

The Scranton Tribune

Published Daily, Except Sunday, by The Tribune Publishing Company, at Fifty Cent a Month.

LIVY S. RICHARD, Editor. O. F. BYRNE, Business Manager.

New York Office: 120 Nassau St. S. S. VRELAND, Sole Agent for Foreign Advertising.

Entered at the Postoffice at Scranton, Pa., as Second Class Mail Matter.

When space will permit, the Tribune is always glad to print short letters from its friends bearing on current topics, but its rule is that they must be signed, for publication, by the writer's real name, and the condition precedent to acceptance is that all contributions shall be subject to editorial revision.

THE RATE FOR ADVERTISING. The following table shows the price per inch each month, space to be used within one year.

Table with columns: DISPLAY, Paper, Reading Position, Full Rate, and a list of rates for different ad sizes and durations.

For cards of thanks, resolutions of condolence and similar contributions in the nature of advertising the Tribune makes a charge of a cent a line.

Rates for Classified Advertising furnished on application.

THE REPUBLICAN TICKET.

State. Supreme Court—WILLIAM P. POTTEE. Treasurer—FRANK G. HARRIS.

Election Nov. 5. When the Democrats went out of power in our state it left to the Republican party a legacy of almost unexampled debt.

It is not easy to see why the Lackawanna Iron and Steel Company should expect to pay less taxes on a tract of land than would be assessed against another holder.

Example Among Corporations.

EIGHT years ago, when H. H. Vreeland, who had shortly before been a conductor on a small steam railroad, had a good one, knowing his own business and the company's business thoroughly, took the management of the Metropolitan Traction company, which now owns or operates by lease most of the surface street car lines in New York.

One by one old lines were bought in and improved until now there are six large lines, and the Metropolitan has more than 300 points of transfer and 50 per cent. of the company's 385,000,000 passengers last year took transfers, so that the average fare was in reality 2 1/2 cents a passenger.

In addition, large sums of money have been expended on experiments looking to improvements in equipment. Six or seven years ago \$500,000 was spent to see whether underground trolleys would work. The problem was not solved at once, but it is solved now, and this expenditure undoubtedly expedited the solution.

lished accounts for what it may be worth. The number of past failures scored in the search for a germ-killer that may safely be taken into the blood, reinforcing its own combative qualities, so as to fortify the patient against disease, by its conservatism but does not necessarily discredit new claims of success. These must be tested and sifted as they arise. If Dr. Fralick has done only half of what he thinks he has, he has made himself a benefactor of humanity and laid a broad foundation for enduring fame.

Students of Cuba's newly drafted constitution have discovered that no provision is made to guarantee free trade between the provinces nor between different cities of the same province. Thus it might, it is pointed out, come about that all commercial and reciprocal treaties between the United States and the republic of Cuba could be practically nullified by provincial legislation on the part of Cuba. The omission is a serious error, but there is little danger that ill results will follow. Cuba needs the United States much more than the United States needs Cuba or Cuban trade.

A writer in the New York Tribune proposes as a cure for strikes that employers determine and so announce that the employee who strikes shall never be reinstated, that if he wants to work he must go elsewhere. This is a drastic remedy, lacking in sympathy for workers who are misguided; but it is the destination toward which the professional agitators are fast driving their victims.

It is unquestionably too early for presidential boom planting, yet now that the friends of Clegg, Fairbanks and Governor Shaw have begun, the admirers of Roosevelt form determined to keep them busy.

Some to think of it, this illustrated newspaper gush regarding the Shamrock H. Co., Columbia, etc., must be rather tiresome to the majority of its readers, who seldom see even a canal boat.

Thus far this year Colonel Roosevelt has had more than 2,000 invitations to make public speeches. This does not corroborate the theory that the Vice-presidency would become Teddy's tomb.

A professorship of labor ethics is to be established at the University of Chicago. There is plenty of professing on this subject. What is needed most is more practice.

In these days of unwholesome milk, it is well to remember that the lactated fluid which will not ferment is more dangerous than that which sours too soon.

Some who, at the pinch, object to killing the goose that lays the golden eggs nevertheless, whenever there's a fuss, throw rocks at it, hoping to win hand-claps in the galleries.

In Schenectady, N. Y., they won't permit a beggar to beg or a grind organ to play on a public street. Their example is worth studying.

The Sampson health bulletins arrive with an irregularity suggesting that something must be the matter with the wires.

Mayor Black, of McKeesport, proposes to make a record whether there is anything left of the town or not.

Prince Chun ought to be in demand for exhibition purposes as the only and original Celestial scapegoat.

Democratic Chairman Cressy says he is for fusion. Naturally. That is what he is there for.

With due respect to other great men, it is time the public heard again from Senator Beveridge.

Schwalb's peace terms were a pious lot to stone the mourners.

Mr. Eckels' Appointment. Writing from Washington to the Philadelphia Press J. S. Henry tells the following interesting story of how James H. Eckels came to be appointed comptroller of the currency:

The Democratic delegation from Illinois had recommended Mr. Eckels for one of the attorneyships in that State. He was a lawyer by profession, but during the campaign of 1892 he had attracted attention by his able discussion of the financial question. A talker in the young man, Mr. Cleveland in company with his secretary of the navy, Mr. Whitney, heard Mr. Eckels make an address on the money question before a large audience in Chicago during the campaign. When the Illinois delegation urged the appointment of the young man as United States district attorney, President Cleveland laid his papers to one side and told the delegation to recommend someone else. There was some surprise felt and expressed, but another man was referred and received the appointment.

One day in the green gallery of the senate there appeared in company with a Chicago correspondent a slight, beaming young fellow who looked around him with a good deal of curiosity and interest, evidently a stranger on his first visit to that part of the capital. While there a messenger brought in a list of the nominations from our various States, and the newspaper friend turned to the young man and exclaimed: "Hello, Mr. Eckels, you are an appointed comptroller of the currency."

"Comptroller of the currency?" gasped the young man. "I know about as much of the work of that place as a monkey of astrometry."

There was no one more surprised than Mr. Eckels himself at the appointment. An interview with the president and an examination of the duties of the office reassured him, and he understood the work which made him famous. Shortly after taking office the financial panic struck the country, and it was owing to his good judgment, firm and conscientious management of the office and good hard common sense that the national banking disaster was not more numerous and appalling.

Professor Chandler's Ready Wit. Professor Chandler, of Columbia University, holds an enviable position of popularity in the minds of the student body of that institution, perhaps as much on account of his clever method of turning aside the student's questions as for any other reason. At the University with a low average and in a group of Columbia men, several anecdotes were told illustrative of Professor Chandler's ability in this direction.

It seems that one day some disgruntled member of the chemistry division reached the lecture room in good season and sought to create amusement by writing on the blackboard in a bold hand: "Chandler is an ass." This had the desired effect, and suppressed chuckling could be heard around the room. Then the professor entered a few moments later at the beginning of his lecture hour.

"As he walked to his desk," continued the man who was telling the story, "the blackboard inscription caught his eye. Most of us thought he would raise his eyebrows, but that wouldn't have been Chandler. He scarcely hesitated a second, but walked over to the board and with a low average and in a group of Columbia men, several anecdotes were told illustrative of Professor Chandler's ability in this direction.

then asked, and he replied as before: "He did not." This is interesting and fair as a matter of political history, especially in view of the claim by some of Finn's former followers that Finn was gold-bribe. The governor of Pennsylvania is a man who keeps his word.

Students of Cuba's newly drafted constitution have discovered that no provision is made to guarantee free trade between the provinces nor between different cities of the same province. Thus it might, it is pointed out, come about that all commercial and reciprocal treaties between the United States and the republic of Cuba could be practically nullified by provincial legislation on the part of Cuba. The omission is a serious error, but there is little danger that ill results will follow. Cuba needs the United States much more than the United States needs Cuba or Cuban trade.

of laughter greeted the clever touch, and Chandler did not only get out of an awkward predicament, but had at the same time added to his capital of popularity.

This incident reminded another of the Columbus men of the time when someone had carried into the chemistry lecture room a bottle of vile-smelling liquid collected specially for the purpose in the laboratory. The atmosphere in the room when Professor Chandler entered was well nigh unbearable. He detected the odor almost before he had crossed the threshold, and, turning abruptly, looked the door and put the key in his pocket. Then, walking to the desk, he took his seat without the slightest show of annoyance and remarked, "Gentlemen, we will enjoy this together."—New York Times Magazine supplement.

Grant's Tomb. The American tourist is often amused at some of the mistakes made by foreigners in pointing out and describing landmarks in the lower bay. One tourist once asked the keeper of the tomb what had happened during the voyage. Knowledge of many subjects, pointed to the big white light-house on Sandy Hook and said to an interesting group of visitors:

"That is the famous tomb of General Grant, close to the sea he lived so well. The site was selected with the hutting sea on one side, and the one thousand feet of water because it was so typical of the two sides of his life. I tell you the Americans are sentimental."—New York Mail and Express.

A Legal Expectation. An Illinois attorney argued to the court one fine afternoon a series of very weak points, none of which seemed to the court to have any merit, until the court finally said:

"In these points?" "To which the attorney replied: 'Well, Judge, perhaps there isn't much in any one of them, but I don't know how to put your honor's kind of bomb them.'—Case and Comment.

FAMOUS PHYSICIAN DEAD. The Baron Dr. Herman Widerhofer, who died a few weeks ago at Ischl, in the Salzammergatal, Austria, was for over thirty years the physician and intimate friend of the Emperor Francis Joseph, of Austria, and was the constant companion of the late emperor in all his journeys.

He was a man of commanding stature and large physique, of courtly manners but congenial and lovable disposition; a great lover of children and animals, with that rare quality of personality which inspired love and confidence and which makes the ideal family doctor.

FINLEY'S

Exhibit of BLACK DRESS FABRICS

In the fashionable world today black holds a unique place; it is always in style, dignified and distinguished.

Today we present for your inspection the new fabrics for Fall and Winter. They form an incomparable exhibition of high class materials.

These fine goods of exquisite texture finished to our special order come to us direct from the most noted manufacturers in France, England, Germany and America.

Prominent among our foreign collection are the famous "Prestley" and "Lynn" fabrics in unexcelled quantity and in all the newest weaves, such as:

Biaritz Suiting, Satin Raye, Pouzinette Crepoline Armure Indecise, Etamine, Etc.

At prices ranging from 75 cents to \$1.00 a yard. We aim to have the best goods obtainable—then we offer the right goods at the right price.

A visit to our store will make it clear to you that this exhibit of ours is different to any other. No advertisement can do justice to the exquisite quality and richness of this collection.

We invite you to call and see them. No need to purchase until you are ready. A few specials at popular prices.

At 45 Cents. 40-inch pure wool Cheviots and Storm Serges. 40-inch pure wool satin mix duquards. 40-inch pure wool Albatross and Cash Serge.

At 75 Cents. 45-inch Silk Stripe Capelines.
