COMING INSTITUTE OF CITY TEACHERS

WILL BE HELD DURING THE WEEK OF APRIL 16.

Superintendent Howell has secured the services of three of the leading educators of the country. Namely, Robert Metcalf, of Boston; O. T. Corson, of Columbia; and Miss Lucy Wheelock, of Chicago. The local speakers—Webster Davis may lecture on Boers.

This year's city teachers' institute will be held in the high school auditorium the week of April 16, and from present indications it promises to be an exceedingly successful one as Superintendent Howell has succeeded in procuring three of the best known educators in this country to act as instructors in addition to a number of other well known and capable persons.

The sessions will be commenced on Monday, April 16, at 2 p. m., and will be continued until Friday, April 20, at noon. There will be two sessions daily, the morning session being from 9:30 to 12:30 o'clock, and the afternoon from 2 to 4 o'clock.

The principal and best known instructor will be Robert Metcalf, of Boston, who holds the position of supervisor of instruction in the schools of that city. He is the author of the "Metcalf Grammar," a standard work, and is generally conceded to be one of the best literary scholars of the century. He is especially noted as being a writer of terse, concise English. He will give a series of talks on "Language Work."

EDITOR CORSON COMING.

Another prominent instructor will be O. T. Corson, of Columbia, Ohio, editor of the Ohio Journal of Education, and president of the National Educational Association. He will give a course of lectures on "Psychology" and "School Government."

The ablest kindergarten teacher in

this country, and some say the greatest living authority on this subject in the world today, will also be present. This is Miss Lucy Wheelock, of Chicago, president of the International Kindergarten Association. She will speak on "Kindergarten Work" and "The Coordination of Kindergarten and Primary Work." One of the free kindergartens in this city is named after Miss Wheelock.

Miss Ruth Gould, of New York city, an authority on art, will speak on "Higher Art and School Room Decoration." Deputy State Superintendent of Education Henry Houck, of Harrisburg, will give several talks on "Educational Theories, Wise and Otherwise." Miss Kendall Stuart, of Philadelphia, will also speak on "School Room Supplies." Another speaker well known in this city is Professor Bible, of the Stroudsburg Normal school, who will give a talk describing his recent trip to the Pacific coast.

LOCAL INSTRUCTORS.
In addition to the outside instructors there will also be a number of local instructors. Prominent among these will be Professor W. W. Grant, principal of the high school, who will give a lecture on "The Personality of the Teacher." Miss Clara Niemeyer, of No. 25, and Miss Marion Dyer, of No. 38, will each give their views on "A Model Lesson in Music." Another local instructor will be Mayor Mohr, who has consented to deliver a lecture on "Robert Burns," a poet with whose works he is very familiar, and who understands him the better because he knows of the phases of life he wrote about being a Scotchman himself.

There will also be a number of musical and other features to relieve the monotony of the educational work. Prominent among these will be the boys and the training school choruses, both under the direction of Mrs. Annie Barnes, supervisor of music. What is known as a "House Drill" will be given by sixteen pupils under the leadership of Miss Sarah Jones, of No. 18.

Vocal solos will be rendered by Miss Elizabeth Thomas and Mrs. B. T. Jayne, while several vocal duets will be sung by Mrs. A. E. Connell, and Mrs. Joseph O'Brien. A piano duet will be rendered during the course of one session by the Misses Mary Harris and Ella Honey. Recitations will also be given by the Misses Lella Porter and Beatrice Morris.

Superintendent Howell is negotiating with and hopes to secure for one night Webster Davis, who has just resigned his position as assistant secretary of the interior, in order to go upon the lecture platform in defense of the Boers, should he lecture here it will be, of course, upon this subject.

TOBYHANNA MILLS.

Special to the Scranton Tribune.
Tobyhanna Mills, April 4.—W. B. Easter spent today at East Stroudsburg, at which place he is interested in the boiler manufacturing business. John Lynch has left for St. Regis Falls, N. Y., in the Adirondack Mountains, where he will estimate timber for a lumber company of New York city.

The funeral of the month-old child of James Melroy, which died on Tuesday, will take place on Thursday.

INDUSTRIAL JOTTINGS.

Make-up of the D. L. & W. Board—George W. Brill's Advancement.

Following is the make-up of the Delaware, Lackawanna and Western board for today: Wednesday, April 4.

- WILD CATS, SOUTH.
6 p. m.—J. Gidley.
7 p. m.—J. Gerty.
8 p. m.—W. A. Bartholomew.
9 p. m.—R. Randolph.
10 p. m.—G. Ludlow.
11 p. m.—E. VanVleet.
- THURSDAY, APRIL 5, 1900.
12:30 a. m.—G. T. Staples, with C. Van Vleet's men.
1 a. m.—T. J. Donleau.
2 a. m.—A. G. Hammett.
3 a. m.—H. Bishop.
4 a. m.—B. Bennett.
5 a. m.—J. Mosler, with C. Bartholomew's men.
6 a. m.—J. Rowe.
7 a. m.—J. Townsend.
8 a. m.—F. D. Scott.
9 a. m.—W. P. Mann.
10 a. m.—A. J. Schlorer.
11 p. m.—P. McAllister, with Brock's men.
12 p. m.—T. Fitzpatrick.
1:30 p. m.—W. D. Warfel.
4:30 p. m.—A. Gerty.
5 p. m.—P. Sings.
- SUMMITS.
7 a. m.—North—G. Frounfecker.
12 o'clock noon, south—W. H. Nichols.
6 p. m.—South—McLane.
- PULLERS.
10 a. m.—Beavers.
PUSHERS.
8 a. m.—south—Houser.
11:30 a. m.—south—Moran.
7 p. m.—south—Murphy.
10 p. m.—south—C. Cavley.
- PASSENGER ENGINE.
6:30 p. m.—Magovern.
- WILD CATS, NORTH.
9 a. m.—2 engines—J. E. Masters.
11 a. m.—2 engines—C. Kingsley.
4:45 p. m.—2 engines—J. O'Hara.
9 p. m.—2 engines—R. W. Packins.

To become Superintendent.
George W. Brill, of Mahanoy City, for many years trainmaster on the Hazleton-Mahanoy division of the Le-

high Valley railroad, with headquarters at Delano, is at Johnstown, where he has had the tender of the superintendent of thirty-five miles of railway owned and operated by the Cambria Iron and Steel company. Close friends of Mr. Brill are confident that he will accept the position and remove his family to Johnstown. Since he tendered his resignation to the Lehigh Valley more than a year ago, he has been profitably employed in the lumber business.—Hazleton Sentinel.

Ceylon and India Tea

Merit Wins

Machine-made BLACK Teas have had a steady and phenomenal increase in consumption wherever they have been introduced because they are PURE and WHOLESOME.

Machine-made GREEN Teas will have the same record, for they possess the same virtues.
With both GREENS and BLACKS use less tea and infuse THREE to FIVE minutes. Always use BOILING WATER.

ASK YOUR GROCER FOR **'SALADA'** Ceylon Tea
REFRESHING. DELICIOUS. Sold only in Lead Packets.
50c, 60c, and 70c per pound.

Connolly and Wallace

SCRANTON'S SHOPPING CENTER.

Men's Negligee Shirts

The First Day of an Important Showing--An April Surprise.

Negligee Shirts afford a genuine relief from the severity of gentlemen's linen. Our great showing of "LION BRAND" garments are distinguished by a wide variety of tasteful designs, a smoothness and finish not usually found in ready-made goods. They provide an exceptional opportunity to express individuality in selection and combine a stylish appearance with comfort. Men who are hard to suit are earnestly recommended to come in and see how little they can get from this collection to criticize. Men who have decided ideas as to what a Summer Shirt should be are invited to discover how thoroughly we agree with them. There is a showing here that is representative.

In the "Novelty" Weaves—the sorts that some people call "exclusive" because they are somewhat uncommon—we show two hundred styles. Most of these are in the fine Madras Cloth combinations that are destined for strong popularity among well-dressed men this summer. Prices from one dollar to two dollars each.

We call these "Negligee" Shirts because they are principally of the soft-bosom variety, intended for hot weather comfort. But most of these new ones are as dressy as you could wish a summer garb to be. The dignified, effective, rather simple patterns, the beautiful colorings and the plentiful use of silk, achieve this result.

- At \$1.00**
A very remarkable Shirt of Madras to be worn with white collar. One pair of detachable cuffs to match shirt pattern. The finish and detail of this shirt will command instant attention. One hundred styles.
Madras Cloths, in designs wholly new and attractive, and which are confined strictly to Connolly & Wallace—forty styles.
- At \$2.00**
Shirts of a combination of Madras and Silk, and of plain, very fine Madras—tremendously effective and exceptionally handsome. Wholly new in all details. Twenty styles.
- At \$1.50**
Shirts of Anderson's Fine Scotch

IT IS THE INTERNATIONAL

Correspondence Schools, of Scranton, Penn'a.

That Originated Correspondence Instruction in the Engineering Trades and Professions in 1891.

BEWARE OF COUNTERFEITS

YOU CANNOT successfully educate yourself through the mails by enrolling with one of our imitators. You are certain to lose the money you pay for tuition, because their methods of instruction are illegitimate and the results without value to any one desiring education for its practical use.

Our system of Correspondence Instruction in the Industrial Sciences was originated in The International Correspondence Schools, of Scranton, Pa., in October, 1891. Since that time, we have taught the Theory of the Engineering Trades and Professions, as well as Mechanical and Architectural Drawing, to thousands of industrial workers, and have qualified them for responsible positions. Our rolls contain the names of students in every part of the civilized world.

That a method or invention should thus extend around the globe, and rapidly grow in favor with the lapse of time, is proof positive of intrinsic value.

These great results have been achieved by original methods of teaching—methods especially adapted to the end in view. Our Instruction and Question Papers and our Drawing Plates differ widely from school and college textbooks, and cost us over \$100,000 to prepare—and our imitators are compelled to employ a cheaper but an utterly impracticable method—that of using textbooks of colleges and the universities.

If the industrial classes could learn drawing and the mathematical and physical sciences from ordinary textbooks, there would have been no field for The International Correspondence Schools, and our grand army of 100,000 students could never have been assembled.

Our Instruction and Question Papers, and Drawing Plates, differ from the textbooks used by students in the regular schools in the following important respects:

- FIRST: They are mastered more easily and in less time.** The theories and demonstrations of science—its abstractions—are always difficult. Our textbooks contain only the facts, principles, and processes a student is actually required by his trade or profession. These are usually easy to learn and to apply. The workingman has not the time to study all the matter contained in the school and college textbooks, neither does his work require him to be strong in abstract theory. In the preparation of our Instruction Papers, neither time nor expense is spared to secure the greatest possible simplicity and ease of application. We do not occupy the time of our students in the study of the derivation of rules and formulas; we teach them how to apply rules and formulas.
- SECOND: They are more practical.** Ordinary school and college textbooks, such as are used by our imitators, contain no examples relating to Mining, Mechanics, Steam Engineering, Electricity, Architecture, Plumbing, Heating, Ventilation, Sheet-Metal Pattern Drafting, or Civil Engineering. In each of our Courses, the examples and processes refer directly to the trades or professions of the class of students for whom the Course was prepared; so that from the beginning our students are getting valuable knowledge and are learning to apply it.
- THIRD: Our textbooks are written by men strong both in theory and practice.** The authors of textbooks intended for use in colleges and universities have thorough scientific training, indeed, but they have little or none of the knowledge that can be gained only by doing—by experience. They do not know, and, therefore, omit to mention in their books the way in which innumerable scientific facts may be applied in simple operations of the trades or professions. These applications of science are a matter only to the expert both in theory and practice, and only such men are employed as Editors and Instructors by the Management of these Schools.
- FOURTH: The men that make our textbooks supervise the instruction of our students.** No one can teach the contents of a book so well as the man that wrote the book; he knows better than any one else what is in the book, why it is there, and its importance with reference to the other parts of the entire subject.
- FIFTH: They are frequently revised.** Being private property, protected by copyright, school and college textbooks cannot be changed at the pleasure of those that use them. In order to correct what is wrong, improve what is faulty, smooth away difficulty, and insert what is of value discovered, changes must be made very frequently. Our Instruction Papers belong to us; and in our Editorial Department, they are in constant comparison with what is latest and best; faults, omissions, and crudities of every kind are therefore remedied without delay. In the case of textbooks on Applied Physical Science, the need of revision occurs with special frequency. Take electrical books, for example: many works on this subject printed five years ago are now nearly worthless, for the reason that they are out of date.
- SIXTH: We teach industrial drawing by an original and very successful method.** In Mechanical and Architectural Drawing, special Plates were prepared at an enormous expense both in time and money. They have been copyrighted because they embody a method of instruction entirely new—one that has been extraordinarily productive of practical results.

Our students in drawing make as rapid progress in learning and become as proficient as the students of the regular schools and colleges. The principles underlying our system of teaching drawing are entirely different from those in the systems employed in the regular schools, colleges, and universities, and there is no other system by which drawing is taught as successfully through the mails.

Any system of education for people with limited time to devote to study by the correspondence method that relies on the use of school and college textbooks will end in failure; the student that pays his money for such tuition will get no returns.

If you want to educate yourself in the theory of your trade or profession, if you want to become a draftsman or to add to your earning capacity the strength that COMES FROM THE UNION OF SCIENCE WITH PRACTICE, we can help you.
