THE MARKETS.

Wall Street Review.

New York, Sept. 28.—The market for securities today was a small and tame affair by contrast with the violent fluctuations of the earlier period of the money stringency. The rate for call money vibrated between 12 and 14 per cent, during the period of active derand, but after that was satisfactory fell by grick stages to 3 per cent. To reeds of torrowers over the three er suing holidays was satisfied in large part yesterday in anticipation of pressure for accommodation today and consequently today's higher rate did not reach within 6 per cent, of yesterday's. The bank statement was unfavorable beyond all expressed anticipation. Although the outgo to the sub-treasury was reduced to \$1,196,000, four days of business, the losses of cash to the interior brought the total reduction in the reserve up to \$4,545,000. The total dealings fell to the level of the midsummer period of duliness. Total sales, 230,200,

Dealings in bonds were on a small scale and price changes were mixed. Total sales par value, \$1,325,600. United States new 4s declined 1/4 t

the hid price. The elimination of two days from the bus.; ess week and the prospect of duitress next week, consequent upon the yacht races, accentuated the spaculative stagnation which follows a period of unusual activity in the stock market and limited the transactions of the last four days.
