FACTORYVILLE.

Special to the Scranton Tribune. Factoryville, Jan. 9.—Circulars sent out by the chief of police of Athens, Pa., reached this place Tuesday, showing on the face of them the photo of a description of a young man named McCoy and that he was wanted up there for burglary. About 7 o'clock Tuesday evening, a young man answering the description given on the circular appeared here at the Delaware, Lackawanna and Western station and procured a ticket for Scranton. Officers Reynolds and Ellender were notified and they went to the station and took possession of the stranger and placed him in the station house. They then telegraphed to the authorities at Athens, Wednesday, the chief of police of the above named town came on here, identified the prisoner and left for Athens with him.

Some of our sidewalks are in a very dangerous condition, and the property owners in many instances have made no effort at any time this winter to have them cleaned. The sidewalk leading from Main street to the depot is impassable and has been for some time, and there are other instances when pedestrians are compelled to walk in the street in order to prevent broken heads or limbs. By law the borough is liable to damages sustained by a fall on a neglected walk.

John Waltz, who was last week released from the Eastern penitentiary by the board of pardons, was a visitor in town today. He has changed very little. Waltz was in 1897 tried on the charge of killing Jacob Lemon in January of that year. Lemon was in a pool room in the Higgins building, and Waltz lived with him. Waltz claimed that Lemon shot himself, and the evidence on which he was convicted was entirely circumstantial. He was sentenced to nine years' imprisonment. At the time of the trial, a large number of people were inclined to believe Waltz's story, and there was no opposition to the efforts in his behalf for a pardon.

New York, Jan. 9.—Speculation came to a halt today and showed much hesitation about the market. The stock market showed upward movement in the latter part of yesterday's session was evidently due to a drive against shorts which were not in the market. The speculative liquidation on previous days, the absence of important new developments in the stock market, and the general feeling of the market were factors which persisted during the greater part of the day, to prevent the dropping of prices. It was not very effective at any time, although there was a rally one time which gave the market a temporary lift. The closing, however, when the utility of the efforts of the bulls became apparent, three leaders began to decline, and the market fell to the lowest point of the day and generally closed lower. St. Paul was under severe pressure and lost 2 1/2. The upper Green River range, particularly the one on the market during the latter part of the day, was taken on an enormous scale by brokers who have been active in it ever since the recent advance began. They made it touch 95%, an extreme rise of 1/4 after which it reacted, closing nearly one percent below the opening. The first experimental run by electricity over one of the company's lines was the ostensible cause of the decline. The latter in a small way, and was affected in sympathy.
