RAILWAY STOPPED BY LIONS. Ate Twenty-Eight Men and Delayed Construction for Months.

From the London Spectator,

Speaking in the house of lords of the progress of the Uganda railway, Lord Salisbury mentioned that among the unexpected difficulties encountered were a pair of man-eating lions, which stopped the works for three weeks, before they were shot. As some five thousand men were at work on the Philadelphia010000050-6102
Boston10400041x-10173
Ratteries—Bernhard and Douglass; Lewis and line, their intimidation by two lions seems almost incredible. Yet it is a fact that so dreadful was the pressure exercised by the constant attacks of this pair of man-destroying wild beasts, and so cumulative the fear caused among the Indian laborers by the sight and sound of their comrades being carried off and devoured, that hundreds of these industrious workmen, trained on similar duties under hicago 0 1 0 1 0 0 0 4 0-6 12 4 the service of the government of India,00400004x-872 2 abandoned their employment and pay, and crying out that they agreed to work for wages, not to be food for lions or devils, rushed to the line as the trains for the coast were approach-...000031003x-711 1 ing, and flinging themselves across the metals, gave the engine drivers the choice either of passing over their bodies or of stopping to take them up and carry them back to Mombasa. Many of these men were not timid Hindoos, but sturdy Sikhs. Yet the circumstances were so unique, and the scenes witnessed from week to week so bloody and appalling, that their panic and desperation are no matter for surprise. Lord Salisbury understated the facts. Though the works were stopped for

three weeks, the lion's campaign lasted, with intervals of quiet when one or other had been wounded, from March till the end of December. In this time they killed and ate twentyeight Indians, and it is believed at least twice this number of natives Swahilis and the like; besides wounding and attacking others. They at tacked white engineers, doctors, soldiers and military officers, armed Abyssinian askaris, sepoys, bunniahs coolies and porters. Some they clawed, some they devoured, some they carried off and left sticking in the thorn fences because they could not drag them through. As first they were contented to take one man between them. Before the end of their career they would take a man apiece on the same night, sometimes from the same hur or camp-fire. The plain unvarnished tale of this "prehistoric revival" of the position originally held by man in the struggle for existence against raven ous beasts is set out at considerable length and detail in the Field of February 17 and February 24 by Mr. J. H. Patterson, one of the engineers of the line, who, after months of effort and | be held on Friday.

TRACING A LETTER.

Followed from Boston to Manila in Order to Perfect an Incomplete Address.

From the Boston Transcript.

the address.

Here is a good illustration of how assiduous the United States postoffice department is in following up mail which it is requested to look for and

assure itself of delivery. A lady in Boston sent a letter to her son in Manila on Jan. 10, and as it occurred to her after she had mailed it that the address was incomplete, in that it did not contain the number of the regiment in which her son served she wrote a letter to the Boston postmaster the same day, giving him the full address and asking him to trace the letter and supply the deficiency This afternoon or tomorrow morning she will be informed that the letter which she said was important, has reached its destination, the authorities in Manila having isolated it from the bulk of soldiers' mail and completed

After the necessary investigation in the Boston postoffice the postmaster sent a communication to the San Francisco office, through which most of the military and naval mail goes, and explained to the postmaster, Hon. W. W. Montague, that the address on a certain letter which was dispatched from Boston via the Boston and Albany R P. O. on train No. 10 was insufficient for its prompt delivery and he gave the full address. At San Francisco the matter went through the hands of the postmaster and the superintendent o mails, and on Jan. 18 it was referred to the clerk in charge of the naval and military mail. He made an investigation inquiry in the office and found the letter was probably received on Jan. 16 from train No. 3, and dispatched by steamer to Manila the same day, Consequently it could not be intercepted on this side of the water, but in the next dispatch to Manila the postmaster of San Francisco sent all the papers relating to the letter to the director general of posts at Manila, P. so that the deficiency in the address might be supplied there, if the letter was found undeliverable. Now the Boston postmaster has received a communication from Manila stating that the letter in question has been found. The addressee's letter of inquiry with the inclosed stamp for a reply, and all the papers which have been made out in the various postoffices relating to this letter, have been sent to her.
