

TWO SENATORS' TESTIMONY.

Tell What They Know of Catarrh and Pe-ru-na

HON. EDWARD DWYER. [Senator 17th District, Chicago, Ill.]

Hon. Edward Dwyer, State Senator, Seventeenth Senatorial District, Chicago, Ill., writes: "Pe-ru-na cures when all other remedies fail. I can heartily recommend Pe-ru-na as a catarrh remedy. It has been two years since I was cured, and I consider my cure permanent. I took the remedy for two months and am now entirely cured. I applied to several doctors, but they were not able to cure me. I tried many remedies without avail. My catarrh was located chiefly in the head. I was afflicted with catarrh for seven years. Pe-ru-na cures catarrh wherever located. Who is it that says Pe-ru-na cures? Doctors say it, lawyers say it, preachers say it, a vast army of men and women say it who have tried it. The old and the young say it. They say it in the north and the south.

HON. PORTER JOHNSON. [Senator 4th District, City of Chicago, Ill.]

"I took the remedy for fifteen weeks and am now entirely cured. It has been a year and a half since I was cured, and I consider my cure durable. I was afflicted with the catarrh for five years. My catarrh was chiefly located in the stomach." Send to The Pe-ru-na Medicine Company, Columbus, Oo., for Dr. Hartman's latest free book on chronic catarrh, la grippe, etc.

SESSIONS ARE LARGELY ATTENDED COUNTY INSTITUTE THIS YEAR IS VERY SUCCESSFUL.

Dr. Mowry Spoke on "Civil Government" and the "Great Northwest" Yesterday and Miss McCloskey Continued Her Instructions—First Appearance of Dr. S. C. Schmuicker, Who Talked on Nature Study. Well Attended Lecture by Dr. Mowry in the Evening at High School.

The second day's session of the teachers' county institute held yesterday were as well attended as were the first day's and in addition a number of the city teachers attended in the afternoon including Professor Grant and Superintendent Howell. The lectures given yesterday were probably more interesting than on the first day, there being a greater variety of subjects covered. Dr. Mowry and Miss McCloskey continued their lectures and the new speakers were Dr. S. C. Schmuicker and Rev. Elkannah Hulley. Each speaker is limited to a certain period of time and no matter at what point in his remarks he may be the clang of Superintendent Taylor's hand bell is heard and he is obliged to close abruptly.

The morning exercises were opened by Professor John T. Watkins, who began a series of short instructions in voice culture and methods of teaching singing to be given at the opening of each session. He paid special attention to breathing exercises and their value in the mastering of the vocal art.

LECTURE ON CIVIL GOVERNMENT Dr. Mowry then spoke on "Civil Government and How to Teach It." The doctor is probably the most popular speaker of the institute, his broad, ruddy face, over which a singularly jovial expression is constantly playing, has a wonderful effect in keeping his audience in good humor.

He opened his remarks with a reference to John Calvin's famous declaration, "Every man should be an equality before God." He stated that this was the doctrine espoused by the Puritans who brought Anglo-Saxon civilization to this country and that our present liberties are due in a large measure to this. He said that absolute monarchy is the worst form of government that the world has ever known and that the whole successful history of this country lies in its splendid system of public education.

He told of the gradual evolution of the free schools from their founding in 1639 to the present time and said that they were the products of and are sustained by the government. It is no wonder then that the government should be one of the principal studies taught. He said he believed the four advantages to be derived from the teaching of this subject are: It makes good citizens; it prepares them for business; it tells them how to get on in society; and, fourthly, and principally, instills patriotism in them.

He told of the aids to the study, all which would tend to make it interesting. He dwelt especially on the newspapers and the Congressional Record, telling how a careful perusal of these vastly increased the pupil's knowledge. In the course of his remarks Dr. Mowry happened to mention the alphabetical system of reading and what a poor one it was. He was politely told by Superintendent Taylor that his ideas on this subject were not in harmony with the trend of educational thought in this country. Dr. Mowry accordingly spoke no more along this line.

INSTITUTE DIVIDED. The institute at this point divided into two sections, the primary teachers retiring to court room No. 2, where Miss McCloskey spoke on "Primary Reading," emphasizing the necessity of having the children understand what they were reading instead of having them lapse into a sing-song method.

In the main court room Rev. Elkannah Hulley, principal of the Keystone academy, spoke on "English Grammar" in place of A. B. Dunning of this city, who was to have delivered a lecture on "Teaching Local Geography," but who was unable to be present on account of an enforced absence from the city. He will speak on the topic this morning, however. Rev. Mr. Hulley told of the absolute necessity of the successful man in all walks of life being a good grammarian. He referred especially to the queer and wonderfully wrought business letters written by modern business men and ventured the statement that the business man who is a good grammarian is the successful one. In the course of his remarks he referred to the agitation against the seating in congress of Brigham H. Roberts, and said he had written to Congressman

Cannell asking him to use his influence in preventing his seating and that he had received a favorable reply.

The next speaker was Dr. S. C. Schmuicker, professor of biology in the West Chester Normal school, who spoke on the topic "Gathering Sunshine." Dr. Schmuicker is an exceedingly young man and his lectures are especially entertaining on account of the way in which he delivers them. His gesticulations are both peculiar and amusing. In fact, he seems like a great big boy who is waiting enthusiastically on some subject to some of his boy companions.

USE NATURAL MATERIAL. He said that the best manner of gathering sunshine was to get out and get the children out in the air with nature. He warned the teachers to never attempt giving a nature lesson without having natural material to illustrate it. He told of many peculiarities in the vegetable kingdom and in the world of animals and plants. He suggested the use of pictures or representations of the Greek sculptors of the stories of mythology and by this means not only teaching mythology itself, but also cultivating a love for art in the pupil.

A quartet of young ladies from the Dunmore high school, comprising Misses Ludwig, Collins, and Gilligan, then sang a selection in a clever manner and were obliged to respond to an encore. They were followed by Dr. Mowry, who delivered his second historical lecture, taking as his subject "The North American Territory."

His remarks dwelt especially on the treaty of 1763 and the wonderful territory of the northwest which we obtained by it. He referred in passing to the Revolutionary war and told how in that struggle the majority of the people of England were in sympathy with this country.

DR. SCHMUICKER'S TALK. The last speaker of the afternoon was Dr. Schmuicker, who spoke entertainingly on "Needless Fears." He spoke of the peculiar but nevertheless universal aversion held by human beings for things which are in themselves perfectly harmless. He told of the popular fear of eating mushrooms for fear of being poisoned and stated that out of about eight hundred varieties of this plant there are only three which are poisonous.

He told of the popular fear of insects like the dragon fly and the idea that the insect is certainly making for that particular person's face when in reality it has no such intention. He spoke of the great disgust manifested for the common toad and of the popular superstition that a touch of one will give a person warts.

After the teachers had shown nervous unstrung Superintendent Taylor kindly rang his bell announcing the time limit.

He told of the popular fear of eating mushrooms for fear of being poisoned and stated that out of about eight hundred varieties of this plant there are only three which are poisonous.

there were only two poisonous snakes north of Mason and Dixon line and they are the copperhead and the rattlesnake.

At today's session the courses being delivered by Miss McCloskey, Dr. Mowry and Dr. Schmuicker will be continued. Tomorrow Dr. Schaeffer, state superintendent of schools, will be present and will give two lectures. He will also speak on Thursday.

THE EVENING LECTURE. Last evening Dr. Mowry delivered one of his famous lectures in the high school auditorium, taking as his theme, "Napoleon's Eastern, 1803 and What Came of It." The doctor was in the best humor and kept his audience interested from beginning to end.

His lecture was the story of how the boundaries of this country were pushed westward from the Mississippi to the Rocky Mountains and how in 1803 a territory larger than Germany, France, Spain and Italy became ours. He described how in 1803 that Napoleon, the little corporal from Corsica, had been elected first consul of France, and how he entered into a secret treaty with Spain by which the latter country ceded to France the vast tract west of the Mississippi river.

He told how when these negotiations were in progress that Spain closed the port of New Orleans which had been opened to American commerce as a port of deposit. This caused the producers in the south to form a plan for the capture of New Orleans by force of arms but this was stopped by President Jefferson sending a commissioner to France for the purpose of purchasing the port for this government.

Dr. Mowry then graphically described a scene in Napoleon's palace at St. Cloud on Easter Sunday afternoon, 1803, when he summoned his secretaries of war and of the treasury, William Barbe de Marbois and Berthier and consulted with them as to the advisability of selling the whole country west of the Mississippi river for the purpose of filling the depleted treasury in preparation for the war with Great Britain.

PURCHASE ARRANGED. He then spoke of the diplomatic manner in which the matter was introduced to the American representatives, their amazement at the enormity of the matter and the final purchase of 800,000 square miles of land for \$15,000,000. He spoke of the historic scene when Napoleon signed the treaty and his prophetic remark as he laid down his pen: "There, I have this day insured forever the future of what will be the greatest nation in the world."

Dr. Mowry tritely remarked that there are many men living in this territory today who could draw their personal check for the amount paid for this land. He further said that we have not stopped there but now have a clear title to an archipelago in the Pacific. He referred to these people who see in this expansion the destruction of their country and asked that they have a little more of natural energy and good citizenship to be found in this glorious country of ours.

In the course of his remarks Dr. Mowry made a statement which no doubt will be received with surprise by a large number of people. He said that the clergy had been paid for this land. He further said that now that we have control of the Philippines the sun never sets on our possessions. He said the sun never set on our possessions before we were thought of the Philippine Islands. He stated that before the sun sets at night in the Aleutian Islands off the coast of Alaska that the people of New England have finished their breakfasts.

This evening a musical entertainment will be given in the high school auditorium under the direction of Prof. John T. Watkins. The Orpheus club, Schubert quartette and Charles A. Hirtley, the celebrated ventriloquist will appear.

DUNMORE DOINGS.

Work Being Done at St. Mark's Episcopal Church—Notes of Other Churches—News Notes.

The week at St. Mark's Episcopal church is an especially busy one, services and meetings of an interesting character being held at stated intervals through the week. This morning at 8:30 o'clock, Holy Communion will be celebrated. It being Holy Saints' Day. This evening at 7:30 o'clock a phonograph entertainment will be given in the Guild hall to the members of the Sunday school. J. B. Bronson of Elm street having kindly consented to use his phonograph lately received.

The Women's Guild of the church meets this afternoon at 2 o'clock at the home of Mrs. Carl Neff. The ladies being expected to bring their needles and other equipments necessary to sewing garments which will be given to the poor.

Friday afternoon at 4 o'clock, the Willing Workers will gather together and dress dolls, make scrap books and other interesting material which will be given to the hospitals to help with away tedious hours of the sufferers. Saturday afternoon at 2:30 o'clock the Industrial school will hold its regular session. The school this year is under a new and excellent staff of instructors and will undoubtedly accomplish a large amount of work.

AT OTHER CHURCHES. The special evangelistic services begun in the Methodist Episcopal, two weeks ago, still continue to draw interested and intelligent audiences. Rev. Blair, who assisted in the service Sunday, Monday and Tuesday left for his home this morning. Other clergymen will assist Rev. Van Cleft, the pastor in the remaining meetings.

The Ladies Aid society of the First Presbyterian church will meet at the home of Mrs. C. S. Farrer, on Cherry street, tomorrow afternoon at 2:30 o'clock. The usual business and social chat will occupy the attention of the ladies.

The evangelistic services being conducted at the Christian church in Tripoli avenue by Rev. A. P. Cobb are being quite well sustained. A number from Scranton were in attendance last evening.

PARAGRAPH NOTES. The Y. C. C. club will hold a masquerade ball in the Independent Order of Odd Fellows' hall on Thanksgiving eve.

Pets and Parasites. HOW DREAD DISEASES ARE DISSEMINATED.

THE parasitic germ is measured under the microscope by the twenty-five thousandth part of an inch. Its power is measured by the cholera scourge, the plague, consumption, and other decimating diseases. The germ lies in wait for human life on every side: in earth, air, water and food. Attention has of late been drawn to pets as disease disseminators. Many a boy has taken diptheria from his pet dog; many a girl owes consumption to her canary.

In London, England, they are legislating to compel a monthly examination of feathered pets, by the board of health, because the experts on consumption say that "numerous cases of consumption have been shown to originate from the deadly tuberculosis germs which breed with such startling fecundity in these supposedly harmless pets." Says a scientific writer, "Actual tests have shown that twenty per cent. of the dairy cows of the United States are tuberculous," and again, "the average grade of milk sold in large cities often contains as high as 80,000,000 bacteria in a cubic inch."

These facts are appalling. The very existence of the human race seems threatened, as indeed it is but for one defence. To quote again from a standard scientific article: "So fast, indeed, are new parasites being produced that were not science constantly elaborating counter-checks our boasted civilization would soon come to the end of its tether."

One of these great scientific counter-checks to germ disease is Dr. Pierce's Golden Medical Discovery. The germ generally finds entrance into the body through the stomach. It enters by the door of the mouth in our food or our drink.

"I was a great sufferer from dyspepsia for over two years, and I was a complete physical wreck," writes Mr. Preston E. Fenstermacher, of Egypt, Lehigh Co., Pa. "I had many torturing, gnawing, and aching pains—I think about all that a dyspeptic has or ever could have. I also suffered much with constipation. I tried many different medicines, which were recommended to cure the trouble, but these only made me worse, and my condition was more sluggish and weak than before. It seemed that I was getting worse all the time. At the same time I was going to write to you, I am very glad I did so; I had used your medicines before with the best results."

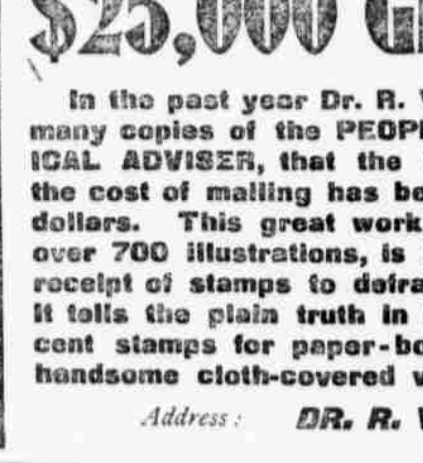

A Great Sufferer.

Its future power for harm depends chiefly upon the condition of the stomach and organs of digestion and nutrition. When food is perfectly digested and assimilated, when the blood is pure and abundant, disease finds no foothold. Dr. Pierce's Golden Medical Discovery makes the body practically impregnable against disease. It heals diseases of the stomach and other organs of digestion and nutrition. It increases the activity of the blood-making glands and so increases the supply of pure blood. It carries off the waste and poisonous accumulations from the system. It makes a strong, healthy body, built up of sound flesh instead of flabby fat.

Even when the lungs and respiratory organs have been attacked, and there were obstinate cough, bronchitis, or hemorrhage, weakness and emaciation, "Golden Medical Discovery" has restored the sufferer to perfect and permanent health. If you are sick begin to use "Golden Medical Discovery" and you will begin to well.

There is no substitute for the "Discovery" and nothing "just as good." Any attempt to sell you any other preparation in place of Dr. Pierce's medicine has only one object, the desire of the dealer to make an excessive profit.

There is no alcohol in "Golden Medical Discovery" and it contains no cocaine, opium or other narcotic. Persons suffering from chronic forms of disease are invited to consult Dr. Pierce by letter free. All correspondence is strictly private and sacredly confidential, and all replies to correspondents are mailed in plain envelopes bearing no advertising or printing of any kind. Address Dr. R. V. PIERCE, Buffalo, N. Y.

When I commenced taking your medicines, eighteen months ago, my health was completely broken down," writes Mrs. Cora E. Sunderland, of Chaseville, Calvert Co., Md. "At times I could not even walk across the room without pains in my chest. The doctor who attended me said I had lung trouble and that I would never be well again. At last I concluded to try Dr. Pierce's medicines. I bought a bottle of "Golden Medical Discovery," took it, and soon commenced to feel a little better, then you directed me to take both the "Golden Medical Discovery" and the "Favorite Prescription," which I did. I am now almost entirely well, and do all my work without any pain whatever, and can run with more ease than I could formerly walk."

Her Doctor was Wrong.

good naturedly gave way to the Hall-woolens.

PERSONAL MENTION. W. F. Smith and wife, of Union, N. Y., are visiting at the home of the former's brother, D. J. Smith, on Cherry street.

REGARDING SAMOA. Negotiations Between Germany and Great Britain. Berlin, Oct. 31.—Regarding the Vossler-Zellung's statement that Great Britain had offered Germany the Gilbert Islands and the British portion of the Solomon Islands in return for a renunciation of Germany's claim in Samoa, the foreign office here does not deny that there is some foundation for the report. Although the statement is not altogether accurate, the foreign office confirms the report that negotiations are proceeding in regard to Samoa and adds: "It is practically admitted that it is desirable that Samoa should be controlled by one power, in preference to the three-power arrangement which has given rise to such difficulties. It remains to be seen what arrangements can be made. The negotiations are not yet definitely concluded."

NEGRO LYNCHED. Gus McArdle's Slayer Is Hanged by a Mob. Web City, Kans., Oct. 31.—Gus McArdle, a bartender, was shot and killed last night and in less than two hours his supposed murderer, George Wells, a negro miner from Scammon, was swinging to a telephone pole, the victim of a mob which had forcibly taken him from jail. Earlier in the evening McArdle and Wells had some words in the saloon after which the negro left. Shortly afterwards a shot was fired from across the street, killing McArdle. Wells was arrested on suspicion and lodged in jail.

CONFECTIONERS ORGANIZE. Confectioners Organize. Harrisburg, Oct. 31.—About fifty jobbing confectioners met at the board of trade today and organized the Central Pennsylvania Jobbing Confectioners' association by the election of W. E. Fowler, Williamsport, president; A. D. Bacon, Harrisburg, vice president; S. A. Floyd, Harrisburg, secretary, and W. A. Hrinkeck, York, treasurer.

PENNSYLVANIA PENSIONERS. Pennsylvania Pensioners. Washington, Oct. 31.—Pensioners' Organization, Harrisburg, Pa., has issued a circular in 2 to 5 cents. For sale by Matthews Bros. and W. T. Clark.

building and strung him up to a nearby telephone pole. Before the rope was placed about his neck Wells admitted he was with the man who shot McArdle, but denied that he had done the shooting.

NO PRESIDENCY FOR DEWEY. Admiral Squelches an Enthusiast Who Had Prepared a Speech. Washington, Oct. 31.—Admiral Dewey is receiving credit here for another manifestation of sound judgment. At the dinner in his honor at the Metropolitan club Saturday night, Colonel Archibald Hopkins, a friend of Dewey, was to have read a posthumous prophecy with respect to Dewey and the presidency.

Shamrock Still Here. New York, Oct. 31.—On account of the heavy southeast gale the yacht Shamrock did not go to sea today. The gale now is for the Shamrock to get under way tomorrow morning about 9 o'clock and sail down the bay, as it is to be seen by Sir Thomas and his party, who are to leave for Southampton by the steamer St. Louis at 10 o'clock. In case the heavy weather should still continue the Shamrock may remain at her anchorage tomorrow.

Confectioners Organize.
