It will be an in teresting occasion when the annual reports will be read and election of officers for the ensuing will display its interest in this most worthy in-stitution by attending the meeting. All annual nd life members are privileged to vote. The eports are always intensely interesting but this year especially so, and a large attendance will be appreciated by those who work so long and ithfully to promote the good of the Home.

nd tea served yesterday at 218 Wyoming avenue or the benefit of the grounds committee of the lome for the Friendless will be repeated today eginning at a quarter before 12 o'clock, committee in charge yesterday consisted of Mi Jennie Reynolds, Mrs. Preston Robinson and Miss Martha Dimmick, assisted by Mrs. B. M. Winton, Miss Van Cleef, Miss Eleanor Reynolds and other. Many patrons were entertained and i is hoped that business men will patrenize the oms today at the moon hour and that ladies cill drop in during the atternoon as well as for hincheon.

### LOST LADS RETURN.

#### The Three Lloyd Boys, of Bridgeton, Were Not Drowned.

By Exclusive Wire from The Associated Press. Bridgeton, N. J., Jan. 10 .- The report that Arthur, Eddie and Freddie Lloyd, aged respectively 11, 8 and 5 years, were drowned, is incorrect. The boys left home together yesterday and walked to Millville, ten miles distant, and walked back today. The older boys had to carry the little fellow part of the way back. He is in bed. His feet are terribly swollen and a serious

illness is feared. The parents knew nothing of the whereabouts of the boys and were greatly distressed. Searching parties were out all night and this morning, and it was the general belief that the boys had gone on the ice on a lake near here and had broken through and all drowned. The mother was made ill through worriment and was obliged to take to her bed.

#### MARRIED AFTER FIFTY YEARS. Courtship Renewed When Half Century Had Passed.

By Exclusive Wire from The Associated Press Daretown, N. J., Jan. 10,-Monday night Pastor Farley, of the Baptist riage. Fifty years ago Rhoda Richer, of Whig Lane, formed the acquaintance of Jeremiah Joslin. Mr. Joslin went west, settled in Ohio, married a wife and became a prosperous farmer. Rhoda married William Davis, of Salem, who died fifteen months ago.

About the same time Mr. Joslin lost his wife and son by death and came east last June to spend the summer. He met Mrs. Rhoda Davis. They renewed their acquaintanceship and their marriage followed. The couple will reside here.

#### SMALLPOX IN NEW YORK. Board of Health Is Informed of Two

By Exclusive Wire from The Associated Press. New York, Jan. 10.-The board of health was informed of two new cases of smallpox today.

The board's counsel has been in-structed to apply for a warrant for the arrest of Dr. Montague R. Leverson, of Brooklyn, who is reported to have said that he had treated thirty cases of smallpox without reporting them to the board of health, and to have advised his hearers to shoot persons who might attempt forcible entry to their houses to vaccinate them.

# MEETING OF ARCANUMITES

They Listened to an Address by C. Comegys.

Scranton conclave, No. 923, Royal Arcanum, was visited at its meeting last night by members of the councils at Green Ridge, Dunmore and the Lackawanna and Electric City coun-

After the regular business had been transacted, those present listened to an address by Past Regent Cornelius Comegys. It is the intention of the council to have a lecture or entertainment at each meeting during the coming year.

### AN EPIDEMIC OF LA GRIPPE

THAT'S WHAT PHYSICIANS SAY IS COMING.

Dr. S. P. Longstreet Says That Another Epidemic of the Disease Like That of 1889 Has Just Started in. Dr. Allen Advises That Precautions Be Taken-Views of a Number of Other of the City's Leading Physicians-Impossible to Tell the Exact Number of Cases in City at Present.

In the opinion of a number of the city's leading physicians Scranton is threatened with another epidemic of influenza or la grippe similar to the one which wrought such dire distress some ten years ago.

The disease follows lines of travel and the last big epidemic was traced to Russia from whence it spread to Continental Europe and across the At-lantic ocean to this country. The fact that New York city is now seeing the beginning of another big epidemic of the disease and that Scranton is in such direct communication with that city leads local physicians to believe that the large number of cases which have so far developed in this city are but the forerunners of an epidemic. Dr. S. P. Longstreet is one of the

tion that the disease is going to be dangerously and widely prevalent during the next two or three months. Said he yesterday to a Tribune man: "I have encountered an exceedingly large number of cases of la grippe during the past week or two, and I believe we are going to have another

physicians who believe beyond ques-

epidemic of it. We of course meet with a certain number of cases every year about this time, but not so many as just now

NOT AS SEVERE. "Neither are they so severe as the cases which have come under my observation during the past week. fever of many of my patients who are suffering from the disease, I find to be very high and I also find that bronchial troubles accompany the dis-

ease in many instances. Indeed, I

have just had several cases of pneumonia growing out of it. "This is a very bad sign. The severer the form in which this disease manifests itself, the greater probabil-Ity there is of it becoming widespread. think the people of this city are in for an epidemic of the disease and

that the greater precautions they take to ward it off, the better it will be." Dr. W. E. Allen, health officer, said that he was treating a number of cases of la grippe, but that things had not assumed a condition as yet which would warrant him in saying that an epidemic was to be expected.

"I have a number of patients suf-fering from the disease," said he, 'some of them very severely, but I can't say yet that it's going to be epidemic. Still its better for the people to believe that it's going to be so that they will take the proper precautions to ward it off. What are the precautions to take, you ask? Simply the precautions which any one would take to keep themselves from taking

### THE REMEDY.

"Keep out of the night air as much out of the wet and slop on a day like This is an ideal day for the this. grippe. The person with a cold is the person most likely to take the grippe. If you get a cold try and cure it as quickly as possible and don't let it

get a hold of your system." Dr. A. J. Connell, when seen, said that la grippe was very prevalent. "I have had a hundred cases within the past week," said he, "I can't say that many of them have been very severe, however, I should say that it's milder type than usual. I believe nevertheless that we're going to have an-

other epidemic of the disease." Dr. J. J. Sullivan, of North Scranton, said that the disease was very prevalent in that part of the city. "I've just got over a severe attack myself," said he, "and I've got a large number of patients laid up with it. Many of the cases are very severe, too. believe that there will be an epi-

temic of the disease." The act of assembly governing matters of health contains no provision regarding ta grippe and hence the ocal board of health has no special power to take any precautionary measures to prevent its spread. It is a disease which it would be extremely hard to control by the enforcement of any especial sanitary regulations. Physicians do not report it to the secretary of the board of health and for that reason it is impossible to ascertain anything like the exact number of cases in the city at the present time.

IT IS DIFFERENT. Dr. C. W. Roberts, in discussing the la grippe epidemic with a Tribune man last night, had the following to say: "This epidemic is much different from any we have ever had before. It is more persistent, and leaves a persist-ent cough. The first symptoms of the disease are a headache, high fever and aching of the bones. The number of cases are increasing daily. They should be taken promptly in hand and people should not delay seeking medical attention when the symptoms are first noticed." The doctor depreciates the public's

### Saving Money

To save money, and do it right, is an art-takes talent and skill. Seems easy-is easy for a few "pinch-penny" people; but they don't count for general progress. Every home, every business block, every factory, every railroad, every line of steamships, every materialized factor of progress is a visible and indisputable that one day some one SAVED. There must needs have been a beginning to every purpose-a planning to put in such dollars as would turn out suc-cess. And every dollar was, of necessity, a SAVED dollar-the

builds anything. Many of the world's largest successes had their start in a cultivated habit of saving-the kind that counts; and the way for such is ever open.
