Gentlemen-"Although my school does not believe in patent medi-cines, I have found it to be a fact that Peruna is a grand and valuable medicine. I have known it to cure Mrs. Sampson, suffering with an inflamed womb, aggrevated by malaria, after the doctors had failed to help her. Another of my former patients suffered with a complication of female diseases; she was so thin, nothing but skin and bones, but Peruna cured her and she is today in good health and good flesh. Facts prove that Peruna revives lost strength and restores to the sick that most wonderful blessing of life—health."

The revenue of the kingdom of Prus charge is \$57,685,000.

This is the dark side of the account, and for a country like Germany it seems dark enough. It may be asked how does the country bear such burmorning, and at the present time is in | dens? The answer is, partly because its industrial and economic development has been unprecedented, and because a large portion of the totals just given represent neither public burdens in the way of taxation nor public debt as generally understood. The greater part of the Prussian debt has been incurred in the construction or purchase of the railways, and so remarkable has been the expansion of the railway system and business that the gross receipts of the state-owned railways have risen from \$36,540,000 in 1872 to an estimated \$340,000,000 in the present year. The money borrowed by the Prussian government has been various news reporters that represent invested in public undertakings which are proving more profitable each year with the expansion of the German The total debt charge is under \$60,000,000 and the estimated net receipts for this year are \$135,000,000. It is this that accounts for the few complaints heard of burdensome taxation in Prussia or any of the other states embraced in the empire. Notwithstanding the heavy military

expenditure in Germany, Russia leads Europe in the expenditure on public education. Its budget this year for for higher schools it has risen from ties from \$655,000 to \$2,555,000. In 1871 only \$75,000 was spent on industrial 405,000. THE MARKETS.

Wall Street Review.

Wall Street Review.

New York, May 22.—Sugar certificates occupied the attention of the Stock exchange today to the practical exclusion of other considerations. The spathy and lessitude of the market seemed to apur the professional traders to a search for some medium of operation and they gave themselves up to a speculative revel in Sugar. The fluctuations in this stock were frequent, violent and efratic, and there was no news to account for them beyond the airiest and most unsubstantial rumors. Also, it was evident that the enormous business being done would necessitate very little clerical labor on the transfer books of the company. Probably the large majority of the contracts made either for sale or for purchase, were closed out before the end of the day the profit or loss being accepted by the traders. The stock's extreme range was 7% points and the net gain was 6%. In the opening dealings the price went down in continuation of yesterday's depression. After declining 1% the advance began and it had not proceeded far before the shorts began to manifest distress and rushed to cover, pushing the price to the maximum. The price then began to fall hake on light transactions and without any evidence of support. The leading industrials showed sympathy with Sugar, especially American Tobseco, which is nearest of kin to it in speculative character. The leating industrials showed sympathy with Sugar, especially American Tobseco, which is nearest of kin to it in speculative character. The latter stocks showed better resistance to reaction than other specialities which generally lost pretty much all their gains. The general list continued in a slough of deepond and moved either way with great difficulty. Opening prices were lower in sympathy with London and there was a milday raily when Sugar shot unward and Chicago and Northwestern was marked up 5½. The latter movement was mithout explanation beyond the large increase in earnings for April. Total sales, par value, 81,320,000 United States refunding 2s, when issued, de
