about three weeks. When in full working order it is estimated that the force of employes will be able to repair and remodel thirty-five cars a month.

## This and That.

The Brown planing mill on Ash street, which was destroyed by fire several weeks ago, is being rebuilt. R. C. Blackhall, of Albany, superin-

tendent of the motor power and machinery department of the Delaware and Hudson Railread company, is in the city. He is here inspecting ten engines being built for his company by the Dickson locomotive works. It expected that the engines will be ready for shipment the latter part of September.

Several weeks ago Master Car Buildr Canfield, of the Delaware, Lackawanna and Western car shops, placed an order for a big list of modern and much needed machinery for the saw mill of the car shops. On Saturday a mammoth morticer and a large plane reached the city and were put in operation yesterday. The old plane could be used on but one part of a piece of timber at one time, while the new one gives due attention to the sides, top and bottom of a board simultaneously, The morticer is also a great labor saving machine.
