Every day adds to the list of deaths attributed to heart failure. If the truth were told the bulk of these deaths might be written down as due to stomach failure. For it is in the failure of the stomach and other organs failure of the stomach and other organs of digestion and nutrition, that "weak" heart, "weak" lungs, "weak" nerves and other forms of physicial deterioration traving their beginning. The man whose stomach is sound, who can digest and assimilate the food he eats, and so keep each organ of the body well nourished, is the man who is least liable to collapse under the sudden weakness of some under the sudden weakness of se

The preservation of health which follows the use of Dr. Pierce's Golden Medical Discovery, is chiefly due to the fact that it perfectly and permanently cures diseases of the stomach and organs of digestion and nutrition, purifies the blood and increases the blood supply of the body. Weak people will find in this medicine a sure means of strength.

If I turned in bed a cramp like pain caught me in the small of my back and it was something terrible. In the morning my back felt lame and sore and so weak that it would hardly support my body. THE MARKETS.

Wall Street Review.

New York, Jan. 19.—The stock market was dull and narrow today except for the sensational developments affecting the stock of the American Sugar Reining company. Previous to the assembling of the stockholders' meeting there was a considerable show of strength in this stock owing to a general conviction that the sugar trade war had more of shadow than of substance in it. The declarations contained in the president's report rather took Wall stdeet's breath and caused fear that unless conditions change dividends on the stock may be suspended. The stock declined rapidly the price varying as much as 19, between sales. The first drop took the stock to 122, when it steadled and railied above 124. It fel again to 1172, bringing out heavy stop loss preders on the way down, railied to near 122, reacted 3 and again railied in the final dealings. The large and persistent outstanding short interest in the stock served as a recuperative force by buying to cover controcts. All the prominent industrials were quite sharply affected in sympathy, the bears seizing the opportunity to offer prices down and uncover stop loss orders. The railroads were much less affected, aithough the earlier gains were mostly wiped out. There was good buying in the railroads at the decline, led by the Baltimore and Ohio stocks on the company's strong statement of December earnings. The general relaxation in money rates all over the world had induced a conviction Wall Street Review. statement of December earnings. The general relaxation in money rates all over the world had induced a conviction that the official discount rates both of the Bank of England and the Imperial bank of Germany will be reduced tomorrow and board room traders were inclined to buy stocks in anticipation of a foreign demand on this account. Stocks were generally firm today in foreign markets of the easier money rates. But it is very generally firm today in foreign markets of the easier money rates. But it is very clear that the money markets owes its abundance and case to the thorough liquidation of speculative accounts which has been effected all over the world in the last few weeks, and to lack of renewed speculation. Speculators are apparently still disincilized to take on stocks and today's market was but a narrow affair, even taking into account the violent price movement of some of the specialities. The prevailing dullness is attributed by traders to fears of unfavorable news from South Africa, but it is not improbable that the existing conditions there, as well as in the financial world have been accurately discounted in the speculative markets. New developments are awaited to warrant a new adjustment of values. Total sales, 549,690 shares. The bond market was dull and moved in sympathy with railroad stocks. Total sales, par value, \$1,025,000. United States new 4s and 5s registered declined ¼ in the bid price. of the easier money rates. But it is very
