RETURN OF REV. J. B. SWEET, D. D., UNCERTAIN.

Possibility of His Going to Some Other Charge After the Conference Meeting in West Pittston-Prospective New School House for the Twenty-first Ward - Mysterious Shooting Affray-Edna Hunt Sent to Florence Mission-Other News Notes and Personals.

It is rumored that Rev. J. B. Sweet D. D., pastor of the Simpson Methodist Episcopal church, will not return to the West Scranton charge.

His congregation has requested hi return and have so notified the presiding elder, but whatever Dr. Sweet's own wishes are in the matter, the conference will undoubtedly sanction them as he has been a leading light in the sessions for many years.

Prospective New School.

The residents of the First district of the Twenty-first ward are rejoicing over the prospects of a new school house in West Park during the coming year.. It is understood that Controller Leonard has received the assurance from other members of the board that he will be favorably considered in his endeavor to erect a building in the new plot.

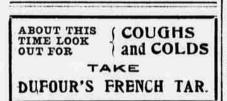

The present structure at North Main avenue and Cemetery street is entirely inadequate to accommodate all the children in the district, as the children from Tripp Park alone will fill a goodsized building, and during the past year about thirty families have located in West Park, and many of their children are now attending No. 18 school. is quite possible that the West Park Land company will offer liberal inducements to the city for the location of a school house on their tract

Edna Hunt Committed.

Upon the advice and suggestion of her father, Edna Hunt, the fourteen-year-old girl arrested Saturday night, was committed to the Florence mission yesterday. The child needs to be looked after. Edward Padden and Thomas Barry, who were accused of assaulting the girl, were each held in \$500 ball for their appearance at court Each of the other four men were lib crated after paying their fines and furnishing \$100 for each of their appearance at court as witnesses.

Entertainments Last Evening.

The social and entertainment last evening at the Fourth ward mission school was liberally patronized, and the different numbers by the particle pants elicited much applause. A large assemblage was also in at-tendance at the entertainment and social given in the First Welsh Congregational church, South Main avenue. At the conclusion of the programme, cake and coffee was served.

Breaker Boys Instructed.

The members of Local No. 637, United Mine Workers of America, met in Cooperative hall last evening for the purpose of instructing the drivers, breaker

boys and doortenders employed at the Continental mines in the proper way to go about matters without resorting to the petty strikes, which cause so much inconvenience.

Secretary Walter Jones and others imparted the proper knowledge to the boys

The Silk Department At the Globe Warehouse

Is one of the recognized features of this city, because it has not a duplicate for hundred miles around. It is a complete department in every sense of the word, and the marvel of every stranger visiting us, is that a city like Scranton can maintain a silk department of such generous proportions. But when you consider the fact that we have been building it up and educating the people to the fact that we carry everything that any silk buyer can want, there is no mystery about it. We have the stock, the outlet for it and as keen a grip on the market as any house in the trade possesses. Silk buyers will find this department exceptionally interestesting just now, as it is bountiful of the season's newest and best productions.

for five locks on the Atlantic side and four locks on the Pacific side, between Lake Nivaragua and the oceans; the lake itself to be held at a summit level from 104 to 119 feet above mean sealevel, by an enormous structure to be known as the Boca San Carlos dam. The Panama route will require but two locks on the Atlantic side and three locks on the Pacific side to reach the maximum elevation of from \$2 to 90 feet at Lake Bohio. This lake also must be protected by a heavy dam, and the Culebra cut, so-called, west of Lake Bohio, will be 7.95 miles long and 274 feet deep at the highest point. It is estimated that eight years would be required to complete the excavation of this cut, which is the measure of to lick the time required to finish the canal by the Panama route. By the other route ten years in the aggregate are called for; two years for preparatory work and the opening of Greytown Harbor, and eight years thereafter for the construction of the great dam, which will be about 150 feet high at the deepest part where a rock foundaion can only be reached 100 feet below low water in San Juan river.

The cost of a completed canal upon each route has been carefuly estimated, the same basis of computation of each unit being used in both cases. The result arrived at is \$200,540,000 for the Nicaragua route and \$142,342,579 for the Panama route. In the latter case, however, much work not included in the above estimate has already been done, the value of which on the same unit basis is given at \$33,934,463. The amount which has been expended by the Panama Canal company is much larger than the total requirements of that route would have been on the plan laid out by our commission; the funds raised for this purpose by sale of stocks and bonds being stated as \$246,-706,431,68, for which securities were issued of the par value of \$455,559,332.60. From the figures above given it is evident that about \$55,000,000 could now be paid for the existing assets of the Panama Canal company, and the work completed on the commission's plan at

the same cost as that required for a The elevation also is greater on the canal on the Nicragua route, . .

Commission were at first inclined to prefer the Panama route to the Nic aragua route, and the summing up of the comparative physical advantages of each tends to the advantage of the To begin with a canal at fermer. Panama would be very much the shorter, only 44.79 miles in length as against a total length of 186.53 miles by the Nicaragua route. In the former route there would be 7 rulles of deep water at Lake Bohio, and in the latter route 17.26 miles of San Juan river and 48.74 miles of Lake Nicaragua not requiring improvement, making 66 miles in all; thus leaving in one case 37.79 miles and in the other case 120.53 miles
