BALTUS COULD NOT APPEAR.

Constable Who Went to Arrest Him Found Him in Bad Shape.

Andrew Herz, the Stone avenue appeared before Alderman grocer, John Lentes, of the South Side, yesterday and swore out a warrant for the arrest of John Baltus, of 614 Elm street, for assault and battery.

The story he told was a doleful one and the list of Baltus' misdoings long. Sunday night, Herz said, he was peacefully going home when Baltus pounced upon him and hit him with such force as to render him uncon-

When he revived he resumed his homeward walk, but again the cruel Baltus attacked him. Finally the Baltus peaceful Herz reached his home. He entered and thought he was at last free from his enemy, But no, Baltus even tried to break into the place,

This was the story of Herz. Constable Woelkers took the warrant and went to Baltus' home. But lo and behold! Baltus was found completely

laid up. His eyes were both closed, his nose sliced, his face cut and one leg wollen to double the size of the other. His wounds were apparently made with a knife and are very serious. The case has, therefore, been postponed by the alderman until the defendant is

SEWER CONTRACTORS' ARREST.

Donahue and O'Boyle Interfered with Running of Trolley Cars. Contractors James O'Boyle and Michael A. Donahue were yesterday arrested at the instance of the Scranton Rallway company for interfering with the running of the company's cars. The warrants were sworn out before Alderman John T. Howe, The contractors are building a sewe on North Main avenue at the corner

of Jones street. It seems that the trench extends under the car tracks and undermines them, making the running of cars at that point dangerous and difficult. The company did not wish to push

the case, but desired to ascertain its rights in the matter. The aiderman after hearing the evidence placed the costs upon the defendants and dismissed the case. The parties interested came to an

amicable understanding.

MERTIE PEEK IS DEAD.

She Frequently Gave Exhibitions in This City.

Mrs. F. B. Hoffman, better known as Mertle Peek, died at Silver Lake, near Kingston, Mass., Sunday night. She was considered the greatest horsewoman of her day, and was wellknown here.

About ten years ago she paid frequent visits to this city with her mannger, Barney Demarest, and gave exhibitions of her power over horses at the Driving park. During one summer she made her headquarters in this city.

> Christmas Doll Free.

Nothing so delights a child at Christmas time as a great big doll, a dolly large enough even to weat baby's clothes. This is just the kind of a doll that the Cook's Flaked Rice Co are giving away free. The doll that they are giving away is two and onehalf feet high, being as large as a child two or three years old. Comes beauti-

fully colored on muslin, with directions for making so simple that any mother can sew it together making an indestructible life size doll that baby's clothes will fit.

To get this doll write to the Cook's Flaked Rice Co., No. 3 Main street. Matawan, N. J., and enclose them ten cents for mailage and one coupon, which is to be found in every package

of Cook's Flaked Rice, which is sold by all our grocers. A company must have very great faith in their product to give so much away just to get people to use their first package, but we are told that it

pays the company to do this, for when a family once gets using Cook's Flaked Rice they find it so easily prepared and so delicious a food that they are forever a customer.

Security in Niagara Falls Property.

Well selected property in a rapidly growing city is the safest of securities, The rule is that when a city doubles in population its real estate quadruples in value.

Andrew Carnegie asserts that "more fortunes have been made from rise in real estate than from all other causes combined.

The Niagara Power Company owns 1.600 acres of land in the eastern and southeastern partions of the city, and the Hydraulic Power and Manufacturing company own 70 acres of land on the west bordering on the river.

These lands are to be occupied by industrial establishments located by the magnet of cheap power and unsurpassed shipping facilities, perfected by ample capital to supply all required conveniences to the manufacturer. The area available for residence and business purposes is confined to such small limits that investments therein at present prices are safe, with prospective profits unusually large.
