health was never so fully recognized without being subject to the associaas now. It is clearly illustrated in the thousands of cures made by Dr. A. W. Chase's Nerve Pills-a medicine that to the office of the master machinist has leaped into public favor solely on its wonderful Nerve restoring properdown the barriers of ill health, is because they restore Nerve Energy-the main spring of health. They supply the something that is wanting which makes the human machinery run smoothly, they act through that great network of human organism, reaching every part of the body-the Nerves.

Dr. A. W. Chase's Nerve Pills do not act as a momentary stimulant that excites and whips up the Nerves for the time being only-they first stop the wasting process and then build up Nerve Energy by replacing Nerve waste with active, responsive tissuethe kind that vibrates health to mind and muscle.

SPORTS IN GENERAL.

The training methods of the Amerian track and field athletes who have recently been winning honors in England have amazed and, in some cases, amused the British. Says The Sports-

"It has been customary to put down a great share of the American successes over here to their systematic training; but, while admitting that they may be more thorough in their preparation, there is no gainsaying the fact that those we have with us now are

very fine natural athletes. The retinue of masseurs without which the Americans are popularly supposed never to travel are not to be found in the neighborhood of Stamford Bridge; but our transatlantic cousing are nevertheless great believers in muscle kneading. This, however, they are not above doing for one another, proceding which is against the English canons of training. While, too, in this country opinions on the subject of smoking in general are divided, cigarette is strictly tabooed. Cigarette smoking has doubtless different effects on different constitutions. I can call to mind at least one of our own champions who was an inveterate cigarette smoker, but the average runner would as soon think of lighting up a quarter of an hour before he was to make an attack on record as he would of eating a beefsteak. Kraenzlien and Baxter, however, pass the time while waiting in the dressing room for their events in the company of My Lady Nicotine. THE MARKETS.

New York, July 29.—The way in which the stock market acted this morning served to dash the hopes of the bulls among the traders who had indulged a hope that some accession of speculative interest would result from the tavoring factors over Sunday. For two Mondays past the market went up in the face of an accumulation of discouraging factors, which resulted in selling down prices within the first hour of trading to what proved to be the low point of the week. This morning, in contrast, there was the news of rains in the corn bell, about which there was no dispute, for the first time, as to their act and beneficial character. There was, besides, the news of consultations between representatives of the finited States Steel corporation and the Amalgamated association. The opening of negotiations gave strong hope of an early settlement. The simultaneous sales of United States Steel corporation and the Amalgamated association. The opening of negotiations gave strong hope of an early settlement. The simultaneous sales of United States Steel at the opening were 35,000 shares at an advance of 2 points, and a large number of the stocks thus benefited were Norfolk and Western, Chesapeake and Ohio, Pennsylvania, Baltimore and Ohio, New York Central, several of the coalers, the Chicago and Alton stocks, Hocking Vatley, a number of the Southern and Southwestern railway stocks, Colonado Fuel, American Tobacco and North American. As a device for awakening interest in the market this is a failure. The opening rush to low was all that brought the day's dealings above the level of activity prevailing during the latter part of last werk. When the room traders attempted to take profits at the end of the day prices crumbled away and only a few stocks had anything left to show but fractional net gains at the closing, which was dull and heavy. Total sales, 676,000 shares.

The bond market was dull and irregular. Total sales par value, \$1,415,000 United States bonda were all unchanged on the last call. Wall Street Review.
