part of the session today, the buying

this inviting field with longing eyes

until the attraction became too strong

for them and they put out selling or-ders throughout the greater part of the

list. They succeeded in effecting very

marked declines and bringing out a certain amount of offerings by uncov-

ering stop loss orders. But the vol-

ume of the selling was not important and the success of the bears was dull

and listless. There was no positive in-

cident in the day's event for the bears

to base their operations on. Their con-

clusion was rather a negative one as

to the chances of any favorable change

from the present depressing influences.

For the present it is obvious that capi-

tal has no inclination to move into

stocks, and it is noticeable that the

quiet investment absorption, which was

a feature of the market during the last

week in December and which continued

into the first week in January, has to

all intents and purposes ceased at the

present level of prices. A series of en-

couraging events has afforded a pretty

good test of speculative sentiment by

being totally ignored. There have been

new entries to the list of dividend-

paying stocks and increases in the divi-

expectations. The possibility of further

reverses to Great Britain in South

ments for Great Britain, were used

with effect. Total sales, 379,800 shares.

The bond market was dull and heavy

in sympathy with stocks. Total sales,
