THERE WILL BE one census man less next week. No, he hasn't been thrown out a second story window and killed, neither is his work completed. He simply has resigned for cause. Like the annals of the poor, his history as an enumerator is short and simple. He started in gaily and without a foreboding. In the first place his wife was willing. Hitherto she had set her face strenuously strength and vigor now for over a against politics. Now, whether or not the census industry can be classed as politics is open to debate. She considered it in that light and strangely enough was exceedingly anxious that her husband should secure the position of enumerator. Hence he was happier even at the close of the first day than were many of his colleagues, but it was his last happy day. That night his intellect began to catch glimmering views of his wife's motive of sudden Interest in the census. This was why she had placed no obstructions in his way and hadn't lamented the waste of shoe-leather. She wanted to know. Just here his thinking apparatus went on a sort of strike as a sudden, lurid picture of the possibilities of the case flashed before his gaze. Thus the inquisition went on with queries as to whether a certain neighbor's house was paid for, and next morning this particular census man resigned his position, giving as a reason for the step that he thought so much talking was bad for his lungs, The day following his wife had a small thimble tea, and the general local knowledge that will now be found diffused in that neighborhood would be worth a page of statistics in the re-

What is puzzling the ex-enumerator at the present time is whether it was a wise thing in systematically falsifying the returns as he did in that memorable catechising process.
