OVER 6,000,000 BOXES SOLD YEARLY.

There is a reason for everything, and the reason for the popularity of Beecham's Fills is, that they fill all the requirements of a general antidote for ALL BILIOUS AND NERVOUS DISORDERS in a more satisfactory manner than any proprietary medicine ever placed before the public. Beecham's Fills are brought before your notice, and, whether you require them or not-if not today, you may tomorrow—when the mecessity prises you should, in your own interest, take them. The reason for their need is often best known to yourself, but be that as it may, you will show good judgment by taking them in reasonable doses, and doing so is as simple as A B C

The enormous sale of Beecham's Pills has been achieved without the publication of testimonials, the fact being that Beecham's Pills recommend themselves. Sold everywhere, in boxes, to cents and 25 cents each.

FUNERAL OF MR. M'DONALD.

The funeral of Michael McDonald was held yesterday morning, interment being made in St. Rose cometery, The procession left the home at 9.50. The services were largely attended.

A number of out of town people were present. The Catholic Mutual Benevolent association attended in a body. The following were selected from the society as pall-bearers: John Boylan, Joseph Brennan, Thomas Nealon, James Boylan, James Gorman, Alexander McDonald and Michact Kelly.

Rev. W. A. Nealon held the services at the church over the remains and gave an eloquent sermon, taking for his text the words of Solomon, "Vanity, vanity, all is vanity."

OPEN AIR CONCERT.

The open air concert given last evening on South Main street by the Mo-zart band at the instance of the Amaranth Social club was a very enjoyable affair and attracted thousands of persons to the scene. The band was never in better form and local lovers of music grow prouder of the organization every day.

FRESH AIR CHILDREN.

Twenty-seven children from the tenement district of New York arrived here yesterday afternoon and will be entertained by hospitable persons of this vicinity. Nincteen came with them and went through to Thompson. The local committee which had charge of the work is composed of Messrs, M. D. Lathrope, A. S. Lewsley and N. F. Stephens. The city pastors have also given valuable assistance in the work, The children will remain here for two weeks.

LOCAL AND PERSONAL.

Mrs. Margaretta Smith, who has been visiting Mrs. W. W. Copeland in this city, will return to Nineveh. N. Y., today.

Mr. and Mrs. S. F. Carpenter are sojourning in New York city. Editor Reilly, of the News, is in New York.

Wilson Geary is in Pittsburg, J. E. Watt and family are sojourning at Asbury Park.

Charles Shores, formerly of the Binghamton Republican, has been addsive reading, Matthew vil, 26:28; aded to the Leader's staff. Mrs. L. A. Bassett and sons spent

HALLSTEAD.

Thursday afternoon from 3 o'clock until 6, Mr. and Mrs. D. Arthur Teed held a thimble party at their home on Du Bois mountain. The large, spacious and attractive studio of the artist was tastely arranged for the affair. A large number of guests were in attendance from all sections of the two twin horoughs. A visit to Mr. Teeds' mountain Farmers' Industial Union, in a recent letter to Dr. Hartman says: "I have studio with its quaint surroundings used Pe-ru-na as a family medicine for several years. I find it of especial use and castle like architecture cannot but recall to the memory the times so for myself. I have had several tedious spells with systemic catarrh and be-fore using Pe-ru-na I had tried several charmingly described in Scott's vanhoe. Hon. James T. Du Bois left on Friday morning for a weeks' business trip to Washington, D. C., where he has other remedies with little or no suc-cess. But in Pe-ru-na I found a prompt me important business to transact and sure cure. I always keep the remedy which promptly relieves any relative to his office as consul general to Switzerland. "My wife also uses Pe-ru-na. She finds it of especial use for severe

pointed in that capacity: F. D. Bunnell, Meshoppen, for one year; E. L. Day, Nicholson borough, for two years and D. W. Stark, of Tunkhannock borough, for three years. No tax can be levied until next year and the The board will probably take no action until that time.

The Tunkhannock Electric Light Heat and Power company has gone out of existence. They were unable to get their plant on a paying basis and when they failed to pay the interest on their bonded indebtedness the bondholders foreclosed their mortgage. At the sheriff's sale the property was sold to John B. Russell of Wilkes-Barre, and Henry M. Ives, of Dalton, who had bought the interests of the other bondholders. These gen tlemen, together with Grant Pelton S. W. Eysenbach and W. E. Little. now intend to make application to the governor for a charter of incorporation for the Tunkhannock Electric company. They intend to make the plant pay, if possible, and to that end they have had Superintendent Nicholson. of the Carbondale plant, here looking over the plant and putting it in shape

to give good service. They have also

and Central New York railway, Democratic Chairman A. H. Squier has issued a call for a county convention to be held at the court house in Tunkhannock borough on Monday. Aug. 21 at 2 p. m. The primaries of the various districts will be held th Saturday previous.

Superintendent Nicholson, th Carbondale Electric Light Plant, which is owned by the same parties who are now operating the Tunkhannock plant, was in Tunkhannock on Wednesday looking over the lines. It is the intention of the company to put meters on all the lines for house lighting and do away with the contract rates entirely. Under the present system, it is claimed that there is no uniformity of price, some people paying more for their lighting than they ought and others not enough. It is proposed

by the meter system to equalize matters and make consumers pay for what they use. The charge will be eighttenths of a cent per hour for a 16-candle power light. Mr. Nicholson had several meters with him and with the Assistance of Lineman Porter placed them in several of the business places. The company will give the entire charge of the plant to Mr. Nicholion and he will visit it about two or three times a month.

Daniel Stevens is now enjoying his ten days' vacation in the vicinity of the home of his youth near Wyalus- I ing in these high latitudes could ha

try conclusions with nature under the eral department of agriculture, that conditions ordinarily prevailing in Alaska is an agriculturists' paradise, that climate. Until it shall have been It is represented that the coast regions shown that profitable agriculture is produce in a wild state an abundance possible there through a succession of of small fruit, such as strawberries, years, with the facilities and abilities currents and cranberries, and that in competition with producers living in grasses and other fodder plants grow more favored climes, Alaska cannot be in the lowlands of the Yukon, and regarded in the light of a farmer's even further north, with tropical luxparadise. The trend of migration dururiance during the short but hot suming the whole period of the known hisner; and this indicates the practicatory of mankind has been from the bility of raising sheep, goats and other rigorous North to the temperate and herbivorous domestic animals. It is more southern regions. This phenowell known that the tundra of Northmenon has almost attained the dignity ern Alaska is well adapted to the needs of a law. Even Canada sends mora of the reindeer, that hardy guadruped people annually to the adjacent United which is cow, heifer and horse all in States than can be induced to immione for the inhabitants of the extreme grate into that country by the free ofnorth of Europe and Asia. That the fer of acres quite as fertile as any that soil of the valleys of interior Alaska can be bought for money within the as well as of the coasts and island is domains of this republic. It is not extremely fertile would appear from very likely that the natural drift of the astonishing rapidity with which it human migration will be reversed in s covered with a teeming vegetation favor of Alaska; and after the gold after the melting of the winter's fever shall have subsided, and the snows. Leaves, flowers and fruit folmineral resources of the country exow in quick succession, nature's efplotted, our northern possession will forts being seemingly directed to the revert, as Nevada is reverting, into its hurrying of the ripening in order that original condition of an uninhabited seeds may be produced before the nipsolitude. ping frosts of the early autumn. The country is practically without decid-uous trees; but its tail wild grasses are said to be equal in succulency and visor to any that can be found on our

When . They Are Riled They Can Fight Like Fiends.

'rom Leslie's Weekly.

The men are noble specimens, phyhe establishment in various parts thereof of agricultural experiment stasically-tall, muscular, with creet carions. The island of Kadiak has been riage and elastic step of an Amorican Indian. They, too, are smilling and selected for the location of the initial station, and being in the same latitude kindly -time of peace-and are clad as Norway and parts of Scotland, and in mantles of the gay prints which they have bought at the store; they greet enjoying almost the same temperaare, it is confidently expected that you with a wave of the hand and a barley, oats and other hardy courteous "Alofa." They tattoo the legs from the waist to the knee, and cereals can be grown there with reasonable success, Indeed, barley had as they stride along these members been grown experimentally at Port appear between the folds of their Yukon, almost directly under the Arcdraper as if they were decently clothed le circle in the interior of Alaska, and In skin-tight trouters, They are indothe grain has matured, although the lent, and, when not roused to hostility. as amiable and fun-loving as children. stiaw was short. The climate of Kadiak island-and, indeed, of the whole They work as little as is possible, and Alaskan archipelago including even why should they? The forest abounds in wild bananas, bread-fruit and yams, which may be had for the taking; the the Aleution chain-is believed not to be too rigorous for sheep; and the intention of the department of agriculsea is full of fish which they are exture is to show that cattle can subpert in catching, and if Providence sist, and be kept fat all the year 'round deigns to send them a fattened pig without much care, on many of those once or twice a year they are blessed slands, while only in the more north-Clothing they do not require, nor fuel; eriy of them would shelter be required their taxes are only nominal, and they are consequently exempt from the chief for the animals during two or three demands of life, and which, but for the expense and difficulty of getting buried, But, after all, the evidence cited to make it far easier for the average American to die than to hee.

But these gentle greatures can fight, and Acht cuelly, although their method. of warfare is peculiar; they can and lands in which the climate is far more drink between rounds, when a sort of truce is declared, then go at it again, The oast of Greenland is covered with shoot at short range and shout to kill. rich verdure in patches during the Pormerly, until the practices was aboltrief visits of the summer's sun. Ev ished by Chief Justice Ide, the killing plorer Peary saw the banks of the was followed by the behending and small watercourses near Independence this ceremony was not always deferred, bay all aglow with poppies, over whose where the victim had been only woundbright petals butterflies hovered while ed, until life was extinct. The heads feeding on the nectar distilled by the were then collected and presented to flowers. In British America agriculthe king as an especial proof of tural experiment stations have been rowess. This barbarous practice the maintained for many years at the fur chief justice had the utmost difficulty trading posts, and even wheat has ripin dealing with, and it was not disconened under the care of scientific extinued until the other representatives perts within the Arctic circle on the of the triple protectorate consented to Mackenzie river. Such successes of enact a law to punish offenders by experimenting scientists in agriculfining them heavily, and adding to this ture, however, do not prove that farmpenalty a lengthy term of imprisonmant

show the fertility of Alaska is not so strong as to encourage with wild hones of the agricultural possibilities of the country. Luxuriant crops of wild grasses are not uncommon even in

months of severe winter weather.
