STRIKES THE SOURCE.

A Pile Cure That Goes to the Root of the Disease.

There are lots of lotions, ointments and salves that will, through their soothing influence, relieve temporarily the pain incident to piles. But is that all the sufferer requires? Isn't it a horrible thought to realize that the cause is only temporary and the disease goes on under the surface without a moment's interruption? Wouldn't it be wiser to select a remedy that seeks the source and regulates those deep seated disorders which induce the disease? Pile Cure not only relieves the pain at once, but effects a permanent cure of the worst form of piles. You don't have to go through a tedious course of dieting while using it, either. It strikes through those delicate membranes and tissues and sets the blood in healthful circulation, reducing at once the painful inflammation and congestion. This remedy is not a haphazard combination of drugs, but is a remedy invented by specialists who have treated piles and all blood disorders successfully for years. Manufactured by the Pyramid Drug Co. at Marshall, Mich. Almost any first class druggist has the cure, or you can order it direct with every lotion and salve that comes along. Remember the parts affected are the most delicate in the human body. Do not treat this disease lightly and no one need fear to apply it freely on the most inflamed parts. The speed with which it allays pain is an agreeable surprise to the sufferer.

THIS AND THAT.

Peiman, upon his election as grand commander of the Grand Commandery Knights Templar of Pennsylvania, which held its convocation in Reading last week, has the honor of a beautiful sword presented to him by Melita commandery, No. 88, Knights Templar, of this city, and of which he is a past eminent commander. This sword is conceded to be the most valuable of the season.

The presentation of Melita commandery's gift to Grand Commander Peiman took place after being installed in this high office. The presentation speech by Eminent Sir A. J. Colburn, was highly commendable to the occasion. This sword is on exhibition in the window of W. W. Berry's jewelry store, 222 Lackawanna avenue.

A man who speaks by the book when it comes to combative doings is authority for the statement that at Tuesday night's meeting of the select council some action will be taken looking toward the cutting out of the salary of the health officer. Those councilmen who are behind the scheme contend that there is absolutely no use for a superintendent of the bureau of health and a health officer and believe that the work of these two offices can be easily done by one and that the \$800 salary now paid the health officer can be used to better advantage for some other purpose. Just what form in which the matter is to be brought up could not be learned.

The firm which this (machine) strike may indicate upon the general business committee will be dissolved in Scranton, Pa., where the merchants fear the removal of several large industries from their city to localities where the strike fever is less prevalent. The local board of trade is endeavoring to make a treaty between the merchants and their former employees, hoping to avert from Scranton this threatened blow to the city's prosperity, but is said to have met little encouragement from the labor party just far—New York Tribune.

The American Medical association, which is the supreme medical body of the United States, holds its annual meeting this week in St. Paul, Minn. Dr. J. C. Bateson, of this city, is on the program for a paper entitled "A Medical Examination as a Pre-requisite to Marriage." The doctor has agitated the importance of this question for a number of years, and recently the subject has been brought before the legislatures of several states, including Minnesota, Ohio and Indiana.

Chairman D. B. Atherton, of the committee on sale of tickets for the armory ball, will give a luncheon to the twenty-one members of the committee at the Scranton club, at 12:30 o'clock today. Ways and means for the disposal of the tickets will be discussed.

The armory was completed yesterday, as far as the inside work is concerned. All the varnishing and painting has been finished and the only work that now remains to be done is a general cleaning up and the furnishing of the administration building. This will be begun at once, as all the furniture has been purchased, and the carpets have all been made.

There remains yet, however, considerable work to be done on the outside, in the way of cleaning up and the laying of sidewalks, but this is to be attended to at once. The decorators are to commence their labors the latter end of this week.

FIRE HOUSES VISITED.

Director Wormser Looks Over Furniture with an Eye to Purchase.

Director of Public Safety E. L. Wormser, in company with Chief Engineer Ziehlman, of the fire department, made today a tour of the fire houses in the central part of the city and in West Scranton yesterday. The furniture in each was looked over and a memorandum taken of all that is to be purchased from the several companies in the city.

The company houses in South Scranton and in North Scranton are to be visited either today or tomorrow for the same purpose. Director Wormser said to a Tribune man that he thought that there was not sufficient money appropriated for the purchase of all the furniture which the city will need. It will have to come, he said, from the \$2,400 appropriation for supplies, a considerable portion of which will be eaten up by other expenditures.

The Neptune Engine company displayed its furnishings at auction last night before the city had a chance to buy any of them.

A Serious Explosion.

Yesterday morning about 9 o'clock a serious explosion occurred in the mine of A. D. & F. M. Spencer, Mine Foreman Edward Hughes, James Tighe, miner, and George Newman, laborer, were engaged in exploring some abandoned workings in the bottom vein when the explosion occurred. They had previously tested the locality with safety lamps and finding, as they thought, no trace of gas, were using naked lamps. In passing along an old cross cut where the circulation of air was particularly poor they ignited a vein of gas. A terrific explosion followed which shook that part of the mine, and Hughes and Tighe were seriously burned about the face and hands and also suffered painful lacerations about the body. Newman was only slightly burned, but suffered a severe cut about the head and face.

They were all removed to their homes and physicians summoned. Late last night they were all reported to be resting as comfortably as could be expected and no serious results are expected to follow.
