Twenty-two guests waited long and patiently for their breakfast this morning. They stamped their feet in nervous excitement, ringing the bell and making other demonstrations to show that they wanted their morning meal. But Mr Parrott did not put in an appearance. An in

vestigation was begun. It was discovered that the proprietor had packed up his personal ef-fects and departed without even saying good-bye. One of the guests of the house was James M. MacDonald, who came here the first of August for a month's rest. THE MARKETS.

Wall Street Review.

New York, Aug. 21.-The stock market was narrow today, the only incidents of note being the movements of certain industrials. The opening was easy on London's weakness. Sugar was depressed on the strength of a reduction of cof-fee prices, which was taken to indicate a possibic resumption of the trade war in sugar, despite the remonstrance of similar prices with consum-ers. A continuance of the recent bear campaign against People's Gas accounted for its point fall. Business was only moderate during the selling and, as liquidation was not forced, the shorts commenced to cover. Before the forenoon expired prices were on the mend and there were indications of confident buying in spots. Conspicuous strength was shown by the Brooklyn Rapid Tran-sit, Manhattan and Consolidated Gas, the latter rising 234 per cent. from the lowest. New Jersey central then assumed a commanding position in the market, rising 3% per cent, to 137%, which is a record price in its recent upward movement. Revived reports were current of its probable ab-sorption by the Baltimore and Ohio railroad in the interest of the Pennsylvania railroad, the latter being credited with the dominant influence in the management of the Baltimore and Ohio. No corroboration of the report was had up to the close of business nor the statement that an ad-vance in coal prices was imminent. Coincident with the high prices registered for New Jersey Central the July statement of earnings of the road were reported showing a decrease in gross of only \$3,104, but a restoction in net of \$20,830. This showing and realizations forced the stock off to 136 at the close. Reading first preferred was the only other coaler to show any reflection of the movement in Jersey Central, the stock rising 13g and retaining the gain. While the specula-tion in these stocks were being carried on the general list was largely neglected and showed no clination to rise above the level recorded about ioon. This circumstance caused small offerings yielded, closing easy in tone, with net changes generally a small fraction either way. A feature of the closing dealings was the rapid advance of Big points in St. Joe and Grand Island first pre red, which was unexplained. Total sales, 102,-

Business in bonds expanded today and there was an active demand for St. Louis and South-western seconds, which advanced them % per cent. The general market was irregular, but variations were slight. Total sales par value, \$1,115,000.

United States refunding 2s when issued declined 14 and new 4s advanced 14 in the bid price. The following quotations are furnished The
