# LIVE NEWS OF THE INDUSTRIAL WORLD

COAL STORING PLANT UNDER WAY AT KEYSER VALLEY.

It Is Being Constructed for the D. L. & W. Company-D. & H. Has Similar Plant at Anthracite Park, Carbondale-Large Number of Welsh Miners Have Left Lackawanna and Wyoming Valleys. Fresh Impetus Has Been Given to the Spanish Coal Miners.

In Keyser Valley the Delaware, Lackawanna and Western Railroad company is having erected a coal storage plant, where 100,000 tons of coal can be stored to meet the demand of such conditions as confront them today, when the supply is inadequate to meet the demand of even local con-

The Dodge Coal Storage company, of Philadelphia, has forty men at work, under the direction of Superintendent W. A. Yerkes, building two mammoth coal trimmers, which will unload five hundred tons of anthracite a day and re-load the same amount ready for shipment in the same number of hours

High up in the air stands two coat conveyors, constructed of steel, reaching a height of ninety-five feet in the center, which will carry the coal and enable the operators to cover a semicircle of space 625 feet in diameter. The distance from the foot of each end of the tresses is 326 feet.

The surplus coal is to be unloaded in two hoppers built in the ground be-neath the railroad tracks. It is then conveyed by an endless chain up the trusses and distributed in two piles. As the coal starts up the trusses it is distributed from a steel ribbon underneath the base of the truss.

The average drop of the coal will be from two to five feet. Beneath the trusses there is a series of rails on which will be operated a machine for re-loading the coal. The machine is built over the tracks, with another endless chain conveyor attached.

This conveyor brings the coal back to the re-loader and conveys it up to another hopper above the tracks and drops it into the car ready for shipment. The services of four men will be required to operate the machinery. Steel plates will be used in shoveling the coal from the piles into the con-

The return hopper is reached by in cline channels fifteen inches deep and twenty-four inches wide, built of structural steel. The entire machinery will be operated by rope drivers and a ninety-horse-power Eric engine. The steam will be furnished by the boilers at the Hampton breaker. This engine will operate both trimmers and the re-

The Delaware and Hudson company have in operation a similar trimmer at Anthracite park, Carbondale, and the Dodge company is now building trimmers for the Susquehanna Coal company at Millersville, Pa., and the Ontario and Western company at Corn-

# Welsh Miners Leaving.

Over five hundred Welsh miners have left Wyoming and Lackawanna valleys since the strike. Some of them have gone to the far west, but many have · returned to Wales. The demand for ood miners in Wales is so great that a good miner can get work without much effort. The majority of the min-ers that leave the United States for Wales go to the Rhondda Valley, while a good many go to the anthracite dis-trict of South Wales.

A word or two as to the anthracite region of Wales will be of interest just now. It is a scattered region and extends from Hirwain to Trimsaran, in Carmarthenshire. It comprises forty collieries, which provide employment for about 7,000 workmen. The collieries have an output of 2,000,000 tons per annum, and the increase in output last year amounted to 17 per cent., as against 12 per cent., which was the highest in any other district, thus showing that anthracite coal, or, as it is called in Welsh, "glo careg," is rapidly gaining favor as a house fuel.

Undoubtedly there is a great future for this particular class of coal for do-mestic use, and it will certainly be in great demand when the proper appliances can be obtained for its consumption. At present there is a great deal of competition between sellers of this particular fuel and those of coke for malting purposes. When the prices of the coke are moderate purchasers generally give preference to the anthra-cite, and vice versa. The western district is practically unworked, but, as the demand for the coal increases, we may expect to find a very large num-

A man who has been running a race with steam and electricity for years, finds himself suddenly stopped. It seems as if a cold hand clutched his heart. His brain whirls; he can hardly see. "What is it?" he asks himself as the attack passes.

If his question meets a right answer, he'll be told that his seizure is

a warning to pay more attention to his stomach, which is already deranged by irregular meals and rich foods. Doctor Pierce's Golden Medical Discovery cures diseases of the stomach and or-gans of digestion and nutrition. It sliminates from the blood disease breeding poisons. It makes the blood rich and pure, and furnishes a found-

ation for sound, physical health.

physical health.

"About ten years ago I began to have trouble with my stomach," writes Mr. Wm. Connolly, of 533 Wainut Street, Lorain Ohio. "It got so bad that I had to lay off quite often—two and three days in a week. I have been treated by the best doctors in this city, but got no help. Some said I had cancer of the stomach, others estarrh, others dyspepsia. Then I wrote to you for advice. You advised the use of your Golden Medical Discovery' and 'Pleasant Pellets.' These medicines I have taken as directed. I commenced to get better from the start, and have not lost a day this summer on account of my stomach. I feel tip-top, and better than I have for ten years."

Keep the bowels healthy by using Dr.

Keep the bowels healthy by using Dr. Pierce's Pellets. They don't gripe.

An odorless, colorless liquid; pow-erful, safe and cheap. Instantly de-stroys foul odors and chemically neu-tralizes disease-breeding matter.

Especially prepared to meet the daily sanitary uses of the careful housekeeper, for purifying the waste pipes, water closets, sinks, cesspools, etc.; for sprinkling about the cellars, stables and all suspicious places where disease germs best to the control of lurk.

Sold in quart bottles only, by druggists and
high-class grocers, Prepared only by Henry B.
Platt, Platt street, New York.

ber of new collieries being opened in the near future. The newly elected agent of the anthracite miners is Daronwy Isaac, who for several years was president of the

### This and That.

tion.-Wilkes-Barre Record.

The coal storage yards now being laid out and constructed by the Philadelphia and Reading Coal and Iron company, at McClellan, near Millersburg. Pa., will be the largest in the world. Some sixteen towers will be erected with a total capacity of over 800,000 tons and the company has set aside \$500,000 for the completion of the work

A cablegram from Madrid says: "The advance in the price of coal has given fresh impetus to the Spanish mines, that were considerably developed during the war with America. The output of coal from 1899 was 2,672,000 tons of lignite and 70,000 tons of coke. The total production for the first eight months of 1900 shows an increase of 30 per cent. The miners are worked entirely by native capital, and the lack of proper means of transportation alone hinders the development of the vast coal beds of the nine provinces."

A cablegram from London says: "The strike in America has diminished the pressure of foreign competition in export coal, and the midland trade has consented to successive advances in miners' wages of 5 per cent. in October, January and February. Mine owners have warned the wage-earners that these advances may be only temporary, as the price of coal is unduly inflated and cannot be maintained without involving heavy losses in general manufacturing and in closing many factories.

actories."
The big Nescopeck creek has been tubber.
Union Pacific .......
nt for Pacific Pr ..... lowered so much by the protracted drought so as to close down a number of grist and saw-mills in Sugar Loaf and Black Creek townships. The water power has never been known by the oldest residents to be so weak. The large saw-mill at Honey Hole has been closed down for over a fortnight and it's now ten days since a wheel has turned in Shellhammer's grist mill, near Mountain Grove. At several points in the stream there are only about three inches of water, where it was formerly several feet in depth,-

# RELIEF WORK IN GALVESTON

A Perfected System Under Control of American National Red Cross.

By Exclusive Wire from The Associated Press. New York, Oct. 3.-The system of redistribution now in operation in Galveston is described in the following telegram from Miss Clara Barton president of the American National Red Cross:

Upon the repeated solicitation of the local an thorities, the Galveston local relief committee composed entirely of men, and the Local Red Cross Emergency committee, composed entirely of Galveston ladies, have been merged into one committee and organized into the Galveston aux iliary of the American National Red Cross. The entire work of distributing rations, clothing and other relief supplies has been transferred to the new organization, all such work to be immedi ately and henceforth conducted under the ausniand by direction of the American National Red

Not the slightest interruption of the work has taken place. The ten ward distributing stations will be continued as found necessary, accession of the Red Cross ladies, one of whom has been appointed as vice-chairman for each ward, with three or more assistants to aid in the assorting and delivery of goods at relief stations, with additional accessions of ladies for each ward station to any number that may be found neces sary, who shall make systematic investigation in certain streets assigned to them of the worthi ness of all applicants for relief. The work, being thus systematized, can be most thoroughly conducted indefinitely. The relief by this painstaking and systematic method will have to be con-tinued many months.

The accession of the Red Cross ladies to the The accession of the Reil Cross ladies to the distribution committees is hailed with great satisfaction by the chairmen of those committees, nearly all of whom, being leaders of the different wards, also have charge of the gangs of men engaged in removing the millions of feet of splintered lumber, debris of all sorts and remaining dead bodies, their time being almost wholly re-quired in that direction. The relief work is thus most completely organized and reduced to a per-lect system. The skill with which it was first organized and has thus far been conducted is a marvel to us. The leading business men of the city have labored day and night upon the committees, and have completed a thorough census of the present city as to names and present abodes of sufferers, their pressing wants and whether or not each person or any member of a remaining family is able to do day's labor. Fair wages are being paid for labor in the great task

of removing the debris.

The most imperative subject now before the committee, and the one greatest in importance next to the sanitary relief in cleaning the city, is that of providing suitable homes of a temis that of providing suitable homes of a tem-porary nature for more than 8,000 homeless per-sons. The committee is formulating a compre-hensive plan now for the purpose of meeting with that great necessity. Immense quantities of lumber, nails, roofing and carpenters' tools, and a large fund of money, will be necessary to suitably meet this need. In every instance where possible the sufferers will be expected to furnish their own labor in the reconstruction of their homes, thereby keeping every one employed. homes, thereby keeping every one employed.

Clara Barton.

Contributions for Miss Barton's work in Galveston should be sent to the Red Cross Texas Relief Fund, 156 Fifth avenue, New York city.

# PERUVIAN POLITICAL CRISIS.

New Ministry Not Yet Formed-Re-

ports of Rebellion Discredited. Exclusive Wire from The Associated Press. Lima, Peru, Oct. 3 .- No new cabinet has yet been formed to replace that of Senor Zegarra, just resigned. It is reported that Senor Durand and Senor Parra have fomented a revolu-tion at Huanuco. The reports, how-

ever, are not given credence, as it is asserted that Durand is now in Lima, and Parra, who has just organized an mportant mining syndicate, would not be apt to head a revolutionary movenent. The reports are believed to have had their origin in the fact that a battalion of infantry was sent to Huanu-co for the purpose of maintaining order there. The population is greatly excited over the destruction of the convent there last August. The fire is be-lieved to have been incendiary.

# THE MARKETS.

Wall Street Review.

New York, Oct. 3 .- Wall street was considerably puzzled by the resumption today of aggressive tactics for the advance, after the bull campaign, projected on Monday, seemed yes-terday to be abandoned. But while the motive of the rise was difficult to discern the force and the proportions of it were sufficiently im-pressive to take the courage out of the bear The household disinfectant. party and to induce heavy covering all around. This ultimately effected a buoyant rise in the party and to induce heavy covering all around. This ultimately effected a buoyant rise in the whole market which closed strong and active at the highest level of the day and at net gains ranguig from to to over 2 points for a large number of active stocks. Stocks which have recently been the special target for bear attack reflected the most urgent demand today. Missouri Pacific, which is a leader of this class, showed gathering strength during the day. From the early low point it was carried up 3½ per cent. Burlington also reflected a demand of a large outstanding short interest and was marked up an extreme 2½. Baltimore and Ohio, Northern Pacific and Louisville were also prominent in this class, but the movement gathered force and breadth and ultimately spread through the whole list. The most buoyant period of the market was due to the circulation of a rumor that President Mitchell, of the Mine Workers' union, had called the coal strike off which completed the discomfiture of the shorts. Even Tennessee Coal, which had sold down 3¼ on the fear that no dividend would be declared at thomorrow's meeting, rallied 4 points, and Sugar, which had fallen 2½ on account of the demoralized condition and the deep cutting in prices in the refined sugar market rallied 1½. Total sales, 403,000 shares. Bonds were not much affected by the activity in stocks, and price changes were mixed. Total sales, par value, \$000,000. United States bonds were unchanged in bid price. Rhondda Labor and Liberal associa-
