THE MARKETS.

Wall Street Review. New York, Aug. 28.—There was a marked falling off in interest in railroad stocks today compared with that prevailing last week. Interest shifted into the industrial specialties and a number of those marked up in a feverish and irregular manner. The general list was maintained with difficulty and a slight flurry in call money in the last hour carried prices, with a few exceptions, below last night's level. In the final handling movement on covering by shorts some of the specialties and a few obscure railroad stocks rose anew to the top level. This made the closing of the market firm in tone, but the major part of the day was one of losses. An influential factor in the hesitating and doubtful tone of speculation was the renewed anxiety over the money market outlook, caused by Saturday's bank statement. Call money was quoted at 1/2 per cent. all day and was marked above that in the last hour, possibly not without manipulation. But the fact remains that the present low stage of surplus reserves of the New York clearing houses banks finance the financial world keenly and in a somewhat uneasy frame of mind. Profession of confidence that the west is amply provided with funds to finance the coming crop movement without calling on New York do not altogether avail in fact of the condition of the local banks. Neither does the suggestion that the local trust companies have large available funds which do not figure in clearing house banking reserves, although both of these explanations have undoubted force. The buying for London account which has served to sustain some stocks recently was missed. There was upward movements of importance today in the Tobacco stocks, Manhattan, Metropolitan, Street Railway, Sugar and some of the Iron and Steel stocks, the latter owing to the influence of a declaration of the Erie and the Republic Steel preferred of 1 1/2 per cent. called quarterly. American Express jumped 10 points over Saturday's price. On the other hand, there was weakness in International Paper, Colorado Fuel, Colorado Fuel and Transportation, Colorado Fuel and Transportation, Tennessee Coal and Iron, and other specialties. In the railway list the only stocks to show any marked demand were Southern Railway preferred and Kansas and Texas preferred. The Chicago Great Western issues showed wide changes, but the market was generally steady.
