The sewer on Hospital street, now in course of construction, the necessity for which some of the members of the board appeared before and fermonstrated to councils, will be a great boon the residents of that locality and the city at e. There are several other portions of the which the board would like to see sewered and which will be brought to your attention at the situation demands, but there is one district which, in our opinion, needs immediate g the preliminary steps for the construction a sewer along the Racket Brook to sewer om Williams avenue and Brook street, and from Terrace street to Spring street, and thence in middle of Brook street to Laurel street. Once there, it stays until it is cured. La grippe is one of the ills that time will

not cure.
The after-effects of la grippe do not locate in any particular organ. It amounts to a general irritability of the mucous membranes of the whole It body-a flabbiness and paleness of the nucous membrane. Sometimes there is an over-amount of thin, watery musecreted, and at other times there is a dryness of the mucous surfaces. There is no remedy in the world that meets the conditions produced by la grippe better than the remedy Peruna. Peruna strengthens as it "renovates, soothes while it stimulates, heals as it expurgates.

Peruna is not a purgative, or cathartic, or sedative, or stimulant, nor a vegetable or mineral poison. It reaches the source of all discusses of the mucous membranes by its action on the vasa-motor system of nerves.
