It is evident that the company means business ter, Mrs. Femcher, at Montrose, Tuesfrom the start and is not going to allow any time to elapse from the signing of the lease until they have established another flourishing mining town for Sullivan county. To this end the contract has been let for fifty dwellings to shelter the miners and laborers who will be attracted to the works. A railroad will also be built from the mine to a point on the Lehigh Valley railroad between Lopez and Bernice. The property gives every inlication of developing into a successful coal field. There is a well-defined

vein of coal seven feet thick, from which has been taken anthracite of a much better and harder quality than that mined at Bernice. A drift has already been dug into the hill, from which hundreds of tons have taken since the discovery in 1898, and there seems to be plenty of it. The location is in the township of Colley. and it will follow as a natural consequence that Dushore will become the trading metropolis of the new region. The gentlemen concerned are practical coal operators and something important may surely be expected, as they

are backed by the necessary capital.

strength which were confidently marshalled from among the stocks which have not yet enjoyed any considerable boom. The point wherein to-day's market differed from the exchange history was that the prefit taking was renewed in force before the close and the unsettled continued un-til the raiding ceased. The failure of the money market to harden was the occasion of a strong rally from the opening break in which People's Gas, Brookbrn Transit and Sugar were forced down from 1½ to 3 points. The striking fea-ture of the buoyant market which prevailed dur-ing the middle portion of the session was the inconstancy of the strength and demand for special stocks. A rapid price movement in an individual stock would be followed by a sharp reaction, while the speculative demand would shift hurriedly to other quarters. A few min-utes' consultation between traders on the floor would result in the formation of a pool to take all offerings in some incompicuous stock. After these were absorbed the price would be rapidly bid up 1 or 2 or 3 points. Such a manouver never failed to attract a horde of speculative followers buying orders coming from both within and without the exchange. These short time pools had no difficulty in liquidating their hold-ings at a handsome day's profit. The list of stocks in which this operation occurred includes many of the high grade railroad stocks, as well as those known in stock sechange parlance as cats and dogs. An incident of the day was the rise in St. Paul abive Burlington. This supremacy was contested, the friends of Burlington rallying the stock again to above St. Paul, but the latter stock within a half of the top and 34 above Burlington. The late reaction in the market was unexplained by any special incident and wes evidently due merely to a general desire to con-vert paper profits securely into cash. Total sales, 1.460,000 shares. The demand for honds was not so conspicuous as yesterday, but there were strong points in the market. Total sales, par value, 55,025,000. U.
