#### SECRETARY ROOT NOW AT THE HELM

BECOMING FAMILIAR WITH DETAILS OF THE OFFICE.

By Far the Most Important Military Inquiry Is in Regard to the Situation in the Philippines--Conference With General Miles and General Merritt-Glance at Porto Rico.

Washington, Aug. 13. - Secretary Root is beginning to get a firm grasp on the administration of the war department. He has been at the head of affairs only ten days, yet this has been sufficient to show the methods and influence which his vigorous personality exerts throughout the military establishment. At the outset Mr. Root set about familiarizing himself with the more important details of the department, much as a lawyer first prepares his statement of facts as a basis for legal analysi From Adjutant General Corbin he secured data showing at a glance a broad outline of the army in the field. From the quartermaster general he learned the number of transports, their capacity and readiness to carry troops and the exact status of stores, clothing and equip-ment, particularly as to General Otis' forces in front of the enemy. Of the ommissary general he asked just how many rations were in actual stock at Manila, how long this supply would last, how quickly it could be replenished and whether there was ample margin for every emergency. The same information has been drawn as to ordnance, medical and hospital supplies, engineering and signal equipments. Each bureau officer submitted a succinct tabulated statement, and this was supplemented by a personal talk with the secretary. Not only the officials here, but those at Manila and Hayana have been consulted by cable whenever it has been necessary to add to the completeness of the information at hand here. In this way Mr. Root has speedily brought himself into touch with every branch of the military service and has gathered a most complete and analyzed knowledge of military affairs. While getting in hand this administrative machinery Mr. Root has at the same time made a careful inquiry into the military situation in

By far the most important military Inquiry he is pursuing is as to the exact fluctuations of the insurrection in the Philippines since the day it began. For that purpose a military map is now being prepared by the adjutant gencral's office for the private use of the secretary, showing the advance of our forces from day to day throughout General Otis' campaign, the position and movements on different occasions, the retreat of the enemy and its position and force from time to time. It will be a bird's-eye view of the theatre of military operations throughout the insurrection. Dates will be written in to show the position of the army as the campaign proceeded and as far as possible it will convey to the eye an idea of the scope of the military operations in the Philippines up to date. The preparation of this map has been put charge of Major Simpson, chief of the bureau of military information, who has been giving his undivided attention to making it complete and com-

### Conference with Miles.

While going over the military phases of the work the secretary has conferred ters of farmers of this t with the commanding general, General drowned today while bathing

hereafter to be called

to west.

Miles, and with General Merritt, who is second in command, on the military problems presented, and beside the military results of these consultations it has established co-operation between the executive head of the war department and the ranking officers of the army.

Meanwhile, the secretary has announced no far-reaching policies. He rocceds slowly while the facts, on which policies rest, are being assembled. If there has been some loose and rather careless statements as to the proposed policy, they have probably en as much a surprise to him as to the public. So, too, the reports set affoat before he entered office that he would confine his attention to Cuban affairs, leaving the Philippines to "the military authorities," have not been borne out, but on the contrary, the military exigencies in the Philippines have been the subject of his most earn-

est solicitude. Concerning Cubs and Porto Rico the detailed administration of these affairs with its multitude of minor issues is being largely left with his assistants and chiefs and he is concerning himself with the larger questions of the reconstruction and future of these islands and with the substitution of orderly civil government for the milltary regime now in force. When former Premier Rivera urged yesterday that an order be speedily issued for municipal elections in Porto Rico, the secretary replied that he hoped these elections would occur as soon as the present unhappy storm swept condition the island would permit. When was suggested that the desolation in Porto Rico made opportune a remission of duties on articles of prime necessity, the secretary said he was alady conferring with General Davis, governor general of the island, as to

Mr. Root has little time for the crowd f callers with small requests. He is laborious and methodical worker. When there was some surprise at his remaining at his desk until 7 o'clock Thursday evening, three hours after the building was deserted, he explained that it was his habit to concentrate his attention on important work from 10 in the morning until 11 at night, usually without the distration of meals. He has been making his studies at home during most of the venings since he has been here. secretary is quite reserved to callers, listening and inquiring rather than His cabinet associates speak of his calm and deliberate manner and his ready perception of affairs.

#### ST. JOHN INDIGNANT.

Story of His Criticism of General Otis Was Without Foundation.

Banff, N. W. T., Aug. 13.—The friends of Senator Beveridge, of Indiana, who is taking the waters in the Candian National park, are crowding him with despatches of inquiry concerning his health, to all of which the senator has answered that he is well.

Lieutenant Commander Percy St. John, of her majesty's ship Peacock, is also here and can scarcely contain himself with indignation on account of his reputed criticism of General Otis and the Filipino campaign. Amercan papers to hand containing the reported interviews at Victoria have made the commander furious. He denies the correctness of his interviews and has, through his attorneys, demanded to be set right.

## THE MARKETS.

Wall Street Review. New York, Aug. 12.-Today's stock narket started lower on foreign adto the future of the money market. The local bars fostered the depression and trying to make capital of the situation in France and predicting a southwestern freight rate war. The bank statement, however, change! the tone of the market and the close showed net gains in the more active stocks.

In the early dealings the Grangers and high priced specialties were the principal sufferers. Sugar, Brooklyn Transit, People's Gas and American Steel and Wire declined about a point each. The bears were disposed to to cover at the decline and prices rallied rather quickly, but remained be-low last night's level. The duliness and hardness of the market which suceceded continued until the bank statement made its appearance on the tape, key, \$1.26; sugars, unchanged. when the market immediately burst into great animation and developed a surprisingly buoyant tone at some points. The stocks which had yielded most easily in the early trading came back most readily and as a rule show the best net gains of the day. The bid up prices on themselves. Chicago and Great Western debentures soured upwards by successive jumps, selling at 1031/2 at last, 51/4 above the lowest and 4% net advance. Tennessee Coal also made a very vigorous advance to 86, a net gain of 314. The closing of the market was active and firm at about the top. Total sales, 201,400

### How Cloves Are Gathered.

More cloves are said to be used in America than in any other country, England and France following in the order named. In this country and in Great Britain they are used almost wholly as a condiment, but in France they are used largely in the manufacture of certain liquors. To some degree they are employed in medicine

for their tonic properties. The name clove is from the French clou, meaning a nail. The tree is an evergreen, growing from forty to fifty foot high, with large oblong leaves and crimson flowers at the end of small branches in clusters of from ten to twenty. The tree belongs to the same family as the guava, the pomegranite and the rose apple. The cloves are at first white, then light green, and at the time of gathering bright red. Pieces of white cloth are apread under the trees at harvesting time, and the branches are beaten gently with bamboo sticks until the cloves drop. They are dried in the sun, being tossed about daily until they attain the rich dark color which

proclaims them ready for shipment.

A clove tree begins to bear at the easy with wheat but developed subsequent firmness on covering and big weekly clearances; closed steady at unchanged prices; May closed 35c.; September closed 35d.c.; December closed 35d.c.; September closed 35d.c.; December closed 35d.c.; Oats—Spot steady; No. 2, 27c.; No. 3, 28d.c.; No. 2, 28d.c.; No. 2, 28d.c.; Track white, 27 white, 25d.c.; Irack white, 27 alber; options neglected.
