## THE MARKETS.

Wall Street Review.

New York, Dec. 6 .- The tone of the market for industrial securities showed decided contrast today to that for railroad securities. The break in prices of the Industrials approached demoralization by the middle period of the afternoon. Meantime the other stocks almost without exception held tenaciously to their prices. Late in he day the bears began to cover and wrought some very marked recoverles in the Industrial list. At the same time the railroads which had been almost stagnant displayed some signs of animation and rose generally above yesterday's level. Net gains in a few railroads reached a point. The late recovery in stocks was coincident with an easing in the call money rate to per cent. after ruling 7 to 8 per cent. earlier in the day. The banks were calling loans and the movement of the Industrials suggested that they were in disfavor not only with the specu-lative public but with the moneyenders, Industrial collateral apparently being displaced to a greater extent than other classes. The bears were very active and made bold onslaughts in the Industrial list, uncovering stop loss orders on a large scale. As it was evident the short interest had been largely extended the room traders turned to the bull side of the general story. They had some success in forcing the shorts to cover, and the demand from the source became rather urgent.

Quite a number of the Industrials showed declines of 31/2 to 7 points, and the subsequent rally brought them up from 11/2 to 5 points. Sugar was decidedly erratic owing to the sitting of the directors to act on the dividend. After an early advance there was de cided weakness and only a momentar ily-check to the fall when the regular dividends were announced. It fell off backwards to 149% and after rallying over three points eased off again, closing with a net gain of a small fraction. Total sales, 664,700 shares.

There was little doing in railroad

bonds and prices held steady. Total sales, \$1,310,000. U. S. 4s and old 4s advanced 1/4 in the bid price.
