PROBABLY FATALLY INJURED. Daniel Glynn Run Over by Train in Scranton Street Yard.

Daniel Glynn, of 225 Meridian street, a brakeman in the employ of the Delaware, Lackawanna and Western train of cars about 11.30 o'clock last filed yesterday in Prothonotary Copenight and received such injuries that his recovery was despaired of early this morning at the Moses Taylor hospital. Both of his legs were cut off, Heinz, defendant.

Glynn was lying on the tracks near Scranton street, in the West Scranton not true, and which have injured her yard, and as the train approached in name and peace of mind and the the darkness, was unseen and run like, to the extent of \$5,000. M. F. over. The Lackawanna hospital was Conry is her attorney. notified and Dr. Hunter responded with the ambulance. On his arrival at the yards, however, he found that the Moses Taylor hospital had taken charge of the case already. Glynn was a young man about 25

years of age and was well known in West Scranton.

LETTERS FROM THE PEOPLE.

[Under this heading short letters of interest will be published when accompanied, for publication, by the writer's name. The Tribune does not assume responsibility for opinions here expressed.]

Statement from Brakeman Stevens. Editor of The Tribune.

Sir: Referring to a statement made by the Lackawanna officials and published in the various papers of Aug. 3, 1900, wherein it is made to appear to the public that I, Brakeman Theodore Stevens, am reaponsible, by my failure to test the air brakes after removing a defective bess, for the accident due to the running away of the wild cut ice train down Pecone mountains, which accident resulted in the death of two persons and the destruction of motive power and relling stock and for which alleged responsibility t have been dismissed from the company's service. This is a great injustice to me and in my own

lefense I beg to make the following statement of the public, through the medium of the papers which have published the company's version of

noticed that something was wrong with the trakes, and after we had crossed over at Posono summit to allow trains Nos. 38 and 6 to go by we made an investigation and found that a hose on one car had burst. We therefore cut out that a base on one car had burst. We therefore cut out that car, replaced the imperiect base with a new one, opened the angle valve in front of the defective hose and also the one in the rear of the defective hose, thus making air line complete brough entire length of train. Engineer Thomas then pumped up his train and said his air was all right. We then started down the mountain th the disastrous results known to all

with the disastrous results known to all.

I. Theodore Stevens, was head brakeman, and my duties as such did not require ms to go to the rear of the train to test air brakes. That duty belonged to Bear Brakeman Dougherty, who was retained in the company's service, and Conductor A. Widenor, who was discharged. I will make affidavit that air brake connections on my part of the train in question were properly made, but I cannot answer for the imperfect brakes on the cars or for failure on the part of the air pump on the engine to do the

part of the air pump on the engine to do the work necessary for over-tonnage of train.

I feel confident that in view of the foregoing statement, the public will judge me fairly, and thus exonerate me from any responsibility for the disastrons wreck, which was wholly and selection to the company's furth being due to an overby the company's fault, being due to an over-loaded train and orders to wild cat down Pocone twenty-five miles an hour, instead of eighteen miles an hour, the limit of safety with so heavy Theodore Stevens.

CHARGE OF MURDER

WAS RELEASED YESTERDAY ON \$1,200 BAIL.

Young Lally, Into Whose Body Moffitt Fired Four Bullets, Has So Far Recovered as to Be Pronounced Out of Danger by His Attending Physician-Judge Kelly, After Delaying a Week, Allows Bail to Be Entered-Thomas Durning Brought In-Other Court Matters.

Thomas Moffitt, the North End youth who fired four bullets into his neighbor, Dennis Lally, four weeks ago Sunday, was released from the county jail yesterday on \$1,200 bail furnished by his father, John Moffitt,

before Judge Kelly.

Moffitt's friends, with the assistance of Attorney R. J. Beamish, have been trying for several weeks to secure the young man's release, but it was not until yesterday that Dr. John P. Stanton, the physician attending Lally, would certify to his patient being out

of danger. One week ago yesterday, when the Ninth street, an aged miner, employed at the Pine Brook colliery, was taken to the Lackswanna hospital yesterday, with his back terribly lieved, however, that in the course of not out of possible danger. He be-lieved, however, that in the course of week his patient would be able to

Yesterday young Lally was able to Judge Kelly hesitated no longer to allow Moffitt to be released. Attorney Clarence Ealentine, representing the

Moffitt, from all reports, had a narrow escape from being called upon to answer a charge of first degree murder. The wound, which threatened fatal results, was the same as that which killed Governor Goebel of Kentucky. It passed clear through the body. As it is, Moffitt can only be charged

with felonious wounding, if indeed, the case is ever prosecuted.

Durning Gave New Bail.

Thomas Durning, who was recently eleased from the penitentiary, after serving a twelve year sentence for murder, was brought into court on a capias yesterday to give security to answer a charge of discharging fire arms, with intent to kill, preferred by Stephen Hughes.

He was indicted last spring and was to have been tried at the June sessions, but failed to put in an appear ance and his bail was forfelted. His new bondsman is John McLaughlin. The offense alleged by Hughes was ommitted in a place kept by Durning. which, according to the information in

another charge on which he is under sail, is an unlicensed saloon, Durning had the effrontery to apply for a license at the 1899 sesson of license court. The court took occasion to make some comments in handing lown its refusal of Mr. Durning's ap plication.

"SCHEDULE A" NOT FOUND. Papers of the Late Judge Handley

Discovered in the Ruins. A large mass of written and blank apers were unearthed in the wreckge of the exploded bank building yes terday and turned over to the bank officials by Special Officer Hopewell, who has charge of the police arrange ments. The papers were for the most part stationery from the desks of the bank clerks, but among them also were various documents that had belonged to the late Judge Handley, including a big batch of "I. O. U." slips given by various parties, and marked by the late judge with this or that memorandum, not infrequently "N. Schedule A was not among the

papers. The work of tearing down the Lo beck building was begun yesterday, by Contractor Schroeder. Until the upper courses of the badly disturbed walls are taken down, the men working in the wreckage below will not be allowed to go into any part of the ruins in which they would be in danger should the walls tumble down. The directors of the Merchants' and Mechanics' bank will meet this morning in regular session and will probably come to some conclusion regarding a site for their contemplated new

TO ISSUE WEATHER MAPS. Local Bureau Will Begin the Publication Next Week.

Next Tuesday or Wednesday the United States weather bureau office in this city will begin the publication of the daily weather map. This weather map will show the weather conditions over the entire United States and part of Canada at 8 a. m., seventy-fith meridian, and will be in the hands of the public three hours later. The weather map is much less complicated than it appears at first glance, and if one will take the trouble to understand the symbols and lines

that appear on the map, it will well repay the effort. The principal features of the weather map are the areas of high and low barometer. During the hot waves the barometer is low over the northern part of the country and high over the south Atlantic states. If one remembers that the air flows from where the barometer is high to where the barometer is low, it can readily be seen that this arrangement of a low barometer in the northern part of the country and a high barometer in the south will cause the air to flow from where it is warm towards the north, and this accounts for the hot waves of this summer.

The hot wave will continue as long as the area of high barometer is in the south Atlantic states and the low barometer is in the northern part of application to have Moifitt released on the country, but in time this condition HIS BACK BROKEN,-George Barge, of South ball first came up, Dr. Stanton said changes and the barometer becomes high in the north and low in the south and then the weather becomes cooler. In the winter, if the barometer is high in the northwest and low, say in the middle Mississippi valley, or in the Lake region, cold-waves occur, leave his bed and walk out. This and the weather does not become mild being certified to by the physician, until the conditions are reversed. Areas of high barometer are characterized by bright, clear weather, with lower temperature, while areas of low sarometer have cloudy skies, rain and higher temperature,

These areas of high and low baromter are constantly moving over the ountry, generally towards some easterly point, and carry with them the weather conditions peculiar to each, and their rate of movement is relatively slow in summer, which accounts for the long periods of the same weather in summer, while in winter the areas of high and low barometer move rapidly which counts for the frequent changes in the winter from cold clear weather to warm cloudy, muggy weather and the reverse.

The weather forecasts are based on the rate and direction of movement of the areas of high and low baromter, which vary for each individual high and low barometer.

REPORT WILL BE A

INQUIRING.

Has Discovered That Six Horses
Which Cost the City \$1,400 Were
Sold for \$225—The Horses, While Rendered Unfit for Fire Department Purposes, Were About as Good as Ever for Other Forms of Employment - Legal Proceedings May Follow.

One of the most racy reports that ever came into councils is expected from the special committee of the select branch appointed to inquire into the disappearance of six of the extra horses of the fire department.

The horses, let it be said at first, have been found. They were sold by the fire department committee, so it appears, and they were sold for a song, it is alleged.

The investigating committee's view of the honesty of the sale can be judged of, when it is stated that one of the recommendations of the report will be that the horses be seized by the city on a search warrant, and the present possessors given the alternative of complacently bearing the loss the money they paid for them, or else suing the parties from whom they purchased them, following the method employed in recovering stolen goods,

The report will go on to relate that there were eleven extra horses in the department, some of them too old to of use to anybody, but the most of them defective only in speed and staying qualities under strain, impairing their usefulness as fire horses, but not interfering to any serious extent with their ability to give good service as

draught horses for ordinary work. The best six of these eleven horses were the one's disposed of. Two of them were the team that until a short time ago were giving satisfaction to the Franklin Engine company. They were sold for \$100. The team that the Eagle company had been using was sold for \$50. The Nay Aug horse, which was one of the best and cost-liest in the department, brought \$50. Neptune horse sold for \$25. The six horses cost the city \$1,400. They were sold for \$225.

The money derived from their sale was turned over to be credited on the bill for the new horses, but the investigating committee has served notice on the city clerk and controller

not to make any such entry. When the report is to be submitted is not definitely settled as several members of the committee are out of town and their signatures have not as yet been secured to the written
