### FACTORYVILLE.

merial to the Scranton Tribun-

Factoryville, May 9.-An unknown and demented man was found standing in two feet of water in the tunnel by railroad men carly yesterday morning. He was taken to Nieholson and placed in safe keeping until some disposal of his case may be made.

Montrose will journey down here

next Saturday to play the return daughter, Nina, Miss Thompson, game with Keystone. The weather being favorable, in all probability it will be a hard contested game, as Keystone's last game at Montrose, two weeks ago, was won by Montrose, and herefore our boys will put forth an ing but a small amount of goods, xtra effort to redeem themselves. On circus day many of our towns

people have been successful in finding an excuse to go to Scranton today. "No! We are not going to the circus. Hadn't thought anything about it.'

Our street commissioner, Aaron Phillips, is still confined to his home with heart trouble, and in the meanime work on the streets has prac-

tically ceased. There are many census questions that the people might brush up on, and a little later we will give a few of them. Notwithstanding the law. however, there were many persons who objected during the last census to give any information in regard to their personal affairs, and in many instances it was only with great diffi-culty that the desired facts were obtained. Some misguided individuals barricaded their doors and treated the census chamerators in the light of villians who were seeking to rob them of their possessions. This unwillingners to answer questions would no doubt be overcome if it were generally known and understood that the replies are intended only for efficial use in preparing statistics, and will never e given out to the public. In fact the law expressly provides that if any enumerator shall so far forget his duty as to communicate to any one except his superior officer any information he obtains in the performance of his work, he shall be subject to a fine of five hundred dollars. The law is very

strict with reference to the duties of the enumerators, for unless their work is done properly and carefully the census figures would be of little value, consequently every one who enters upon this important duty is given to understand that if he shall knowingly make a false statement regarding the persons whem he has enumerated. ither as to their number or any possible way, he shall be deemed guilty of a misdemeaner, and upon conviction he may be fined five thousand dollars, and two years imprisonment, with the assurance of the confidence and co sponsibility of the enumerator, no person ought to have reason to hesitate in answering such questions as Uncle Sam may ask through the enumero-

# NORDICA'S BIG CLAIM.

May Secure Part of an Award Against the Government. rom a Current Press Disputch.

Mme, Lillian Nordica will very likesoon share in a fortune. Members of her family, the Nortons, of Martha's Vineyard, are pushing a heavy claim against the Federal government and if the suit is successful the operatic star will receive a large part of the award.

The Nortons originally come from England, Ichabod Norton being the shipbuilder, with whaling as a side occupation. About the year 1800 he set off on a whaling voyage with a small fleet of vessels. The whale hunt was down on them and seized the ships.

The seizure was brought to the notice of the authorities at Washington, and this claim, together with others of similar character, were presented to the French government. In time France paid the sums demanded and several of the individual claims of the shipowners were awarded, but for some reason the Norton-Butler claim was not settled. While the matter was pending the papers in the case were destroyed in a fire in Washington, in which a number of official documents

were burned. During the past half century various attempts were made to collect the award, but to no purpose. Recently some papers bearing on the case came
