In these days of automobiles, motorcycles and horseless vehicles it may not be uninteresting to know that one of the early inventions in this country to do away with animal motive power originated in Kansas City, Kan. Samuel Peppard was the genius who constructed a vehicle that carried him and three companions over the plains from Oskaloosa almost to Denver. And with such rapidity, too, that he not only passed all the white people journeying the same way, but easily distanced Indian pursuers, and won for his rig the unstinted admiration of the
