Mexico City, Jan. 17 .- One of the most terrible catastrophes ever recorded in the state of Guerrero is reported to have occurred late yesterday afternoon when an extremely violent earthquake shock was felt at Chilpancingo, causing a great loss of life and injuring many persons. Details from the stricken district are very meagre, but scattering reports received here indicate that probably 300 persons were killed and as many more injured. It is known that the state capitol, the parish church and many business houses and residences are in ruins, and there is much suffering as a result of the awful seismic disturbance. One of the edifices that suffered most was the federal telegraph office, which explains here next Monday. The indications the paucity of news that has reached began to arrive here. The telegraph lines and apparatus at Chilpancingo were badly damaged but the employes, all of whom were uninjured, ouickly proceeded to erect an improvised telegraph office on the outskirts of the city.
