A Valuable Vein Is Being Opened in Long Valley.

Special to the Scranton Tribune

Towanda, March 18 .- The civil engineer of the Long Valley Coal com-pany and a force of men have been working at opening a drift on the company's property. The new find is located about two miles south of the Long Valley plane and the drift has been driven seventy-five yards into the mountain. The entire distance of the seam of coal is thirty-two inches thick and of splendid quality. As far as driven the drift is a complete mine, with air course and track, opened to a height of five and a half feet. lies about 190 feet lower than the old Barclay workings and something like 600 feet above foot of plane. The "A" bed has never been exploited, for the reason that the Barclay mine and the other workings in that vicinity of the secretary of council was fixed at out

As early as 1834, Richard I. Taylor, an eminent English geologist, visited the Bradford county coal field and Kratchard S. The resignation of Jacob made a survey. How to Save Doctor Bills.

We have saved many doctor bills since we began using Chamberlain's Cough Remedy in our home. We keep a bottle open all the time and whenever any of my family or myself begin to catch cold we begin to use the Cough Remedy, and as a result we never have to send away for a doctor and incur a large doctor bill, for Chamberlain's Cough Remedy never fails to cure. It tis certainly a medicine of great merit and worth.-D. S. Mearkle, General Merchant and Farmer, Mattie, Bed-ford county, Pa. For sale by all drue gists. Matthews Bros., wholesale and
