The institute was highly successful from start to finish and its management reflects great credit upon our popular county superintendent. Professor Charles E. Moxley, of Haledale, the instructor received by the teachers this week has been of the most practical kind and it cannot be doubted that the teachers return home with richer treasures of knowledge and better equipped to successfully continue their noble work of education of the young than before.

The most important feature of the institute yesterday was the annual meeting of the County Directors' association. The association was called to order by the President, F. A. Davies, of Clifford, who delivered a brief and scholarly address, in which he spoke of how few school directors have knowledge of their full powers and the heavy responsibilities of their position. Directors should take pains to inform themselves as to these matters and then act accordingly, even though they might become objects of criticism by some citizens by so doing. Mr. Davies urged the directors to provide school libraries, which could be done without great expense and would be of inestimable value to the scholars, and to act accordingly, even though they might become objects of criticism by some citizens by so doing.
