"They Call My Darling Jane"

For sale just one week and over 500 copies gone.

How do you like the chorus:

Oh they call my daring Jane. It's a plain, old-fashioned name, That pernaps don't quite suit A maiden so cute it's a fairly good name, all the same. Darling Jane! I call her Sweet Repose; She's as protty as a ross. She's an old miner's girt. Ah! my brain's in a whirl. For I love her, that every one knows.

DR. HARRIS IN PENN AVENUE CHURCH

DELIVERED THE SERMON AT THE EVENING SERVICE.

He Made an Appeal for a More General Interest in the Simple Truths of the Gospel-The World Needs Salvation, There Are Always Men That Need Christ-The Doctrine of Salvation Should Be Carried to Every Man, Woman and Child in

The Rev. John H. Harris, LL.D. president of the Bucknell university. preached a very able sermon last even ing in the Penn avenue Baptist church He took as his text Psalms 126.6: "He that goeth forth and weepeth bearing precious fruit shall doubtless come again with rejoicing bringing his sheaves with him."

The doctor delivered a simple and arnest appeal, based upon the words of the text, for a more general interest in the simple truths of the gospel. He said in part:

"Let us take the words of this text to our hearts and profit thereby. Some say we need salvation; others say we want salvation. There is a vast dif-ference between need and want. The d needs salvation, there are men here tenight who need salvation. There re always men that need Christ,

"But the world doesn't want salvation, not at all. But the decirine of salvation should be carried into the corkshop; It should be brought to the man in the harvest field; it should be carried to every man, woman and child in all the world.

MORMON'S WAY OF PREACHING

"We should profit by the example of some of the other religious sects. Take the Mormons for instance. They are going about the city of Chicago at the present time in pairs, visiting every home, and talking to everybody that will listen, talking the doctrine of Mormonism. This is the right way; not the Mormon's doctrine but his way of reaching ft

'Let us be 'button-holers' and let not leave go of a man until we have convinced him of the truth of God's word. It is not the preaching, not the choir singing, not the novel character of the preacher himself that is the essential thing in winning souls Christ. It is the individual work hat counts. There must be an indivdual forth-going if victory is desired. "And it must be a purp-soful forthng. Paul did not go about like s man beating air, but there is a great scal of this kind of preaching at the present time. There must be something definite in view and that definite something should be to work for Christ and "The duty of the minister is not to

his gospel. argue or debate. Ministers should not proclaim error or spend valuable time in refuting Herbert Spencer from the pulpit, but should use their best efforts in proclaiming the glad tidings of salvation. The purpose should always be that the one thing men need above all else is salvation.

ACCOMPANIES THE WORD.

"The Holy Spirit accompanies the word of God. We ministers of the gospel do not preach in our own strength but in the strength of God.

"The church is not always on the top of the billow, the ebb and flow of the tide must be taken into consideration. The progress is not always in an ascending line, sometimes it is what might be termed spiral and sometimes wilex, but there is always a going and a persistent going.

"If we keep going forth and weeping, there is a certainty of homecoming. The philosophy of today is ever changing, today you think you have mastered and tomorrow it changes. There is also a continual change in theology, but theology is only man's thoughts on religion. But the doctrine of salvation never changes. It is not philosophy, nor theology, but the simple truth that God came into the world and died for men and that all He asks is repentance.

"Let us all go forth and teach the word in the Sunday school, to our neighbors and in our home, and there will be no need to worry for the glorious result, as it is sure to come,

VICIOUS ASSAULT AND BOLD ROBBERY

FATHER AND SON ATTACKED BY FIVE COLORED MEN.

Affair Took Place in the Early Evening on Linden Street Bridge-Citizens Who Found the Wounded Victims Trail the Assailants and Put the Police on Their Track-Four Are Arrested After a Livery Fight but One Escapes.

A murderous assault and highway obbery was committed upon two men bout 7.30 o'clock fast evening on the Linden street bridge by a gang of col-ored toughs. Four of the latter were placed under arrest, but one of them broke away from the officer holding him and escaped after a hot pursuit. Joseph Cross, of 418 Wright's court, formerly that of Company B, Thirteenth regiment, and his son. Joseph Cross, jr., were the vicitims. They were crossing the bridge just as darkness was setting in. The young man was riding his bleyele slowly along the readway and his father was walking on the sidewalk talking to him. The bridge was descried, except for a party f colored men, who were coming in he opposite direction.

When the latter reached Cross and ils son, according to the latter's story, hey sprang at them without warning. Two had scaled the iron ralling separating the two parts of the bridge and these knocked young ('ross off his The father in the meantime was taken in hand by the rest of the party and felled to the ground,

Two men had come up by this time and they followed them to 320 Ray mond court. The men then started or Penn avenue, where they found Patrobnan Steve Dyer on duty. He recompanied them, and, meeting Patrolman Potter, who was off duty, at the corner of Penn avenue and Linden street, took him with him.

assault, where they found Patrolmar Saul, who had arrived from West Scranton. The two injured men had by this time been assisted home. Th three officers, accompanied by several citizens and the men who had followed the gang, went direct to 320 Ray mond court, where the crowd was found sitting outside.

There were five altogether and Offiers Dyer and Saul each grabbed one and Officer Potter two. The men fought savagely, and the fifth man was "lost in the shuffle." A start was made for the Centre street station house, Officer Dyer and prisoner ahead, with Officer Potter and his two charges following and Officer Saul bringing up the rear.

FOUGHT WITH OFFICERS. When the corner of Penn avenue and Linden street was reached, the wife of Smith, one of the two held by Patrolman Potter, rushed out, threw her to escape. Instantly taking the advice, he jerked forward, the other man hold ing back. He finally broke loose and tan at full speed down Penn avenue.

Potter turned his other prisoner over to Saul and started in pursuit, accompanied by two or three citizens. When the Penn Avenue Baptist church was reached Smith ran around the lower side with Potter and one of the men close at his heels. The latter drew his revolver and fired one shot, but it evidently did not take effect, as it did not impede the fugitive

He squirmed through a pile of boxes Cossini was a single man and was in the rear and before it was realized by Potter or any one else be had run out the other side of the lot and up Penn avenue. He was followed and was seen to turn up Mulberry street, but he apparently "vanished into thin air" at this point as all sight of him was lost.

ELABORATE ELECTRIC MACHINE

Has Just Been Placed in the Lackawanna Hospital.

One of the finest static electric mahines ever made in this country has been purchased by the Lackawanna hospital from Electrician P. T. Collins, of Lackawanna avenue. The machine embodies a number of entirely new cutures which are the invention of Mr. Collins and upon which he says he has labored for almost ten years. It was made for him by the Waite & Bartlett Manufacturing company, of New York

The machine is very large, being six feet high and six feet wide. It has a voltage of 220,000 volts and when in peration a spark as long as eighteen inches can be produced between the

Electricity is becoming more and more popular every day as a curative igent, and the Lackawanna hospital will now be able to offer as complete course of electrical treatment as can be found in the country. In addition to the other appliances there is an X-ray attachment comprising all the latest improvements in this line of work. The quality of light produced n the Crooke's tube by this machine is pronounced by experts to be the clearest ever seen. During a private experiment last Saturday, the doctors vere enable a to see through a flourescent screen the pulsating heart, of the peron placed in front of the rays.

The most unique feature, however, is the electrical bath apparatus. A low stand with glass legs is brought out and upon this the patient stands. A brass distributor is suspended over his head and the stand and this distribufor are then electrified. The effecs truly marvelous. The patient's halr instantly stands on end and spanks can be drawn from the air within a foot of the patient's body by simply placing the hand within the electrified This bath is useful in neryous debility, neurasthenia and rheu-

matism of old standing. There are also appliances for giving carious other kind of special treatment, the larger portion of which are This city has been badly in need of such a machine for some time, especially the X-ray part.

A dozen or more of them were stunned by the blow and knocked down. One man, who was standing very near where the bolt struck, had his clothes burned a little. He was all right in a few minutes, and went about his work. About quitting time he put his hand in his pocket to look at his watch, and much to his surprise, found his pocket empty and the bottom of it torn out. He went back to where he fell when the lightning struck and found a rough chunk of silver, all that remained of his watch. The heat from the lightning had evidently melted it, and i
