THE MARKETS.

Wall Street Review.

New York, June 15.—To find a parallel to to gy's stagnation in the stock market it would be New York, June 15.—To find a parallel to to-lay's stagnation in the stock market it would be precessary to go back to the period of the last presidential campaign. A mumber of usually active stocks were not cealt in 10 the extent of a single share and it was long after noon be-fare such a secondative leader as Brooklyn transit or Manhattan made its appearance on the tape at all. There was some desultory specu-iation in Sugar during the morning at an ad-vance of about a point but that stock fell back into the rut of duliness which characterized the whole market. Larne offerings of Union Pacillic began to appear near 2 o'clock. The stock fell into quietnds in the last hour and hung about a point below last night's level. At the last divi-dend the directors declared 2 per cent, on the common stock, I per cent of which was called regular semi-annual and I per cent, extra. No intimation has been heard in Wall street that the actual amount to be disbursed would be cut in half. The action taken proved a complete surprise, and what the effect may be upon the general market it is impossible to foresee. The price movement in today's narket was irregular and without significance. Tetal sales, 144,000 chares. The bend market shared fully in the fullness of the stock market and price changes were insignificant. Total sales par value, 850,-900. United States bands were unchanged in bid quistations.
