#### COMMON COUNCIL MAKES INQUIRIES

The Lower Body Wants to Know Why the City Clerk Did or Did Not Do as to Certain Measures of Select Council - Inquiries Ordered. Other Matters of Interest at Last Night's Session.

Conspicuous among the doings of common council last night was the attention which the members gave to the city clerk and the concern which they manifested as to certain measares of select council which they in 'dicated were not cared for as this latter body directed or intended.

To begin with there was a pointed inquiry by Mr. Nealon as to a resolution that was passed at the last meeting of the select directing the purchase of a typewriter for the city clerk and city solicitor's office, but which failed to show its presence among the other papers received from the city clerk. Its absence was explained by City Clerk Moon, though the explanation was not well received, some of the members saying something about "any kind of excuse doing," etc.

Further along in the meeting Temporary Chairman Kennedy wanted information as to who authorized the renting of one of the rooms of city hall of Jerry O'Hearn, which was taken possession of by that gentleman on the day succeeding Decoration day The members were at sea as to where the authority came from, though Janitor Killeen, when questioned, declared he asked City Solicitor Stuart if it would be proper to give the keys over to Mr. O'Hearn and that official informed him it would. Council was far from satisfied and it was decided by resolution to call on City Clerk Moon for light on this question.

Finally the members of council ques tioned the city clerk's method of advertising for bids for lighting the city for the coming year. Mr. Thompson started the discussion by expressing the belief that the resolution of Select Councilman Thompson, adopted at the joint meeting of councils a few weeks ago, at which the bids on lighting were all rejected, called for estimates on lighting the city building beside street illuminations and calling attention to the fact that the bids as they appeared in the advertisements now running called for estimates on street lighting only. Mr. Thompson wanted to know why this was so and his desire for information was shared in by the rest of council, for there was a resolution adopted asking City Clerk Moon for information on this

point. There was also some criticism as t two or three communications that were received at the last meeting of select council, statements of the city finances from the controller, which Mr. Moon explained were inadvertently placed in the wrong box.

In the absence of President Collins who is on a western trip. Mr. Kennedy was called to the chair, on motion of Mr. Nealen. All of the members were found to be present except Chair man Collins and Mr. Murphy.

When the reports for committees were called for, there was none pre-

When the resolution of select counell, directing certain repairs to the walls of the councils, also to rooms of the city clerk and city solicitor, came up. Chairman Kennedy suggested that be referred to committee, and the members of council, who appear uninformed as to the necessity of the rerairs, voted for its reference to committee. The resolution from the same branch, directing the removal of the light on Hospital street thirty feet nearer the hospital, was treated like-

There was about a score of bills read that were passed upon by the joint fluoreial committee and among them was one from the Leader and one from the Advance for advertising the municipal water plant ordinance. Both buls were objected to as being too high, and after a discussion, in which nearly all of the members of council participated, the resolution directing the payment of all of the bills was amended so as not o include either of these two items. The amended resolution carried, and the bills in question were referred to emmittee for investigation

This appeared to be al. of the conurrent resolutions, and as the clerk was about to take up another communication. Mr. Kennedy said that so long as h was a member of council, he would vote for no more fire hydrants until ouncils would consent to the provisions for one or two hydrants that were necessary for the Fourth ward. There was a crying necessity, he declared, for hydrants in the Fourth ward, and to meet this necessity be, himself, introduced ordinances which were ignored by select council, being referred to committee and allowed to remain there until the old council died.

Mr. Kennedy waxed warm in his discussion and he pounded the desk by way of emphasis.

Mr. Whitfield came to the defense of his measure, which he said should not be allowed to suffer by reason of the action of council in another instance He wanted the ordinance to be consid ered forthwith by committee. His motion prevailed and he was successful also in having the ordinance fav orably reported and ordered to be

### **GENERAL TEST OF FIRE** ALARM SYSTEM TODAY

Chief of the Fire Department Mc Nulty, P. H. Gilleran, Keeper of the System, and City Engineer Will Ring in an Alarm from Each Box Beginning at Nine O'Clock This Forencon - Purpose of Test.

The first general test of the city's fire darm system since it was turned over by the Gamewell company, over a year ago, will be made today by Chief of Fire Department McNulty, P. H. Gilleran, of the Central Pennsylvania Telephone company, keeper of the sys m, and City Engineer Kupp. The test is being made at the in

times of Chief McNulty, who wants to atisfy himself that the system is in good working order, and that if there e anything wrong, the defect may be located and the possibility of disaster in the event of a big are averted. Mr. Gilleran, who has the best appreciation of any person in the city of the necessity of seeeing to it that nothing be allowed to interfere with the operation of the delicate mechanism of the system. heartily endorses the proposed test and he cheerfully lends his aid to the work of today.

As pointed out in The Tribune sevral days ago, the efficiency of the sysem can only be maintained by keeping all of the boxes and all of the parts of the apparatus in action, that is, by not allowing any of the clock-like mechanism of the boxes from falling into disuse. The system with all its arts was made for active service, and by this means only can good results derived from it. If any single box be allowed to fall into disuse, then there is a possibility of trouble, but eith all of the mechanism kept in acica, by tests being made at regular intervals, such as the pulling of one oox each day, in rotation, this is averted and a perfect system, such as the one in this city is regarded, will be the

#### FAMILY TROUBLES AIRED.

Alderman Jones Listens to Stories of Flying Broom Handles and the Like.

Alderman Jones on Saturday listened o the woes of Patrick Connor, of Brooklyn street, who had stories to rebate which told of alleged harsh treatment which he received at the hands of his foster parents. Bernard and Bridget Gaffney, with whom he made his home, Their relations, Connor everred, have not been agreeable for ome time, in fact they have been a such great odds that quarrels have resuited. Connor said he bore with his trials until matters reached that stage hen forbearance ceased to be a virue, then he set out for the alderman o seek redress.

His complaint against Mrs. Gaffuey was that in the passage at arms she relied on the weapen that in the hands a woman is a dangerous foe of offending dogs-the broom handle. This Conner declared, the woman wielded quite as clearly as a home-run hunter on McMurtha's team of crackalack ball players might handle a bat when he came up to swat the sphere a 'Keller." Mrs. Gaffney also had reinforcements, though less powerful, in the way of threats, which she doled out quite generously. As for Mr Gaffney, Connor said that he was quite handy with his legs and could administer the swiftest kind of a kick, as he could well testify to. Connor barged up threats to his foster-

#### A NUISANCE ABATED.

Abandoned Canal Bed at Seventh Avenue Depot Filled with Culm.

The dangerous nuisance which The ribune pointed out as existing, and for about two years, along the abandoned canal bed, near the Seventh avenue depot of the Delaware and Hudson company, has been abated.

The dangers of the neglected spot were effectively removed on Sunday, when a force of laborers, under the direction of the Delaware and Hudson company's local officials, filled the bed with culm. A portion of the platform that covered the old stream was raised and about thirty carloads of culm were shoveled along the old course, filling

he space to a level with the platform, This move of the company was certainly one in the interest of the public health, for the water which was not trained of when the caral stream was hecked, became stagnant from its ong standing and gave off odors that were disease-laden and which caused the board of health to become indignant when they investigated the matter about two weeks ago.

#### GRIP MADE THREATS.

So Says John McGowan in Alderman Jones' Court. So the Magistrate Held the Accused.

John McGowen was the prosecutor n a case before Alderman Jones on Saturday night in which all sorts of lark threats were conspicuous. The defendant was Joseph Grip, who Mc-Coman declared said some fearful hings to him. The young men had ome differences and in the clash of words there was a hot exchange which ended in Grip being accused and arrested by McGowan. Grip had his de-dense, but the alderman decided to hold him in bail until next Saturday night, when the charges will be heard. Constable Neary made the arrest.

he school book. But quite as much interest is arousd by the Iberian souvenirs. Among them are a number of old swords, that tell their story in a peculiar way. On be blades of the weapon, quite close the handle, a notch is made, according to Iberian custom, for every victim. Some of the swords have ten and twenty notches. The crude writng utensils of the Iberians are marvels f ingenuity. One of their pens is not strikingly different from our own, exept in material. It is a long, thin dece of wood, sharpened to a point, end split as the stub, known to Ameri-

### MADAME CHAMOT.

The American Woman Who With Her Husband Did Much to Aid the Legations Beseiged In Pekin.

Mme. Chamot is an American woman whose name will go down in history as having supplied provisions to the besieged legation in Pekin last summer at the risk of her life. ter husband, who is a Swiss, she kept the Hotel Pekin, and but for her the legationaries would have had even a harder time than they had. Both M. and Mmc. Chamot took active cause in the defense; but best of all they supplied food when that of the besieged was nearly exhausted. Mme, Chamor had several narrow escapes while getting the food into the legation, but nothing daunted her. M. and Mme Chamot expect to leave Pekin soon for a European trip, and at different courts they are to be decorated with orders already promised for their bravery. Altogether they will receive
