tendent T. S. Lloyd to Recognize the Union or Receive Any Demands Made Through It, a Committee of Shop Employes Yesterday Waited Upon Him-His Refusal of Nine Hour Day Precipated Strike at Noon Yesterday.

Between six and seven hundred mer employed at the machine shops of the Delaware, Lackawanna and Western Railroad company went on strike yesterday noon, because of the refusal of Superintendent of Motive Power and

Machinery Lloyd to grant their demand for a nine hour day. 'Superintendent Lloyd stated in the answering letter to the demands, which was published in yesterday's Tribune, that he would in no way recognize any requests made through any save shop employes themselves, and this resulted

in the Lackawanna men yesterday taking the matter out of the hands of the council of affilated machine, boiler, car, blacksmith and pattern shop employes, electing their own committee and waiting upon Mr. Lloyd yesterday

morning. They were in session with him long enough to receive a direct refusal of their petition. A meeting was held of the employes before they went in to work, and a committee of sixteen men chosen to onfer with Superintendent Lloyd. They were admitted to his office about 10 o'clock. They had been instructed at the meeting to ask an inunedia.e

refusal to recognize the union. One of the members of the committee was asked by Mr. Lloyd what he represented, and declared that he was present as a union man, but the general impression conveyed by the committee was that they were there as

First Kindly put me on avourd through y during us having teil rothing to do with relating a cessation of work on the part of a Delayane, Lackawanna and Western rainoad men today. Several days ago I warned My Elvin the new were aneasy and hard to hole out we hoped to keep in line. Every means it by power was brought to hear to avoid a strik this time, and I think the inducate of myalf as chairman, and of the organizations affili-ated would have been effective had Mr. Llove himselt not insist d on dispensing with it and aparating his men from the influence of the rest,

far as he could. The first that he time insisted on separating ern, and his communication, caused them i a separately with the result of which you ar aware, I am sure I seek to gain no fine points of "recognition" for myseli or those I represent in this matter, but for the neare of this city

ast now, some one better have a restraining furnee on the new concerned. If the employers thick flow can substitute anything better than that which exists I for one effer them ras on pertunity, and an willing to give them all opertonity necessary to deal with their employ acparately, as Mr. idoyd did. I wish to again repeal I had nothing to do with calling the Delaware. Lackswanna and Western railroad men out today, and knew nothing of their meetings with Mr. Lloyd this morning, nor their final action, until I was sent for at about 2.15 p. m. to pre-

side over the meeting. Now they are out, my support and the sim-port of the other unions affiliated will be freely given them along all right lines, and we hope to move as one man for the nine-hour day. Respectfully,

Humphrey B. Campbell, Scranion, Pa., May 7 Chuirman. Tonight, Elbert Hubbard, at Bleyele

WANT A STATION IN DUNMORE. Citizens of That Borough to Petition

the Lackawanna.

The residents of Dunmore are again making an effort to have the Delaware, Laekawanna and Western Railroad company erect both a freight and pasinger station in the borough.

Several petitions are being circulated and numerous signatures are being seured. The petitions are addressed to President Truesdale and the directors of the company, and suggest that the station be located at or near the foot of Smith street. They point out that Dunmore merchants desiring to ship freight by the Lackawanna are obliged to haul it a distance of two miles to the freight station in this city.

is a lecture worth a dollar? Hubbard's is.

PINATHAR ENTERS BAIL.

Sudden Re-appearance of the Assailant of Michael Angrosini.

Lawrence Pinathar, the young Italian for whom the Dunmore police have been industriously scouring the bor-ough during the past two weeks, and vho is charged with having stabbed Michael Angrosini with a knife, yes-terday suddenly appeared before Burgess Burschell and entered bail in the sum of \$500 for his appearance at court. He gave no explanation of his whereabouts during the past two weeks, but t is thought that friends have had him in hiding and now that Angrosini s practically well again and no more erious charge than aggravated assault and battery can be preferred against Pinathar he dared to venture forth again.

ighty agent for good. He then stated that while the meter cological bureau can predict wind storms and thus warn localities to the protection of life and property, there is no such certainty about rain or snow. which may be purely local. Then, in the midst of suppressed laughter from the audience, he began on the subject of that 4th of March last. INAUGURATION DAY WEATHER.

"On the 3rd of March." said he-'not a cloud was to be seen for hundreds of miles westward. Now in the winter, rain or snow always comes from the west. In the summer, rains are often local and may fall in any place, but that day there was a clear bill of health west for 2,000 miles and I had no idea that there could be anything but a clear day, and there came that littel storm right over Washington and Baltimore, It would never happen again in a thousand years, and it was all because of my prediction, of course. "There was a newspaper man who

came to get my explanation, and I told him to go go off and write the very meanest, ugliest things he could say and I should feel obliged to him. for I had intended having a man to kick me all over town."

The professor described the methods used in taking observations over the greatest area in the world from South America to the Canadian Northwest, from which come reports

see daily from all stations. A number of stereopticon views were shown, illustrating the movements of storm centers and the plans used for danger signaling. In the case of severe cold waves the bureau's warnicgs had been the means of saving \$4. 000,000 in property in the south. A West Indian hurricane was gra-

phically portrayed and the Calveston porror was described in its relation to he bureau.
