Port Townsend, Wash., Jan. 16 .- The schooner Muriel, after being buffeted about on tempestuous seas for forty days in trying to reach Hakodate from Kobe, has arrived here almost stripped of sails and some of her spars gone The Muriel sailed from Kobe for Hakodate with a cargo of sulphur.

After leaving Kobe the Muriel encountered severe gales for fourteen days, at the expiration of which she found herself some hundreds of miles further away from her destination than on the day she sailed, with sails tattered and torn and some of her spars carried away. In this condition Captain Carleson deemed it impossible to reach Hakodate with his ship in that

condition, and sailing before gales, with what reefing sails he had, he headed for Puget Sound. On one occasion, during the first four-

teen days out, Captain Carleson reports having encountered a severe storm of snow, hail and lightning. The night was very dark and the wind was blowing with hurricane force. Sleet and hall rattled on the deck, which, with the force of the wind, endangered the lives of the sailcrs. Great sheets ot lightning swept the sea, and at times it appeared that the vessel was sailing in a sea of fire. Captain Carleson says that was the most fearful experience he ever had during his life at sea.

IRON AND STEEL FOR CHINA.

Shipments to the Orient Have Helped to Raise Prices.

San Francisco, Jan. 16 .- Charles L. Wagoner, of Pittsburg, Pa., who is largely interested in iron and steel shipments from this city, said:

"Overland shipments via this port to China, Japan and Siberia are monopolizing all the available ship room. Immense supplies for the Eastern Chinese railway and other branches of the great trans-Siberian road have been forwarded from this country. Those facts account somewhat for the jump in the prices of steel and iron, as the exports to the Orient increased from \$500,000 for eleven months in 1898, to \$1,700,000 for the corresponding months of last year. There was an increase in the exports of almost all classes of machinery, especially agricultural implements and scientific apparatus.

"The cotton cloth trade with China shows an increase of about \$3,000,000 for the first eleven months of last year, as compared with the corresponding period of 1898."
