Week in General Business Without Striking New Features.

lusive Wire from The Associated Press. New York, Feb. 1.-R. G. Dun & Co.'s Weekly Review of Trade tomorrow will say. The week in general business has

been without striking feature, but in this respect the outcome has been favorable. Not one of the great industries finds any scarcity of orders for goods, and business is done at prices which show a slight tendency to rise except in textiles, which have been affected by the reduction of ten to twenty per cent. in the season's opening prices by the American Woolen afflicted with respiratory diseases, company.

While steel mills have contracts on hand for their output from three to all medical men. It seems, however, six months ahead, prices naturally rule firm. Few actual advances are recorded, but there is expectation of ducting the ordinary affairs of life, the a higher figure soon for Bessemer pig | moment they find themselves afflicted iron, while rumors are numerous as to a rise in billets, plates and struc- their head; forget to use their reasontural materials. All these lines show Wire nalls and la brisk demand. voting Miss Heggerty a delightful barbed wire were advanced \$2 per ton. owing to heavy orders from the west, and it is expected that the few mills

still idle will shortly resume.
Activity in Texas oil fields has in influence on the sales of pipes and tanks. Wages are in a fair way to be satisfactorily adjusted at Valley furnaces: the reduction agreed upon is less than originally announced. Export orders decrease and the Russian armor plate contract may not go to an American, although his terms were the best. Boot and shoe dealers receive more orders, and although quotations are nominally unchanged. many makers refuse to receive contracts without a small advance. A sudden increase in sales of wool

at the three chief eastern markets to 3.412,000 pounds, against 2.893,400 in the previous week does not appear significant. After such an unuasually full season, some recovery was in order.
