#### FOREST CITY.

Special to the Scranton Tribune.

Forest City, March 14.—A correspondent of the Forest City News writes as follows: "To the Editor of News: I am not usually to be found in the ranks of the "kickers," but it seems to me that it is high time the citizens for Forest City demanded that the board of health, the body which is supposed to guard the physical welfare of our people, became something more than a farce. If a complaint is made to the officers of the board of health they shirk the responsibility for inaction by saying that their hands are tied; they have no money from the council to carry on the work. The councilmen will, if approached on the subject, find some excuse for their share in the business and throw the blame on the board of health or some of its members or agents. Meanwhile the doctors fall to report cases of contagious diseases, or, at all events, no action can be seen in regard to them. Infected houses are not placarded and the children in families afflicted with disease mingle freely with playmates from other homes. Within a month I have had a child from a house in which there was a patient suffering with a contagious disease come home with my children. There is, it seems to me, criminal negligence somewhere and the citizens should rise up in protest. The personal interests or feelings of public officials should not be allowed to stand in the way of the public good."

James J. Cunningham, who some time since left here to located in Newport News, Virginia, has gone into the wood and coal business with H. D. Spear, with good prospects of success. The poor board of Forest City has engaged Sandy Kennedy as steward of the poor farm for the ensuing year.

A fire broke out in Mauzer's lumber yard, on Railroad street, yesterday

about noon, but was extinguished before much damage was done. A young child of John Meddleton who has been very ill with scarlet fever, is very much better.

## THE MARKETS.

Wall Street Review.

New York, March 13.—The stock market today showed very plainly the effects of the reduction of the short interest which accompanied yesterday's sharp advance in prices. While yesterday's covering movement was in part the cause of the sharp advance, it was also the result of substantial buying, which was attributed to large financial interests. This buying was not in evidence today. London also was disposed to take profits on the news of the arrival of British forces before Bloomfentein. But notwithstanding the lack of aggressive strength in the market the bears showed themselves timid about making fresh ventures. There was some pressure against the list at times, especially Metropolitan. Sugar, People's Gas, Steel Hoop and the New York city stocks generally. Missouri Pacific suffered from disappointment over the showing made in the annual statement and Rubber was raided down an extreme 3½. These and other declines were largely recovered before the close, and in the final transaction a sharp marking up of prices showed that shorts among the traders were having difficulty in getting back the stock they had sold earlier in the day. Offerings of stocks on all recessions were in fact extremely light, and there were points of strength which acted as sustaining factors for the whole market, notably Third Avenue, the Atchison stocks. New York Central and Norfolk and Western preferred. It was thus made manifest that while the market waits on developments in the money market for a rise holders of stocks are prepared to make concessions to sell. Call money did not command above 6 per cent, and fell to 3 per cent, but this was probably due to the stopping of the stock market demand as to any new supply of funds. The loss of banks to the sub-treasury since last Friday already foot up \$2.24,000, which is more than half the remaining surplus over the legal requirement held by the banks. It is evident, therefore, that relief from the operation of the currency law must come quickly if it is to prevent a pinch in the money marke
