A Matter of Interest to Local Miners-Funeral of Willie Lester.

In conversation with Dr. J. M Shields the other evening, he referred to the frequent accidents in mines and said he had often wondered why the men had not organized a "First Ald to the Injured" society. Few accidents occur in any mines where the injured would not have their sufferalleviated if the willing hands who rush to assist had a practical knowledge of the vital parts of the human system and the ability to apply splints to a broken arm or leg, or the application of a tournequit that would stop a loss of blood which has not infrequently resulted in loss of life. It is such knowledge as this that the nembers of "First Aid" societies are taught and which has enabled them to render prompt treatment that has not only alleviated suffering, but at times been the means of saving life Dr. Shields said if the miners of the Delaware and Hudson colliery desired to take up the formation of such an organization, he would volunteer his services in imparting the necessary instruction to the men. He is of the opinion the organization should consist of at least twenty members, which would give five men to each of the four sections of the colliery. The doctor's suggestion is both humans and generous, and it is thought either their local union or the Keg Fund so ciety will interest themselves in the affair and bring about the organization. If this is done there is no doubt the company would willingly furnish the few appliances necessary for first

His remarks left a deep impression upon his hearers. At the conclusion of the service, the remains were interred in the borough cemetery. Among the floral gifts were a beautiful cross and, wreath. The pall-bearers were: Eddie Powers. James Donahue, Robert Jones, George Reeves, John McHale and Willie Sey
