E. A. Clark, who appears at the head of the Electric City Light, Heat and Power company, is generally admitted to be in every way equipped to carry out the big contract he and his assoclates have asked the city for. He comes from the old Clark family of Hyde Park, who were among the early settlers of this territory and who had the good forethought to get and keep a large share of valuable coal land. He made a number of successful ventures as an operator and has some very valuable holdings in the way of coal property and real estate. Mr. Clark at present makes his home at the Jermyn. . The fact that his company deemed his name a sufficient guarantee of its earnestness and stability is in itself eloquent and volumin-

Mr. Clark says his company is very much in earnest and if the city councils award them the contract for lighting the city they will demonstrate their earnestness by the vigor with which they will prosecute the work of installing a plant. It is said that the company has all the arrangements perfected and is in a position to get to work as soon as the city says the word.

literary efforts have also found their way into the metropolitan dailies. A few years ago it seemed that the law would draw him from the field of newspaper work, for he gave up his regular contributions to the newspapers to an extent and turned his at-tention to the study of law. Before he had completed the prescribed course, however, he was called to the helm of the Archbald Citizen, of which he is now owner and editor. Under his guidance it has become one of the foremost weeklies of this region. He was spoken of for the nomination for representative two years ago, but declined to go into the convention because he felt that the Hon. John F. Reynolds was entitled to a nomination for a second term for his splendid work during the term he spent in the legislature.
