creep in upon us like robbers at midnight, and rob us of hundreds of our fair sons and daughters efore we are aware of it! Every effort should be made to keep these awful disease microbes at bay. Note the epidemic of fever, cholera,

small-pox, dysentery, etc., that will sweep over the land, and then give all the encouragement you can to those who are risking their lives and giving their brain to the study of "How to De-stroy Disease Microbes!"

THE STORMS AND SIGNS.

Our July predictions that great electrical storms would result from the awful sun-spots that we discovered in June, came only too true; as

we assovered in Jube, came only too true; as millions of dollars worth of property was de-stroyed by the streams of burning lava that poured down from the san's volcano! How the good Lord must laugh at us poer ignorant menwho stand in fear and trembling at every electrical display in the heavens, when he gave us the "earth and the heavens" to subduel When an earth-magnet with kyte attachments-costing less than one thousand dollars-would ground all the electrical currents within a twenty-mile radius, and thunder storms would be a thing of the past! The greatest danger from storm neriods during the current month will be between the Ist and 7th, the 8th and 11th, the 13th and 19th, the 23d and 25th, and the 37th and 30th. There vill be three breaks in the gassous matter now naming over the sun, one between the let and 16th; another about the middle of the month; resulting in destructive electrical storms, floods, tornadoes and unprecedented hail storms. West India hurricanes will be in order and may spread great destruction along the sea coast. The heat-waves will be almost unbearable in some cities. Note the awful destruction that the old country

will experience this month by wind and wave! COMING EVENTS FOR AUGUST.

The following events may be looked for during the current month: Destructive electrical storms with tornado accompaniments; West India hurricanes and tidal waves; unprecedented storms re-sulting in destructive floads; several heamilital sumset scenes and strange-appearing circles around the sun and the moon; the falling of many meteors in all parts of the world; awful crimes and massacres; strikes and social troubles; esassination of rulers; trouble for America; the re-appearing of the yellow fover, and great fover epidemics; more trouble in the Southe. . . . an attack by the "plague" germs; great post and social excitements; tornadoes and cyclones in the Southern and Western states; destructive orms on the sca coasts; financial troubles and a disorganizing of "trusts"; great armiles of caterpillars, army worms and grass-hoppers, that

to man can number, will be seen in many ac-tions of the country; the approaching comet will be sighted by the great telescopes; many unexpected troubles may spring up in the old world, and give America much annoyance; the stork markets will be full of the unexpected, and more of small means had better been extended and men of amail means had better keep out of the "swim"; great increase of sun-spots, caus-ing unprecedented heat waves, cool waves, high gales, and destructive hall storms,
